

# Explorer 16/32 Development Board

## A Perfect Platform for Discovering the Full Capabilities of PIC® MCUs and dsPIC® DSCs

### Summary

The Explorer 16/32 Development Board is a flexible development system for Microchip's 16-bit and 32-bit PIC® microcontrollers. It is a refreshed and cost-effective version of Explorer 16 Development Board (DM240001) with several new features. This board supports devices from the PIC24 and PIC32 MCU families and dsPIC® DSC families as Processor Plug-In Modules (PIMs), allowing you to develop various applications quickly.

The Explorer 16/32 Development Board provides a perfect platform to prototype applications using several function expansion capabilities through its wide ecosystem support. The board can be a starting point for all your embedded projects by developing a rapid proof of concept before migrating to actual design.

### Key Features

- 100-pin plug-in module socket
- Integrated PICKit™-On-Board (PKOB) Programmer/Debugger
- MPLAB® ICD3 and MPLAB REAL ICE™ In-Circuit Debugger/Programmer support for advanced operations
- Multiple power options
  - USB power for convenience
  - 9–15V DC supply for higher power requirement
- Communication
  - USB host/device support
  - Serial (UART/I²C) communication via on-board USB-serial bridge
- Wide ecosystem with mikroBUS™, PICtail™ Plus and Pmod™ interfaces
- Alphanumeric LCD, push buttons, LEDs, potentiometer, temperature sensor, debug connectors and more

### What's New in the Explorer 16/32 Development Board

	Classic Explorer 16 Development Board	New Explorer 16/32 Development Board
Device Families Supported Via PIMs	PIC24, dsPIC® DSC, PIC32	PIC24, dsPIC DSC, PIC32
9–15V DC Power Supply Support	✓	✓
PICKit™ 3, MPLAB® ICD3 and MPLAB REAL ICE™ In-Circuit Programmer/Debugger Support	✓	✓
LCD, User LEDs, Push Buttons, Potentiometer, Temperature Sensor	✓	✓
PICtail™ Plus Daughter Cards	✓	✓ (Using optional PICtail Plus Expansion Board)
USB Power Support	–	✓
Integrated PICKit™-On-Board Programmer/Debugger	–	✓
On-Board USB for Application	–	✓
On-Board USB to Serial Communication Bridge	–	✓
Current Measurement Capability	–	✓
mikroBUS™ Interface and Pmod™ Footprint	–	✓

### Backwards Compatibility

The new Explorer 16/32 Development Board is backwards compatible with the classic Explorer 16 Development Board in using existing codes, libraries, prototypes, PIMs and all the PICtail Plus daughter cards interfaced via the side PICtail Plus connector. Reuse the PICtail Plus daughter cards interfaced via the vertical PICtail Plus connector by using an additional PICtail Plus Expansion Board.

**MICROCHIP**

## Wide Ecosystem for All Your Application Needs

The Explorer 16/32 Development Board provides a complete platform for all your embedded design. Designed to expand its capabilities as your needs grow, it can be operated as an all-in-one development platform or it can be customized to suit your specific needs. This can be achieved with the board's wide ecosystem support that offer a variety of options for function expansion.

### Plug-In Modules

Choose PIMs supporting over 45 families of 16-bit MCUs and DSCs and 32-bit MCUs to explore the innovative features of the device you are interested in. For more information, please visit [www.microchip.com/PIMs](http://www.microchip.com/PIMs).

### Add-On Boards via mikroBUS Interface

Add new functionality using MikroElektronika's mikroBus connector. Interface with hundreds of plug-and-play Click™ boards supporting a range of functions. Explore the options at [www.mikroe.com/click](http://www.mikroe.com/click) and [www.mikroe.com/mikrobus](http://www.mikroe.com/mikrobus).

## Get Started with the Explorer 16/32 Development Platform

### Explorer 16/32 Development Board with PIC24FJ1024GB610 PIM (DM240001-3)

This kit provides everything you need to get started with evaluation and prototype right away. The kit contains:

- Explorer 16/32 Development Board
- PIC24FJ1024GB610 PIM
  - 16-bit PIC24F superset device with USB interface and 1 MB Flash and 32 KB RAM
- Two USB cables (Type-C™ and micro-B cables)

For more information, visit [www.microchip.com/Explorer1632](http://www.microchip.com/Explorer1632).

### PICtail Plus Expansion Board (AC240100)

Connect vertical PICtail Plus Daughter Cards to the Explorer 16/32 Development Board using this PICtail Plus Expansion Board. This board also features a prototyping area and two mikroBUS interfaces. For more information, visit [www.microchip.com/PICtailPlusExpansion](http://www.microchip.com/PICtailPlusExpansion).

### PICtail Plus Daughter Cards

Microchip offers a range of complementary products using over 50 PICtail Plus Daughter Cards directly via the side PICtail Plus connector or the vertical PICtail Plus Connector with the additional PICtail Plus Expansion Board (AC240100). Add new functionality such as communication, graphics, audio, biometric sensor, machine-to-machine and more to your prototype. For more information, please visit [www.microchip.com/PICtailPlusCards](http://www.microchip.com/PICtailPlusCards).

### Extensive Libraries and Code Examples

The Explorer 16/32 Development Board is supported by an extensive array of software libraries and code examples for quickly starting your design.

### Explorer 16/32 Development Board (DM240001-2)

Get the development board and choose from a wide variety of PIMs available at [www.microchip.com/PIMs](http://www.microchip.com/PIMs). This option also serves well when migrating from the classic Explorer 16 Development Board, while the

necessary accessories like PIMs and cables are already available. For more information this development board, visit [www.microchip.com/Explorer1632Board](http://www.microchip.com/Explorer1632Board).

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

## JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели, кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
