Offers accessory products to assist with splice rejacketing, cable jacket sealing, grounding and cable preparation. Many of the products shown here are used with 3M splices and terminations. Remember to reference those sections for more product information.

Complete care
for any
kind of cable

Splice Rejacketing

When jacketed concentric neutral cable (JCN) is spliced, it is necessary to cover the junction between the cable jackets with a water resistant re-jacket. 3M offers three designs for splice re-jacketing: cold shrink one piece sleeve, cold shrink stacked sleeve, and heat shrink adhesive-lined sleeves.

3M™ Cold Shrink Splice Jacket Kits SJ-1A, SJ-2A, SJ-3A

Cold shrink jacket kits offer advanced, one-piece, water-tight re-jacketing for JCN cable splices. Designed as an accessory kit to re-jacket over molded rubber splices, the SJ Series is made from durable EPDM rubber.

3M Cold Shrink jacket kits SJ-1A, SJ-2A and SJ-3A offer advanced, one-piece, water-tight re-jacketing for JCN shielded power cable splices. The SJ series accommodates voltage classifications of 15 kV, 25 kV and 35 kV.

In addition to the open-ended, tubular rubber sleeve, each kit includes Scotch® Rubber Mastic Tape, which is used to adjust cable O.D. and provide a sure, long-lasting seal between the cable jacket and the cold shrink sleeve, as well as sealing around the cable ground conductor.

This unique, cold shrink re-jacketing kit eliminates the need for dangerous torches or special tooling.

Each kit jackets one splice.

3M™ Cold Shrink SJ-SS Series Stacked Sleeve Splice Jacket Kits SJ-1SS, SJ-2SS, SJ-3SS

Cold Shrink Jacket Kits SJ-1SS, SJ-2SS and SJ-3SS are two-piece, water tight re-jacketing kits for JCN cables.

3M™ Cold Shrink SJ-SS Series Stacked Sleeve Splice Jacket Kits SJ-1SS, SJ-2SS, SJ-3SS

3M™ Heat Shrinkable Splice Jacket Kits HSJ Series

Designed to re-jacket molded rubber splices, the SJ-SS Series kits are made of EPDM rubber. This unique two-piece design allows the two tubes to “stack” on top of each other during installation, requiring less space in the manhole or ditch to make the splice. Each kit contains one small cold shrink tube, one large cold shrink tube, one profile bushing and one roll of Scotch® Mastic Tape 2228. SJ-1SSR and SJ-2SSR are specially sized for repair splices.

Each kit jackets one splice.

3M™ Cold Shrink Foldback Splice Jacket Kits SJ-FB

3M Cold Shrink Foldback Splice Jacket Kits SJ-FB Series are a series of folded back, tubular rubber sleeves that combined with Scotch® Rubber Mastic Tape 2228 provide a sealed jacket over cable splices installed on jacketed power cable. These kits are similar to the FB tubes in the 3M Cold Shrink QS III splice kits.

The Scotch Rubber Mastic Tape 2228 provides for an assured sealing interface between the cable jacket and Cold Shrink Foldback Jacket Tube. Mastic strips are also used to seal around the optional, external ground conductor.

The jacketing tube is made from EPDM rubber that contains no chlorides or sulfurs. The completed jacket tube will be continuous from cable jacket to cable jacket, with no seams.

Four kit sizes cover an application range from 4 AWG, 15 kV to sizes larger than 4/0 AWG, 35 kV.

3M™ Heat Shrinkable Splice Jacket Kits HSJ Series

HSJ Series Heat Shrinkable Splice Jackets are adhesive lined for water-tight re-jacketing of JCN cable splices.

Each kit covers one splice.

