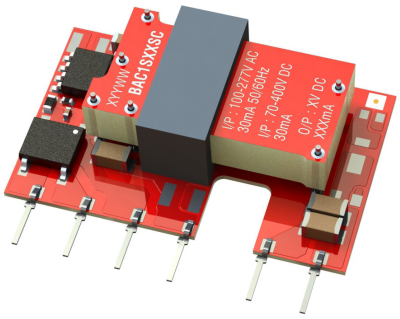
Murata Power Solutions

BAC1 Series

Isolated 1W Regulated Single Output AC/DC Converters



FEATURES

- UL60950-1 recognised
- EN60950-1 certified[2]
- EN/IEC61558-1 recognition pending
- ANSI/AAMI ES60601-1, 1 MOPP/2 MOOP's recognition pending
- Wide input voltage range 85-305VAC/ 70-400VDC
- Operating temperature range –40°C to 85°C
- 4kVAC isolation 'Hi Pot Test'
- 5V, 12V & 24V single regulated outputs
- Short circuit protection
- No optocoupler
- Low standby power

PRODUCT OVERVIEW

The BAC1 series is the first series release from the BAC family of board mount AC/DC converters. The BAC1 series operates over the wide industrial temperature range of -40°C to +85°C, supporting operation in still air for the most demanding environments. Models are capable of operation to 85°C, and operate from -40°C. The BAC1 has ultra low standby power consumption for demanding energy and cost saving applications.

SELECTION GUIDE

Order Code	Output Power	Output Voltage	Output Current	Ripple & Noise				Efficiency						Isolation Capacitance	MTTF[1]	
				115V & 230V		277V		115V		230V		277V				
	W	V	A	Typ.	Max.	Typ.	Max.	Min.	Typ.	Min.	Typ.	Min.	Typ.	pF	MIL 217	Telcordia
				mVp-p				%							kHrs	
BAC1S05SC	1	5	0.2	50	120	50	120	70	74	69	73	67	71	11	1613	38213
BAC1S12SC	1	12	0.083	60	120	60	130	70	74	69	73	68	72	11	2038	44328
BAC1S24SC	1	24	0.042	85	120	100	150	68	73	67	71	64	69	11	1816	40463

INPUT CHARACTERISTICS

Parameter	Conditions		Min.	Typ.	Max.	Units
Voltage range	All input types		85	115/230/277	305	VAC
	All input types		70		400	VDC
Input frequency			47	50/60	63	Hz
Switching frequency	Nominal Vin = 115VAC			50		kHz
	Nominal Vin = 115VAC	24Vin		35		
	Nominal Vin = 230VAC/277VAC			40		
	Nominal Vin = 230VAC/277VAC	24Vin		25		
Input current	Nominal Vin = 115VAC			25		mA
	Nominal Vin = 230VAC			17		
	Nominal Vin = 277VAC			16		
Inrush current	Nominal Vin = 115VAC			6		A
	Nominal Vin = 230VAC & 277VAC			9		
Input leakage current	230VAC			1		µA
Stand by power	BAC1S05SC	115VAC		20		mW
		230VAC		61		
		277VAC		85		
	BAC1S12SC	115VAC		58		
		230VAC		68		
		277VAC		92		
	BAC1S24SC	115VAC		26		
		230VAC		81		
		277VAC		117		

ISOLATION CHARACTERISTICS

Parameter	Conditions	Min.	Typ.	Max.	Units
Isolation test voltage	Production tested for 1 seconds	4000			VAC
	Qualifiifcation tested for 1 minute	4000			
Resistance	Viso = 1000VDC	100			MΩ

1. Calculated using MIL-HDBK-217F FN2 and Telcordia SR-332 calculation model at T_A=25°C with nominal input voltage at full load.
2. Pending for 277VAC.

All specifications typical at T_A=25°C, nominal input voltage, rated output current and recommended components unless otherwise specified.

