

# MOD5441X

## Single & Dual Port Ethernet Core Module

MOD54415 (100 Version with RJ-45 | 200 Version with 10-pin header)

MOD54417 (100 Version with 2 X RJ-45 | 200 Version with 20-pin header)

## DATASHEET

### Key Points

- Use as a high-performance single board computer or add Ethernet connectivity to a new or existing design
- Industrial temperature range (-40°C to 85°C)
- MOD54417 can function as a switch or as two independent ports, each with its own MAC address
- Customize with development kit

### Device Connectivity

- Up to two 10/100Mbps Ethernet
- 8 UARTs, 4 I<sup>2</sup>C, 2 CAN, 3 SPI, and 1-Wire® support
- SD/MMC and MicroSD flash card ready
- 42 digital I/Os and 2 additional digital inputs
- 16-bit address and data bus with 5 chip selects
- Eight 12-bit analog-to-digital converters (ADC)
- Two 12-bit digital-to-analog converters (DAC)
- Five pulse width modulators (PWM)

### Performance and memory

- 32-bit 250 MHz Processor
- 64MB DDR2 RAM and 32MB Flash

### Companion development kit

*The following is available with the development kit:*

- Customize any aspect of operation including web pages, data filtering, or custom network applications
- Development software: NB Eclipse IDE, Graphical debugger, deployment tools, and examples
- Communication software: TCP/IP stack, HTTP web server, FTP, E-mail, and flash file system
- System software: uC/OS RTOS, ANSI C/C++ compiler and linker

*The following optional software modules are not included with kit and are sold separately:*

- Embedded SSL & SSH Security Suite (Module License Version)
- SNMP

MOD54415-100IR

100 Version  
with RJ-45

MOD54415-200IR

200 Version  
with 10-Pin Header

MOD54417-100IR

100 Version  
with 2 X RJ-45

MOD54417-200IR

200 Version  
with 20-pin Header

## Specifications

### Processor and Memory

32-bit Freescale ColdFire 54415 or 54417 running at 250MHz with 64MB DDR2 RAM and 32MB Flash

### Network Interface

10/100 BaseT with RJ-45 connector (MOD54415-100ir Version)

10-pin header (MOD54415-200ir Version)

Two 10/100 BaseT with RJ-45 connector (MOD54417-100ir Version)

Two 20-pin header (MOD54417-200ir Version)

### Data I/O Interface (J1)

- Up to 8 UARTs
- Up to 4 I<sup>2</sup>C
- Up to 2 CAN 2.0b controllers
- Up to 3 SPI
- Up to 42 digital I/O + 2 digital inputs
- Up to eight 12-bit analog-to-digital converters (ADC)
- Up to two 12-bit digital-to-analog converters (DAC)
- Up to 5 pulse width modulators (PWM)
- Up to 4 external timer in or outputs
- MicroSD flash card ready
- 1-Wire® interface

### Flash Card Support

FAT32 support for SD Cards up to 32GB (requires exclusive use of one SPI port).

### Serial Configurations

The UARTs can be configured in the following way:

- 8 TTL ports
- Add external level shifter for RS-232
- Add external level shifter for RS-422/485 (up to two ports)

Note: UART 0/1 also provides RTS/CTS hardware handshaking signals.

### LEDs

Link and Speed (100 Version only, on RJ-45)

### Physical Characteristics

Dimensions (inches): 2.95" x 2.00"

Weight: 1 oz.

Mounting Holes: 3 x 0.125" dia.

### Power

MOD54415 module

3.3VDC @ 410 mA with Ethernet | 3.3VDC @ 360 mA without Ethernet

MOD54415 module mounted on MOD-DEV-70

3.3VDC @ 450 mA with Ethernet | 3.3VDC @ 400 mA without Ethernet

MOD54417 module

3.3VDC @ 520mA with Ethernet | 3.3VDC @ 450 mA without Ethernet

MOD54417 module mounted on MOD-DEV-70

3.3VDC @ 530 mA with Ethernet | 3.3VDC @ 520 mA without Ethernet

## **Environmental Operating Temperature**

-40° to 85° C

## **RoHS Compliance**

The Restriction of Hazardous Substances guidelines ensure that electronics are manufactured with fewer environment harming materials.

## **Part Numbers**

### **MOD54415 Ethernet Core Module (100 Version, with RJ-45)**

Part Number: MOD54415-100IR

### **MOD54415 Ethernet Core Module (200 Version, with 10-pin header)**

Part Number: MOD54415-200IR

### **MOD54415 LC Development Kit**

Part Number: NNDK-MOD54415LC-KIT

Kit includes all the hardware and software you need to customize the included platform hardware. See NetBurner Store product page for package contents.

