## U.S. Government Rights

The Software is "commercial computer software," as defined by Federal Acquisition Regulation ("FAR") 2.101. Pursuant to FAR 12.212 and 27.405-3 and Department of Defense FAR Supplement ("DFARS") 227.7202, the U.S. government acquires commercial computer software under the same terms by which the software is customarily provided to the public. Accordingly, Keysight provides the Software to U.S. government customers under its standard commercial license, which is embodied in its End User License Agreement (EULA), a copy of which can be found at [www.keysight.com/find/sweula](http://www.keysight.com/find/sweula). The license set forth in the EULA represents the exclusive authority by which the U.S. government may use, modify, distribute, or disclose the Software. The EULA and the license set forth therein, does not require or permit, among other things, that Keysight: (1) Furnish technical information related to commercial computer software or commercial computer software documentation that is not customarily provided to the public; or (2) Relinquish to, or otherwise provide, the government rights in excess of these rights customarily provided to the public to use, modify, reproduce, release, perform, display, or disclose commercial computer software or commercial computer software documentation. No additional government requirements beyond those set forth in the EULA shall apply, except to the extent that those terms, rights, or licenses are explicitly required from all providers of commercial computer software pursuant to the FAR and the DFARS and are set forth specifically in writing elsewhere in the EULA. Keysight shall be under no obligation to update, revise or otherwise modify the Software. With respect to any technical data as defined by FAR 2.101, pursuant to FAR 12.211 and 27.404.2 and DFARS 227.7102, the U.S. government acquires no greater than Limited Rights as defined in FAR 27.401 or DFAR 227.7103-5 (c), as applicable in any technical data.

## Declaration of Conformity

Declarations of Conformity for this product and for other Keysight products may be downloaded from the Web. Go to <http://www.keysight.com/go/conformity>.

## Regulatory Symbols

The CE mark shows that the product complies with all applicable European Directives.

The RCM mark is a registered trademark of the Australian Communications and Media Authority.

ICES/NMB-001

This ISM device complies with Canadian ICES-001.

Cet appareil ISM est conforme à la norme NMB-001 du Canada.

ISM GROUP 1 CLASS A

This is the symbol for an Industrial, Scientific and Medical, Group 1 Class A product.

The CSA mark is a registered trademark of Intertek-etlsemko Inc.

This is the RoHS (Restriction of Hazardous Substances) symbol for electrical and electronic equipment.

South Korean Class A EMC Declaration

This equipment has been conformity assessed for use in business environments. In a residential environment this equipment may cause radio interference. This EMC statement applies to the equipment only for use in business environments.

This symbol indicates separate collection for electrical and electronic equipment mandated under EU law as of August 13, 2005. All electric and electronic equipment are required to be separated from normal waste for disposal (Reference WEEE Directive 2002/96/EC).

## Where to Find More Information

This document provides specification and supplemental characteristic information for the following instruments:

- Keysight N6731B through N6792A Power and Load Modules
- Keysight N6700C-series and N6705C Mainframes

For additional technical details and ordering information for the Keysight N6700 Modular Power System Family, refer to the following:

Document	Description
<i>Keysight N6700 Modular Power System Family: Low-Profile MPS Mainframe for Automated Test Environments</i>	The Keysight N6700 Low-Profile Modular Power System (MPS) is a 1U (rack unit) high, multiple-output programmable DC power supply system that enables test system integrators to optimize performance, power and price to match test needs. <i>Keysight N6705 Modular Power System Family: DC Power Analyzer Mainframe for R&amp;D</i>	The Keysight N6705 DC Power Analyzer represents an entirely new instrument category for R&D engineers. It provides unrivaled productivity gains when sourcing and measuring DC voltage and current into a DUT. Using the Keysight N6705 DC Power Analyzer, R&D engineers can gain insights into the DUT's power consumption in minutes, with all sourcing and measuring functions available from the front panel. ## Power Module Differences

Power Module Differences: Keysight N6700C Modular Power Systems .....	8
Power Module Differences: Keysight N6705C DC Power Analyzers	11
Power Module Option Characteristics .....	14

This chapter provides a brief overview of the basic differences between the Keysight N6700 series DC Power Modules. Note that the basic capabilities of a power module depend not only on its hardware capabilities, but also the on the hardware and firmware capabilities of the mainframe in which it is installed.

In addition to their primary output and measurement capabilities, power modules installed in a Keysight N6705C DC Power Analyzer have expanded capabilities such as front panel scope view, arbitrary waveform generation, and internal and external data logging.

Refer to the Keysight N6700C or N6705C User's Guide for more information about the power module capabilities.