OUTPUT CHARACTERISTICS

Parameter	Conditions		Min.	Typ.	Max.	Units
Minimum load			5			%
Initial voltage accuracy	5V output types				±5	%
	All other output types				±4	
Line regulation	Low line to high line	5V output types		±0.3	±1	%
		All other output types		±0.1	±1	
Load Regulation	5% total load to 100% total load			±0.2	±1.5	%
Total regulation	Includes line, load, temperature and drift				±5	%
Temperature coefficient					0.05	%/°C
Transient Response	Peak deviation - Single Output (50-75% & 75-50% swing)	BAC1S05SC			±4	%Vout
		BAC1S12SC			±3	
		BAC1S24SC			±2	
	Settling time (within 1% Vout Nom.)	24V output type		8		ms
		All other output types		6		
Current limit inception	Auto-recovery	115VAC & 230VAC	150		280	%
		277VAC	150		310	
Hold up time	From power fail	115VAC		50		ms
		230VAC		240		
		277VAC		380		

TEMPERATURE CHARACTERISTICS

Parameter	Conditions	Min.	Typ.	Max.	Units
Operation	Sealed box with no air flow	-40		85	°C
Storage		-40		125	
Product temperature rise above ambient				16	

ABSOLUTE MAXIMUM RATINGS

Short-circuit protection	Continuous
Input voltage Vin	310VAC
Wave solder	Wave Solder profile not to exceed the profile recommended in IEC 61760-1 Section 6.1.3. Please refer to application notes for further information.
Lead temperature 1.0mm from case for 7 seconds (to JEDEC JESD22-B106 ISS E)	270°C

TECHNICAL NOTES

ISOLATION VOLTAGE

'Hi Pot Test', 'Flash Tested', 'Withstand Voltage', 'Proof Voltage', 'Dielectric Withstand Voltage' & 'Isolation Test Voltage' are all terms that relate to the same thing, a test voltage, applied for a specified time, across a component designed to provide electrical isolation, to verify the integrity of that isolation.

Murata Power Solutions BAC1 series of AC-DC converters are all 100% production tested at their stated isolation voltage. This is 4kVAC for 3 seconds.

A question commonly asked is, "What is the continuous voltage that can be applied across the part in normal operation?"

The BAC1 series has been recognised by Underwriters Laboratory to 277VAC for Reinforced Insulation.

The BAC1 series has been certified by Demko to 240VAC for Reinforced Insulation.

REPEATED HIGH-VOLTAGE ISOLATION TESTING

It is well known that repeated high-voltage isolation testing of a barrier component can actually degrade isolation capability, to a lesser or greater degree depending on materials, construction and environment. We therefore strongly advise against repeated high voltage isolation testing, but if it is absolutely required, that the voltage be reduced by 20% from specified test voltage.

SAFETY APPROVAL

ANSI/AAMI ES60601-1

The BAC1 series is pending recognition by Underwriters Laboratory (UL) to ANSI/AAMI ES60601-1 and provides 2 MOOP (Means Of Operator Protection) and 1 MOPP (means of patient protection) based upon a working voltage of 277VAC max., between Primary and Secondary. File number E202895 applies.

EN60950-1

The BAC1 series has been certified by Demko (D) to EN60950 for reinforced insulation to a working voltage of 240VAC, pending for 277VAC. File number D-07177 applies.

UL60950-1

The BAC1 series has been recognised by Underwriters Laboratory (UL) to UL60950 for reinforced insulation to a working voltage of 277VAC. File number E151252 applies.

Creepage 8.3mm and clearance 6.6mm
Working altitude OVC II 5000m
Working altitude OVC III 2000m

EN/IEC61558-1

The BAC1 series is pending recognition by TUV SUD to EN/IEC61558-1.

FUSING

As stated in the application notes, to meet datasheet specifications it is required that a 1W 10Ω fusible resistor is fitted.