### **MOD54417 Ethernet Core Module (100 Version, with 2 X RJ-45)**

Part Number: MOD54417-100IR

### **MOD54417 Ethernet Core Module (200 Version, with 20-pin header)**

Part Number: MOD54417-200IR

### **MOD54417 LC Development Kit**

Part Number: NNDK-MOD54417LC-KIT

Kit includes all the hardware and software you need to customize the included platform hardware. See NetBurner Store product page for package contents.

### **Embedded SSL & SSH Security Suite (Module License Version)**

Part Number: NBLIC-SSL-MODULE

Only required if you are using a development kit.

### **SNMP V1 (Module License Version)**

Part Number: NBLIC-SNMP

Available as an option if you are using a development kit.

## **Ordering Information**

E-mail: [sales@netburner.com](mailto:sales@netburner.com)

# MOD5441X

## Pinout and Signal Description

The 200 version board has a 10-pin header instead of an RJ-45 jack. This header enables you to relocate the jack to another location or to add a different jack with power over ethernet (PoE) capabilities to your module. Table 1 provides descriptions of pin function of the 10-pin header.

Table 1: Pinout and Signal Descriptions for JP1 & JP2 Header <sup>(1)</sup>

| Pin | Signal           | Description   |
|-----|------------------|---------------|
| 1   | TX-              | Transmit -    |
| 2   | TX+              | Transmit +    |
| 3   | VCC <sup>1</sup> | 3.3V          |
| 4   | RX+              | Recieve +     |
| 5   | RX-              | Recieve -     |
| 6   | VCC <sup>1</sup> | 3.3V          |
| 7   | GND              | Ground        |
| 8   | N/C              | Not Connected |
| 9   | LED              | Link LED      |
| 10  | LED              | Speed LED     |

Note:

1. Ethernet magnetics center tap voltage provided by NetBurner device

## Alternate Monitor Boot Jumper

The boot jumper is the unpopulated header 'TP1'. It can be used to recover from a software or configuration fault.

# MOD5441X

The module has two dual in-line 50 pin headers which enable you to connect to one of our standard NetBurner Carrier Boards, or a board you create on your own. Table 1 provides descriptions of pin function of the module header.

Table 2: Pinout and Signal Descriptions for J1 Connector <sup>(1)</sup>

| J1 Connector |         |                    |                    |                                  |                     |                                                                                  |             |
|--------------|---------|--------------------|--------------------|----------------------------------|---------------------|----------------------------------------------------------------------------------|-------------|
| Pin          | CPU Pin | Function 1         | Function 2         | Function 3                       | General Purpose I/O | Description                                                                      | Max Voltage |
| 1            |         | GND                |                    |                                  |                     | Ground                                                                           | -           |
| 2            |         | GND                |                    |                                  |                     | Ground                                                                           | -           |
| 3            | E16     | VSTBY              |                    |                                  |                     | Input power 3.3 VDC                                                              | 3.3VDC      |
| 4            | G2      | R $\overline{W}$   |                    |                                  |                     | Data Bus - Read / NOT Write                                                      | 3.3VDC      |

| 16           | A6      | D20                |                    |                                  |                     | Data Bus - Data 20                                                               | 3.3VDC      |
| 17           | B6      | D19                |                    |                                  |                     | Data Bus - Data 19                                                               | 3.3VDC      |
| 18           | A7      | D22                |                    |                                  |                     | Data Bus - Data 22                                                               | 3.3VDC      |
| 19           | D6      | D21                |                    |                                  |                     | Data Bus - Data 21                                                               | 3.3VDC      |
| 20           | B7      | D24                |                    |                                  |                     | Data Bus - Data 24                                                               | 3.3VDC      |

Note:

- Active low signals, such as  $\overline{\text{RESET}}$ , are indicated with an overbar.
- The TIP signal is the logical AND of \*CS1, \*CS4 and \*CS5. TIP can be used to control an external data bus buffer for the data bus signals. An example circuit design can be found on the Module Development Board schematic. An external data bus buffer is recommended for any designs that use data bus signals D16-D31.

| 48                       | F12     | IRQ7            |            |              | PC6                 | External Interrupt 7                                                                                  | 3.3VDC      |
| 49                       |         | GND             |            |              |                     | Ground                                                                                                | -           |
| 50                       |         | VCC3V           |            |              |                     | Input power 3.3 VDC                                                                                   | 3.3VDC      |

Note:

1. Active low signals, such as RESET, are indicated with an overbar.
2. Each UART can be clocked from an internal or external source. For external clocks, each UARTn can be clocked by the corresponding DTn\_IN vnput pin.
3. If using I2C, the module must add pull-up resistors to SDA/SCL.

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

## JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели,  
кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