# Power Module Option Characteristics

## Option 760 & 761

Option 761 provides output and sense disconnect relays. Option 760 provides polarity reversal in addition to output and sense disconnect. Note that models N678xA SMU have output and sense disconnect relays built in.

- Option 760 limits the output current to 10 A on Models N6742B and N6773A.

- Option 760 is not available on Models N6741B, N6751A, N6752A, N6761A, N6762A, and N6781A – N6786A

Although the plus and minus rail of the output power mesh are physically disconnected from the output terminals with options 760 and 761, a small AC network is still connected across the plus and minus output terminals (see figure).

## Option 054

Option 054 (High-speed Test Extensions) include output list and digitized measurement capability. This option is separately orderable for Models N673xB, N674xB, N677xA, and N675xA when installed in an N6700 MPS mainframes. All other power modules as well as the N6705 DC Power Analyzer mainframes have output list and digitized measurement capability built in.

Output list:

- Maximum number of steps = 512
- Maximum dwell time in seconds = 262
- Maximum list repetitions = 256 or infinite

Digitized measurement:

- Maximum measurement points = 524,288
- Maximum sample rate = 97.656 kHz

## Option 2UA

Option 2UA is a 200 microampere measurement range available on Models N6761A and N6762A only. It includes Option 761 relay capability.

## Option SMR

Option SMR is seamless measurement autoranging for Model N6784A. It is included with Models N6781A, N6782A, N6785A, and N6786A.

Unless otherwise noted, specifications are warranted over the ambient temperature range of 0 to 40°C after a 30-minute warm-up period. Unless otherwise noted, accuracy is specified as percent of value + fixed offset.

Specifications apply at the output terminals, with each module's sense terminals internally connected to its output terminals (local sensing).

Refer to the Keysight N6700 or N6705 Service Guide for the setup conditions for all performance specifications.

Supplemental characteristics are not warranted but are descriptions of performance determined either by design or by type testing. All supplemental characteristics are typical unless otherwise noted.

## Output Quadrant Characteristic

## Arbitrary Waveform Generator Maximum Bandwidth

### NOTE

The information in this section only applies when the power modules are installed in a Keysight N6705 DC Power Analyzer.

The following tables characterize the maximum bandwidth of the arbitrary waveform generator. The maximum bandwidth is based on a sine wave into a resistive load and applies to any output current. The following definitions apply in the frequency tables:

- V<sub>p-p</sub> = Voltage peak-to-peak
- 3 dB max. = Max. frequency where the voltage drops to 3 dB below its setting
- 6 dB max. = Max. frequency where the voltage drops to 6 dB below its setting
- THD 3 dB = The total harmonic distortion at 3 dB max. frequency
- THD 6 dB = The total harmonic distortion at 6 dB max. frequency

## Keysight N675xA High Performance Power Modules

Performance Specifications.....	24
Supplemental Characteristics .....	25
Autoranging Characteristic.....	27
Output Impedance Graphs .....	27
Arbitrary Waveform Generator Maximum Bandwidth.....	30

Unless otherwise noted, specifications are warranted over the ambient temperature range of 0 to 40°C after a 30-minute warm-up period. Unless otherwise noted, accuracy is specified as percent of value + fixed offset.

Specifications apply at the output terminals, with each module's sense terminals internally connected to its output terminals (local sensing).

Refer to the Keysight N6700 or N6705 Service Guide for the setup conditions for all performance specifications.

Supplemental characteristics are not warranted but are descriptions of performance determined either by design or by type testing. All supplemental characteristics are typical unless otherwise noted.

## Arbitrary Waveform Generator Maximum Bandwidth

### NOTE

The information in this section only applies when the power modules are installed in a Keysight N6705 DC Power Analyzer.

The following tables characterize the maximum bandwidth of the arbitrary waveform generator. The maximum bandwidth is based on a sine wave into a resistive load and applies to any output current. The following definitions apply in the frequency tables:

- V<sub>p-p</sub> = Voltage peak-to-peak
- 3 dB max. = Max. frequency where the voltage drops to 3 dB below its setting
- THD 3 dB = The total harmonic distortion at 3 dB max. frequency
- THD < 1.5% = The frequency below which the THD is less than 1.5%.

<b>Remote Sense Capability:</b>	Outputs can maintain specifications with up to a 1-volt drop per load lead. The load lead drop reduces the maximum available voltage at the load.		
<b>Parallel Operation:</b> <sup>NOTE 4</sup>	Identically rated outputs can be operated directly in parallel in Current Priority mode only. Operating units in series is not available.

<sup>1</sup> Applies to N6781A and N6785A only

<sup>2</sup> For N6785A and N6786A applies with a 0 - 4 V step.