Applications:

- To jacket inline splices installed on JCN cable and other jacketed power cables with continuous operating temperature of up to 105° C and an emergency overload temperature rating up to 140° C
- For use in indoor or outdoor installations including direct burial, aerial, and submersible applications
- Physical protection and moisture sealing of inline splices installed on shielded power cables having a solid dielectric insulation

Jacketed Concentric Neutral Cable (JCN)

Splice Repair

3M™ HDCW Wraparound Heat Shrink Cable Repair Sleeves

3M HDCW Heat Shrink Wraparound Cable Repair Sleeves are designed to quickly repair damaged cable jacketing. They may also be used to re-jacket in-line splices. 3M HDCW wrap sleeves can be used as insulation material on cable and splices up to 1000 volts and as jacket repair material on cable up to 35 kV. The design of the wrap sleeve allows it to be installed in tight spaces with ordinary heating equipment such as a torch.

The 3M HDCW cable repair is made from modified cross-linked polyolefin, with a hot-melt adhesive liner on the inner side of the sleeve. Upon heating, the sleeve shrinks and the adhesive melts, creating a water-tight bond between the sleeve and the cable. 3M HDCW Wraparound Cable Repair Sleeves meet ANSI C119.1 requirements. A corrosion proof metal channel is used to close the sleeve during installation.

3M HDCW wrap sleeves are stocked in four lengths and five diameters. Other cut lengths are available upon request.

Application Guide and Ordering Information for 3M HDCW Wraparound Heat Shrink Cable Repair Sleeves

3M™ Safety Sock Grounding Kits, Shielded and Jacketed URD Cable

For use on tape or wire shield and jacketed concentric neutral (JCN) cables. Provides continuity of the cable shield system and a path to ground in the event of a dig-in.

Ordering Notes:

- Each kit contains shielding for one splice
- Use the shield diameter range as final ordering criteria
- A re-jacketing sleeve, such as the 3M Ground Kits SJ Series, must be applied over shielding
- Kit contents: copper screen sleeve, mastic seal strips, constant-force springs, instructions

3M™ Scotchcast™ Jacket Repair Kits M Series

Scotchcast Jacket Repair Kits M Series contain a reusable wrap-around mold and accessory materials needed to make 10 permanent, flexible and moisture-resistant jacket repairs or splices of portable cable. The kit contains a wrap around mold that permits jacket repair without cutting through the cable. When used with 3M Scotchcast Resin 2130, M series kits provide durable, flexible jacket repair. Scotchcast kits can be used with portable power cable or standard cable.

Note: Scotchcast flame-retardant compound 2130 needed to jacket the repair or splice is not included and must be ordered separately. U.S. Mine Safety and Health Administration acceptance No. P-142-5 MSHA.

Sealing and Grounding

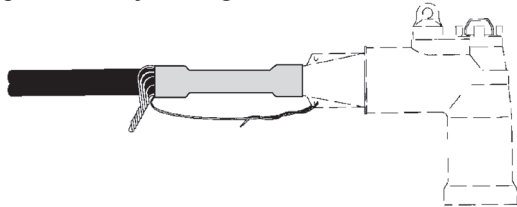

3M™ Cold Shrink Cable Accessory Sealing Kits 8450 Series are designed to seal the end of JCN cable. Use these kits when installing elbows or other cable accessories that do not include a jacket seal. 3M also offers three types of sheath sealing or breakout kits; poured resin, cold shrink and heat shrink, several heat shrink cable sealing end caps and a variety of grounding hardware.

3M™ Cold Shrink Cable Accessory Sealing Kits 8450 Series

The 3M Cold Shrink Cable Accessory Sealing Kits 8450 Series are designed to seal the jacket end of power cables where elbows or other cable accessories are installed. Both the sealing tube and mastic are compatible with commonly used power cable jacketing and semiconductive materials.

Note: Elbow not included.

3M™ Cold Shrink Shield Adapter Kits 8459/8460 Series

3M Cold Shrink Shield Adapter Kits are designed for grounding and sealing tape, wire and UniShield shielded power cables when using cable accessories such as elbows, modular splices and terminations.

These cold shrink kits require no heat, special tools or special skills to install. The cold shrink kits come complete with all necessary components (except the cable accessory) and are installed in a few simple steps. We've even attached a "bleeder wire" to the ground strap eliminating the need for additional wire and connectors.

