# About Ledlink

**Ledlink Optics, Inc.** was founded in April 2008, specializing in optical, structure and precise manufacturing from a professional background. We've successfully developed all kinds of optical lenses with variety of angles, beam patterns and blend lights.

Our mission is to assist customers achieve the full and complete use of LED light source applications, and reaching the highest performance as well as changing the beam patterns and angles in order to adapt to different requirements of applications.

Ledlink Optics, Inc. provides the total solutions of secondary optics to enhance the lighting value of LED, and leading our customers on the cutting edge of lighting industry.

# Secondary Optical Lens

Generally speaking, LED need to proceed secondary optics design prior to become lamp fixture, LED package is first optics design and secondary optics design is that we change the optical character from the light of first optics through secondary optical change.

Name	Symbol	Unit	Description
Luminous Flux	$\Phi$	Lm(Lumen)	Light source shot in total amount per second
Illuminance	E	lm/m <sup>2</sup> (Lux)	<p>Illuminance means in one lighted area, the density of the luminous flux on a surface, per unit area.(Illuminance is inverse ratio to the square of distance from one illuminant. And it expresses the brightness of one place.)</p> $\text{Illuminance}(E) = \frac{\text{Luminous Flux}(\Phi)}{\text{Area}(A)}$
Luminous Intensity	I	Cd(Candela)	<p>The Luminous Flux in certain direction of light source of solid angle(<math>\Omega</math>)</p> $\text{Luminous Intensity}(I) = \frac{\text{Luminous Flux}(\Phi)}{\text{Solid angle}(\Omega)}$
Luminance	L	cd/m <sup>2</sup>	<p>Luminance means the luminous intensity(I) per unit of one illuminated area which light radiates or passes through in a given direction.</p> $\text{Luminance}(L) = \frac{\text{Luminous Intensity}(I)}{\text{Area}(A)}$

# Definition of Beam Angle

Half angle: 50% light intensity (FWHM)  
 Full angle: 10% light intensity  
 For Curve A, B, and C → half angle 30°  
 Full angle : Curve A = 80°  
 Curve B = 60°  
 Curve C = 50°

Full angle definition is more accurate as it allows the luminaries designer to arrange/ develop their LED lamp.

# Street Lighting

## LED requirements:

- LED brand/ type
- MCPCB layout (arrangement)
- MCPCB 2D drawing; LED position is critical

## Mechanical requirements:

- Dimension limitations:
- Mounting method: Screw/ Thermal mount/ Glue
- Waterproof: Rubber ring height/ Silicon

## Installation conditions:

- Pole Arrangement
- Pole Height (H)
- Pole Distance (D)
- Pole tilt angle ( $\theta$ )
- Pole arm length (L)
- Road Width: (W)
- Optical requirements

## Optical requirements

- Uniformity
- Min lux
- Avg lux
- Cd / m<sup>2</sup>(U<sub>o</sub> / U<sub>I</sub> / T<sub>I</sub>)
- Type 1~Type 5

The asymmetry street lighting lens designed by Ledlink Optics Inc. is aiming to focus light and make the asymmetric beam pattern. Because of the lens, light can be focused and used upon customer's demand. The optics lens reduce spill light from arcade and redirect light to the street resulting in increased several times of luminance intensity and illumination brightness. Thus, a secondary optical lens is a way to save energy cost and LED requested amount, as well as it can maximize LED performance.

# Product Nomenclature

**L L 01 CR - AO x x L - M x**

- ▶ **Lighting source confirmation:**  
LED manufacturer/ Type of LED/ LED spec/ LED sample is required  
The LED position layout is needed
- ▶ **Optical requirements confirmation:**  
Required beam angle (in full view)/ if in half view, the light intensity curve is needed  
Other luminance demands, such as uniformity, certain level of lux in a specific area from a certain distance
- ▶ **Mechanical requirements confirmation:**  
The limitation of dimensions is necessary
- ▶ **Installed environment/ application/ other specific requirements, such as material:**

Street Lens

Color Mixing  
Lens

Elliptical-Beam  
Lens

Fresnel Lens

COB Lens

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «**JONHON**», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «**FORSTAR**».

## JONHON

«**JONHON**» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«**FORSTAR**» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели,  
кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