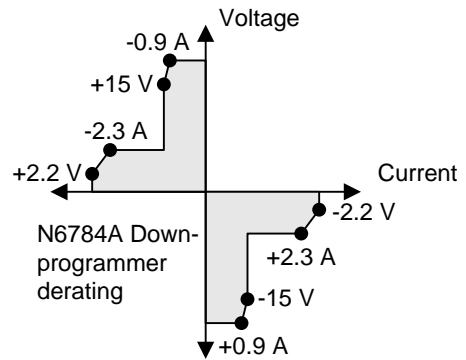

<sup>3</sup> Response time applies from the occurrence of the over-voltage condition to the start of output shutdown.

<sup>4</sup> In CV priority mode, uneven current sharing while paralleling prevents using the lower current measurement ranges and will also cause degradation in transient response performance.

 ■ Sinking power

Note 1. When sinking power, Keysight Model N6784A can operate at the maximum rated output power for only a limited time. When the internal temperature of the unit exceeds its safe limit, the output latches off. A protect clear is required to resume normal operation. The condition is annunciated by the OT status bit. The Downprogrammer derating figure shows the safe limit boundary values.

## Measurement Accuracy and Resolution (with shorter measurement intervals)

The following table shows changes to the short-term measurement accuracy and resolution with various number of power line cycle (NPLC) measurement settings. Changes are due to the A-to-D converter's noise performance. The table's baseline is 1 NPLC with no added noise. To determine the measurement accuracy at shorter averaging intervals, simply add the noise value to the fixed accuracy value in the specification table.

## Keysight N6783A-BAT, N6783A-MFG Application-Specific Power Modules

Performance Specifications.....	54
Supplemental Characteristics .....	55
Output Quadrant Characteristic .....	56

Unless otherwise noted, specifications are warranted over the ambient temperature range of 0 to 40°C after a 30-minute warm-up period. Unless otherwise noted, accuracy is specified as percent of value + fixed offset.

Specifications apply at the output terminals, with each module's sense terminals internally connected to its output terminals (local sensing).

Refer to the Keysight N6700 or N6705 Service Guide for the setup conditions for all performance specifications.

Supplemental characteristics are not warranted but are descriptions of performance determined either by design or by type testing. All supplemental characteristics are typical unless otherwise noted.

<b>Input Characteristic:</b>			
Approximate capacitance		0.7 μF in series with 5 Ω	1.5 μF in series with 2.5 Ω
<b>Reverse Current Capability:</b>	With the input off, load modules can tolerate reverse currents up the rated current input of the module.		
<b>Remote Sense Capability:</b>	Inputs can maintain specifications with up to a 1-volt drop per load lead. The load lead drop reduces the maximum available voltage at the load.		
<b>Series and Parallel Operation:</b>	Identically rated load modules <b>can</b> be operated directly in parallel. Load modules <b>cannot</b> be used in series with other load modules or any other N67xx modules.

## Supplemental Characteristics

	N6700B, N6701A, N6702A N6700C, N6701C, N6702C	N6705B, N6705C
<b>Maximum Power Available for Modules:</b>		
Values represent combined power rating of all modules installed per mainframe.	400 W (for N6700B/C mainframes) 600 W (for N6701A/C mainframes) 1200 W (for N6702A/C mainframes)	600 W
<b>Front Panel Output Terminals:</b>		
Maximum current rating	N/A	20 A
<b>BNC Trigger Connectors:</b>		
I/O	N/A	Digital TTL level compatible
Maximum voltage	N/A	5 V
Maximum input pulse (N6705C only):	N/A	>6 ns, pos-going; >90 ns, neg-going
Output Pulse (N6705C only):	N/A	10 ms, negative going
<b>USB Current Ratings:</b>		
Front panel USB connector	N/A	200 mA
Rear panel USB connector	N/A	300 mA
<b>Data Storage:</b>		
Internal flash memory	8 Mbyte	4 Gbyte
<b>Protection Response Characteristic:</b>		
INH input	5 $\mu$ s from receipt of inhibit to start of shutdown	
Fault on coupled outputs	< 10 $\mu$ s from receipt of fault to start of shutdown	
<b>Command Processing Time:</b>		
	$\leq$ 1 ms from receipt of command to start of output change	
<b>Digital Port Characteristics:</b>		
Maximum voltage ratings	+16.5 VDC/- 5 VDC between pins (pin 8 is internally connected to chassis ground).	
Pins 1 and 2 as FLT output	Maximum low-level output voltage = 0.5 V @ 4 mA Maximum low-level sink current = 4 mA Typical high-level leakage current = 1 mA @ 16.5 VDC	
Pins 1 - 7 as digital/trigger outputs (pin 8 = common)	Maximum low-level output voltage = 0.5 V @ 4 mA; 1 V @ 50 mA; 1.75 V @ 100 mA Maximum low-level sink current = 100 mA Typical high-level leakage current = 0.8 mA @ 16.5 VDC	
Pins 1 - 7 as digital/trigger inputs and pin 3 as INH input (pin 8 = common)	Maximum low-level input voltage = 0.8 V Minimum high-level input voltage = 2 V Typical low-level current = 2 mA @ 0 V (internal 2.2k pull-up) Typical high-level leakage current = 0.12 mA @ 16.5 VDC	
<b>Interface Capabilities:</b>		
GPIB	SCPI - 1993, IEEE 488.2 compliant interface	
LXI Compliance	LXI Core 2011 - applies to N6700C, N6701C, N6702C, and N6705C LXI units Class C - applies to N6700B, N6701A, N6702A, and N6705B LXI units	
USB 2.0	Requires Keysight IO Library version M.01.01 or 14.0 and up	
10/100/1000 LAN	Requires Keysight IO Library version L.01.01 or 14.0 and up	
Built-in Web server	Requires a web browser	