3/C Cable Breakout Boots and 3/C Phase Rejacketing System

3M™ Cold Shrink Silicone Rubber 3/C Cable Breakout Boots 8560 Series and 3M Silicone Rubber RJS Series 3/C Phase Rejacketing Systems are designed to be used in conjunction with 3M terminations, to seal the breakout area and rejacket the phases on three conductor cable without grounds.

3M™ Cold Shrink Silicone Rubber 3/C Cable Breakout Boots 8560 Series

3M Silicone Cold Shrink Cable Breakout Boots 8561 through 8565 are a series of open-ended molded rubber sealing assemblies that are factory expanded and mounted on removable inner-supporting plastic cores. They are supplied for field installation in a pre-stretched condition.

The supporting cores are removed after the seal has been positioned for installation around the breakout area of a three conductor cable. Core removal allows the silicone rubber boot to shrink down to a predetermined diameter, creating an environmental enclosure for individual cable phase legs and the overall cable jacket.

3M Breakout Boots 8560 Series are designed to protect the phase leg breakout of 3/C medium voltage power cable from exposure to moisture, contamination, corrosion, ozone, ultra-violet radiation, physical contact and other hazards associated with 3/C termination operating environments. 3M Breakout Boots 8560 Series can be used in conjunction with 3M Silicone Rubber Cold Shrink Rejacketing Sleeves for 3/C shielded power cable terminating applications.

3M™ QT-III Silicone Rubber

Features and Benefits:

- Versatile; installs quickly and accommodates a wide range of cable sizes
- Simple hand application; no need for special installation tools
- No torches or heat required
- No specific user skills or craftsmanship required
- Excellent resistance to ozone and ultra-violet radiation
- High dry and wet insulation resistance
- Highly flexible; accommodates all power cable supplier bend radius recommendations
- Seals tight; retains resiliency and pressure even after prolonged years of aging and exposure
- Compatible with all 3M Cold Shrink Termination Products and RJS Series Phase Rejacketing Sleeves

3M™ 3/C Phase Rejacketing System

3M RJS Series Rejacketing Sleeves are designed so that 3M Cold Shrink QT-III and Q-TIII Silicone Rubber Terminations can be used on 3/C (three conductor) medium voltage shielded power cables of tape shield, wire shield, armored and non-armored configurations. RJS Rejacketing Assemblies are a series of silicone rubber insulators incorporating an inner-expandable polyester braid designed to reduce sliding friction and deliver the insulator onto the cable. Rejacketing sleeves are designed to protect the phase legs (core) of 3/C shielded power cable from exposure to moisture, corrosion, ozone, ultra-violet radiation, physical contact and other hazards associated with termination operating environments. Rejacketing sleeves are designed to be used in conjunction with 3M Cold Shrink Breakout Boots and Silicone Rubber Terminations.

Features and Benefits:

- Versatile; installs quickly and accommodates a wide range of cable sizes
- Simple hand application; no need for special installation tools
- No torches or heat required
- No specific user skills or craftsmanship required
- Excellent resistance to ozone and ultra-violet radiation
- High dry and wet insulation resistance
- Excellent shelf life
- Easy-to-adjust sleeve length; adapts to variable equipment connection and mounting requirements
- Compatible with 3M Cold Shrink PST Breakout Boots and Termination Products

Kit Contents

- 3M Cold Shrink breakout boot, 3M Cold Slip rejacketing sleeves (3 four-foot lengths), provision to externally ground at breakout boot
- 3M Cold Slip rejacketing sleeves (3 four-foot lengths)

Cold Slip

3M Cold slip re-jacketing sleeves incorporate an inner-expandable polyester braid designed to reduce sliding friction and deliver the sleeve quickly onto the cable.

Cold Shrink

3M Cold Shrink splicing products are designed using 3M's unique cold shrink delivery system. Products are supplied pre-stretched on a removable core for efficiency and ease of installation. All splices are pre-tested in the factory.

3M™ Sheath Seal Kits for Multiconductor Cable

3M offers three types of sheath sealing or breakout kits: poured resin, cold shrink and heat shrink. 3M offers two types of heat shrink cable sealing, caps and a variety of grounding hardware.

3M™ Sheath Seal Kits 5831 and 5832

3M Sheath Seal Kits 5831 and 5832 are designed to seal the sheath area for multiconductor cables with or without ground wires. They will handle copper or aluminum cables from #2 AWG through 500 kcmil (35-250 mm²). For kit contents and sizing, see chart below. Each kit makes one seal.

3M™ Sheath Seal Kits 5831 and 5832

3M™ Cold Shrink Sheath Seal Kits 5841 and 5842

3M Cold Shrink Sheath Seal Kits 5841 and 5842 are designed to seal the sheath area for three conductor cables without ground wires. They will handle copper or aluminum cable from #2 AWG through 500 kcmil (35-250 mm²). No heat is required when using these kits. For kit contents and sizing, see chart below. Each kit makes one seal.

3M™ Cold Shrink Sheath Seal Kits 5841 and 5842

Ordering Information for 3M Sheath Seal Kits

| Ordering Information | 5831 | 5832 | 5841 | 5842 |
|----------------------|-------|-------|-------|-------|
| UPC (054007-) | 12280 | 12281 | 12291 | 12292 |
| Case Qty. | 1 kit | 1 kit | 1 kit | 1 kit |

The final determining factor for the 5831 and 5832 is the conductor insulation O.D. and the cable jacket O.D.

The final determining factor for the 5841 and 5842 is the maximum jacket or armor diameter.

Note: Each kit makes one seal.

3M™ Heat Shrinkable Cable Breakout Boots

3M Heat Shrinkable HDBB Cable Breakout Boots are designed for dependable insulating and sealing of cable breakouts in multiconductor armored or sheathed cables and conduit ends. 3M HDBB boots are made from flame retardant, cross-linked polyolefin and meet the material requirements of MIL-I-81765-1. The boots are designed to provide excellent electrical and mechanical protection and are supplied with an internal coating of adhesive for reliable environmental sealing.

PRODUCT REFERRAL GENERATOR

- Insulating pg. 418
 - Heat Shrinkable Tubing
- Sealing pg. 401
 - Cold Shrink End Caps

3M™ Cold Shrink End Caps EC-Series

The 3M Cold Shrink End Caps EC-Series are designed to environmentally seal and mechanically protect exposed cable ends using no tools, mastics or tapes. Regardless of the cable type or manufacturer, it takes only four different end-caps to fit cable size ranges from 1.46" to 3.32" (11,6-84,3 mm), reducing the need for additional inventory to cover all cable sizes. The 3M Cold Shrink End Caps EC-Series protects cables, pipes and other cylindrical objects from exposure to moisture, contamination, corrosion, ozone, ultra-violet radiation, physical contact and other environmental hazards.

3M™ Heavy-Duty End Caps SKE

3M Heat Shrinkable End Caps are typically used to seal cable ends and are designed to provide moisture, mechanical and environmental protection. 3M SKE end caps are for heavy-duty applications.

3M SKE end caps are manufactured from semi-rigid flame retardant, cross-linked polyolefin. They are supplied with

a factory applied adhesive lining for reliable environmental sealing. Six different sizes accommodate a broad range of cable diameters.

Standard Color: Black.

3M™ Hi-Amp Splice Grounding Accessory Kit SG-2 and SG-3 for 15 kV, 25 kV and 35 kV

3M Hi-Amp Splice Grounding Accessory Kit SG-2 and SG-3 are designed to accommodate the shielding and grounding of inline splices made on LC, heavy-duty tape and conventional tape shielded power cables. The SG-2 and SG-3 designs provide a fault current capacity of 15,000 Amps for 15 cycles on 15, 25 and 35 kV class cables.

The 3M kits SG-2 and SG-3 were designed to accommodate all 3M Quick Splice bodies as well as most other rubber-molded inline splices currently used in the electrical power distribution industry.