## Supplemental Characteristics (continued)

	N6700B, N6701A, N6702A N6700C, N6701C, N6702C	N6705B, N6705C
<b>Regulatory Compliance:</b>		
EMC	Complies with European EMC Directive for test and measurement products. IEC/EN 61326-1; CISPR 11, Group 1, class A; AS/NZS CISPR 11; ICES/NMB-001 Complies with Australian standard and carries the RCM mark. This ISM device complies with Canadian ICES-001. Cet appareil ISM est conforme à la norme NMB-001 du Canada.	
Safety	Complies with European Low Voltage Directive and carries the CE-marking. Conforms to US and Canadian safety standards.	
<b>Environmental Conditions</b>		
Operating environment	Indoor use, installation category II (for AC input), pollution degree 2	
Temperature range	0°C to 55°C (output current is derated 1% per °C above 40°C ambient temperature)	
Relative humidity	Up to 95%	
Altitude	Up to 2000 meters	
Storage temperature	-30°C to 70°C	
<b>Acoustic Noise Declaration:</b>		
This statement is provided to comply with the requirements of the German Sound Emission Directive, from 18 January 1991.	Sound Pressure Lp, <70 dB(A), At Operator Position, Normal Operation, According to EN 27779 (Type Test). Schalldruckpegel Lp <70 dB(A), Am Arbeitsplatz, Normaler Betrieb, Nach EN 27779 (Typprüfung).	
<b>Output Terminal Isolation:</b>		
Maximum rating	No output terminal may be more than ±240 VDC from any other terminal or chassis ground.	
<b>N6781A/N6785A Note</b>	When using the AUX measurement input terminals on Models N6781A/N6785A, no output or input terminal may be more than ±60 VDC from any other terminal and chassis ground.	
<b>AC Input:</b>		
Input Ratings	~ 100 VAC – 240 VAC; 50/60/400Hz	~ 100 VAC – 240 VAC; 50/60/400Hz
Input Ranges	86–264 VAC; 47–63Hz; 380–420 Hz	86–264 VAC; 47–63Hz; 380–420 Hz
Power Consumption	1000 VA (N6700B/C) 1440 VA (N6701A/C) 1440 VA (N6702A/C @ < 180 VAC input) 2200 VA (N6702A/C @ > 180 VAC input)	1440 VA
Power Factor (Note 1)	0.99 @ nominal input and rated power	0.99 @ nominal input and rated power
Fuse	Internal fuse - not customer accessible.	
<b>N6702A/C Note</b>	AC mains circuits rated at 100–180 VAC <b>cannot</b> supply enough current to power the N6702 mainframe when operated at its full rated power. When connected to a 100–180 VAC mains, internal circuits will limit the power to modules to 600 W maximum.	
<b>Net Weight: (typical)</b>		
Mainframe with 4 modules	N6700B/C 12.73 kg / 28 lbs N6701A/C 11.82 kg / 26 lbs N6702A/C 14.09 kg / 31 lbs	16 kg / 35 lbs
Single-wide module	1.23 kg / 2.71 lbs	1.23 kg / 2.71 lbs
Double-wide module	2.1 kg / 4.63 lbs	2.1 kg / 4.63 lbs
<b>Dimensions:</b>		
Refer to the outline diagrams on the following page.		

Note 1: Under full load at 400 Hz, power factor drops from 0.99 @ 120 VAC to as low as 0.76 @ 265 VAC and degrades further with no load

Specifications Guide

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

## JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели,  
кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