The 3M copper screen sleeves SG-2 and SG-3 are applied over molded rubber splices on cables with shield diameters ranging from 1.25" (32,0 mm) to 2.25" (57,2 mm). In most cases this will include conductor sizes between 350 kcmil and 1000 kcmil and voltage classes of 15 kV through 35 kV. The 3M copper screen sleeves SG-2 and SG-3 and the preformed ground connection braid have a capacity greater than that of #4 AWG copper wire and are fault current rated at 15,000 amps for 15 cycles. The 3M Kit SG-3 has a larger CMA (greater than 2 AWG) copper screen sleeve and two constant force springs per end. This provides additional neutral current capacity.

Following SG-2 and SG-3 component installation, 3M Cold Shrink SJ-1A, SJ-2A, SJ-3A, heat shrink HSJ series or Scotch® Rubber Mastic and Vinyl Tape systems are the recommended choices for sealing and re-jacketing the installed, shielded splice. Each kit provides shielding and grounding for one splice.

Refer to the ordering table on page 401 for cable and accommodation. Final determining factor, for cables not specified, is a shield diameter range from 1.25" (32,0 mm) minimum through 2.25" (57,2 mm) maximum.

3M™ Hi-Amp Accessory Grounding Kit 8473 for 15 kV, 25 kV and 35 kV

3M Hi-Amp Accessory Grounding Kit 8473 is designed to accommodate the grounding of accessories installed on LC, heavy-duty tape and conventional tape-shielded power cables. The 3M Grounding Kit 8473 design provides a fault current capacity of 15,000 Amps for 15 cycles on 15 kV, 25 kV and 35 kV class cables.

Product application range for the 3M kit 8473 includes cable sizes from 350 kcmil through 1000 kcmil in 15 kV through 35 kV voltage classes as indicated in the table on page 401.

The kit 8473 was designed to be used with 600-Amp elbows and other accessories where cable jacket-to-accessory sealing and high-ampacity grounding is desired.

The 3M Grounding Kit 8473 preformed ground braid has a fault current capacity of 15,000 Amps for 15 cycles with an equivalent cross-sectional area greater than #4 AWG copper wire. Each kit provides grounding and sealing for one accessory.

Refer to the ordering table on page 401 for cable accommodation. Final determining factor, for cables not specified, is a shield diameter range from 1.25" (32,0 mm) minimum through 2.25" (57,2 mm) maximum.

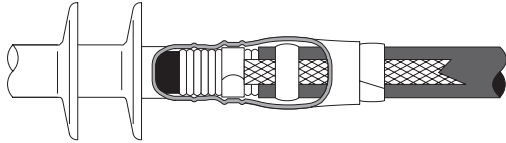

3M™ Hi-Amp Grounding Accessory Kit GSHA-8 QT-II for 15 kV, 25 kV and 35 kV

Tape Shielded Cable

LC Shielded Cable

3M Hi-Amp Grounding Accessory Kit GSHA-8 QT II is designed to accommodate the grounding of terminations made on LC, heavy-duty tape and conventional tape-shielded power cables. The 3M Kit GSHA-8 QT II design provides a fault current capacity of 15,000 Amps for 15 cycles on 15 kV, 25 kV and 35 kV class cables.

The 3M Kit GSHA-8 is designed to be used in conjunction with 3M QT-II terminations in applications where high-ampacity grounding is desired.

The 3M product GSHA-8 will accommodate cable sizes ranging from 350 kcmil through 1000 kcmil and voltage

classes of 15 kV through 35 kV. The preformed ground braid contained in the 3M Kit GSHA-8 has a fault current capacity of 15,000 Amps for 15 cycles. Each kit provides shielding and grounding for one termination.

Refer to the ordering table on page 401 for cable information. Final determining factor, for cables not specified, is a shield diameter range from 1.25" (32,0 mm).

3M™ Cable Grounding Kits 2252 and 2253

Jacketed Concentric Neutral Cable (JCN)

The 3M Cable Grounding Kits 2252 and 2253 provide a simple, reliable and secure method for grounding and resealing of the jacket of direct buried distribution cables. These kits are designed for use with jacketed concentric neutral (JCN) power cables ranging from 2 to 4/0 AWG, rated through 35 kV. A common kit application is for grounding a primary neutral at least every 1320 feet (1/4 mile) per Rural Utilities Service (RUS) Bulletin 83-1.

Insulating and Sealing Compounds

3M™ Scotchcast™ Insulating and Sealing Compounds are compatible with most cable insulations and jackets and accommodate many splices, including odd-shaped connectors. These compounds feature a high degree of mechanical strength and provide moisture resistance for above ground and buried applications.

Specifications for 3M™ Scotchcast Insulating and Sealing Compounds

Mounting Brackets

3M™ Mounting Brackets MB and MBS Series

The 3M Mounting Brackets MB and MBS Series have been designed to mount 3M molded rubber terminations. These brackets are attached to the cable just below the termination. This provides a tongue

that can then be attached to an MB-1 mounting bracket or to any other support. The 3M Brackets MB Series are made from galvanized steel. The 3M Brackets MBS Series are made from stainless steel to provide additional corrosion protection in highly contaminated environments.

3M™ Cross-Arm Mounting Bracket MB-1

3M Cross-Arm Mounting Bracket MB-1 is a cross-arm bracket for use in holding terminated cable. The MB-1 is ideal to use when ordering the MB or MBS termination mounting brackets featured on this page.

| MBS-4** | 49685 | 1.10-1.70" (28-43 mm) | 1/box | 10 each |
| MBS-5** | 49686 | 1.45-1.95" (37-50 mm) | 1/box | 10 each |
| MBS-6** | 49687 | 1.80-2.40" (46-61 mm) | 1/box | 10 each |

*Caution: Use cable O.D., not insulation O.D. for determining the proper size.

**Has double clamps.

3M™ Cold Shrink Corrosion Protection Kit CPT Series

3M Cold Shrink Corrosion Protection Kit CPT Series are designed to provide a quick and easy method for protecting bulkhead termination connectors from the corrosive influences of wet and salt-fog installation environments.

A CPT series assembly is an open-ended tubular rubber sleeve which is factory expanded and assembled onto a removable core. The core is removed after the assembly has been positioned for installation over a bulkhead terminator connector. Mastic strips are provided for sealing between NPT fitting threads and the enclosure in use (junction box, cabinet, panel board, etc.). CPT insulating sleeves are made of an EPDM rubber that contains no chlorides or sulfers. Ten kits accommodate 1/2" through 4" bulkhead connectors.

To extend the useful life of this product in applications where continuous exposure to high levels of ultra-violet radiation are expected, overwrap with Scotch® Super 33+™ Vinyl Electrical Tape or Scotch Silicone Tape 70.

Features:

- Simple installation, requires no tools
- Accommodates a wide range of bulkhead connectors
- No torches or heat required
- Good thermal stability
- Are designed to seal tight, retain its resiliency and pressure after prolonged years of aging and exposure
- Excellent wet electrical properties
- Salt spray resistant. Meets requirements of ASTM B287, in a 5% salt solution with a 3.0-3.1 pH
- Water-resistant. Meets the water seal requirements of ANSI C119.1
- Resists fungus
- Resists acids, alkalies and ozone

3M Cold Shrink Corrosion Protection Kit CPT Series Sizing Guide

| Product Number (NPT Size) | UPC (054007-) | Cable O.D. Minimum in. (mm) | Connector | | Inner Unit Pack | Min. Order Case Qty. |
|------------------------------|------------------|-----------------------------------|--------------------------|--------------------------------------|--------------------|-------------------------|
| | | | Maximum O.D. in. (mm) | Maximum Installed Length in. (mm) | | |
| CPT-1/2 | 43021 | 0.50" (13 mm) | 1.60" (41 mm) | 4.50" (114 mm) | — | 10 |
| CPT-3/4 | 43022 | 0.66" (17 mm) | 1.90" (48 mm) | 4.80" (122 mm) | — | 10 |
| CPT-1 | 43023 | 0.66" (17 mm) | 2.20" (56 mm) | 4.80" (122 mm) | — | 10 |
| CPT-1-1/4 | 43024 | 1.22" (31 mm) | 2.65" (67 mm) | 4.80" (122 mm) | — | 10 |

Preparation and Cleaning

3M™ Scotch-Brite™ Hand Pads 7440 Series

3M Scotch-Brite Pads make the toughest cleaning jobs easier. These pads are so versatile. They are designed to outperform steel wool, wire brushes, sandpaper and other nonwoven surface conditioning products and can be used with water or solvents. They resist tearing, splintering, shredding and loading and will never rust. All Scotch-Brite Pads measure 6" x 9" (152 x 228 mm). Blending Pads are made of a coarse mineral abrasive. General Purpose Pads are reusable—they rinse clean and are constructed of a nylon web. Ultra Fine Pads are highly conformable.

Select the Scotch-Brite Pads for your specific abrasion needs and carry them with you everywhere you work. You can use them on virtually any surface material, including all kinds of metals, plastics, composites, ceramics, porcelain, glass and rubber.

3M™ Cable Cleaning System CC Series

3M Cable Cleaning System CC Series cleans cable insulation, metal, electrical and mechanical parts. It can be used for PCB cleanup and in parts cleaners for degreasing. CC series solvent is also suitable for use on transformers, generators, motors and metal parts of all sorts. It removes surface oils, tars and heavy greases. Use of solvent on carbon-containing semiconductive surfaces such as cable insulation shields is not recommended.

CC series solvent can effectively replace 1.1.1- trichlorethane and other hazardous solvents. Neither CC series solvent nor its ingredients are presently subject to regulations that would inhibit shipping, packaging or applications.

CC-Dry contains three each 4" x 8" (102 x 203 mm) lintless non-woven pads packed in a bag. These are used for drying the common citrus cable cleaner (CC series) off of cable installation when preparing cable. The CC-2-Dry Kit contains a CC-2 Kit and three each dry lintless pads.

3M™ Electrostatic Animal Guard

3M Electrostatic Animal Guard (formerly Guthrie Guard) is a patented electrostatic barrier which attaches to energized electrical insulators/bushings rated up to 35 kV. The guard consists of rugged plastic with metal spokes radiating outward. When an animal touches the spokes, it receives an electric shock similar to those generated by electrified livestock fences. The animal is not injured and power service is not interrupted.

With 3M Electrostatic Animal Guard, electric utilities can minimize customer outages due to animal contact. 3M Electrostatic Animal Guard offers several advantages over other conventional cover-up devices:

- Can be installed while circuit is energized
- Maximum longevity
- Humane

3M Electrostatic Animal Guard Specifications and Ordering Information

| Product Number | UPC (054007-) | Insulator Neck Diameter Range* in. (mm) |
|----------------|---------------|---|
| GG-7525 | 43128 | 0.75-2.5" (19,1-63,7 mm) |
| GG-1525 | 43125 | 1.5-2.5" (38,2-63,7 mm) |
| GG-2545 | 43126 | 2.5-4.5" (63,7-114,7 mm) |
| GG-4565 | 43127 | 4.5-6.5" (114,7-165,7 mm) |

*Insulator neck diameter range is defined as the diameter of the insulator in between the skirts.

Overhead Conductor Animal Guard Cover

3M™ Conductor Covers CCI Series are extruded silicone rubber tubes designed for field installation over bare conductors to insulate them from adjacent phases, grounded equipment, and animal contact. These covers are made with a full-length longitudinal bias cut to allow for easy slip-on installation, and provide an increased creepage distance between the conductor and the outer surface of the cover.

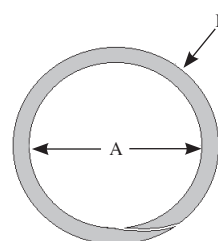

The covers are offered in two thickness sizes for covering both 15 kV and 25 kV rated conductors, and are available in ACSR conductor sizes from 2 AWG to 266 kcmil.

Features:

- Excellent UV, arc and ozone resistance
- Good dielectric strength, conformability and cold weather installation
- Munsel grey color
- Bias cut enables easy field installation without any special tools

Typical Dimensions

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели, кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