RoHS COMPLIANCE INFORMATION

RoHS COMPLIANT

This series is compatible with RoHS soldering systems with a peak wave solder temperature of 260ºC for 10 seconds based on IEC 61760-1 The pin termination finish on this product series is Hot Dipped over Matte Tin with Nickel Preplate. The series is backward compatible with Sn/Pb soldering systems. For further information, please visit www.murata-ps.com/rohs

ENVIRONMENTAL VALIDATION TESTING

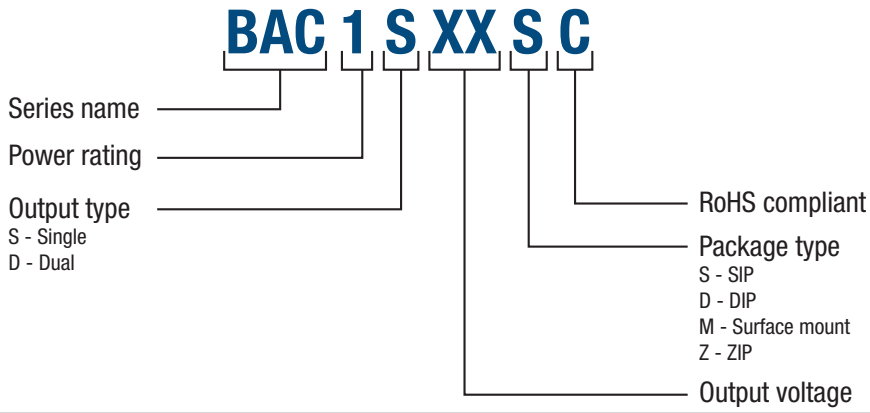
The following tests have been conducted on this product series, please contact Murata if further information about the tests is required.

Test	Standard	Condition
Temperature Cycling	JEDEC JESD22-A104E	200 cycles. -40°C to 105°C, 15 minutes hold at each extreme.
HAST (Unbiased)	JEDEC JESD22-A118B	96Hrs +2/-0Hrs at 130°C ± 2°C, 85% ± 5% R.H.
Storage Life	JEDEC JESD22-A103-E, Condition A	125°C +10/-0°C for ≥1000 hours
Vibration	BS EN 61373 with respect to BS EN 60068-2-64 2008, Test Fh Category 1 Class B	5 – 150Hz. Level at each axis – Vertical, Traverse and Longitudinal: 5.72m/s^2 rms. 5 hours in each axis. Crest factor: 3 Sigma. Device is secured via pins/leads.
Shock	BS EN 61373: 2010, Category 1 Class B	Test is 30ms duration, 3 shocks in each sense of 3 mutually perpendicular axes (18 shocks total). Level at each axis as follows: Vertical, Traverse and Longitudinal: 50m/s^2. Device is secured via pins/leads.
Solderability	IPC/ECA J-STD-002E, Test A1	Parts are baked for 4 hours at a temperature off 155°C, within 72 hours they are dipped in flux for 10 seconds. Followed by dipping the parts in a solder pot at 255°C ±5°C for 5 seconds (96SC tin/silver/copper)
Solvent cleaning	Resistance to cleaning agents.	Solvent – Novec 71IPA & Topklean EL-20A. Pulsed ultrasonic immersion 45°C- 65°C
Solvent resistance	MIL-STD-883K, Method 2015.14	The parts and the bristle portion of the brush are immersed in Isopropanol for a minimum of 1 minute. The parts are brushed 3 times, after the third time the parts are blown dry and inspected.
Solder Heat	JEDEC JESD22-B106E	The test sample is subjected to a molten solder bath at 270 ±5°C for 7 +2/-0 seconds (96SC tin/silver/copper). The leads are dipped in the solder bath to within 1mm of the device body.
Solder Heat (Hand)	MIL-STD 202H, Method 210, Condition A	The soldering iron is heated to 350°C ± 10°C and applied to the terminations for a duration of 4 to 5 seconds.
Lead Integrity (Adhesion)	MIL-STD 883K, Method 2025.4	Leads are bent through 90º until a fracture occurs.
Lead Integrity (Fatigue)	MIL-STD 883K, Method 2004.7, Condition B_1	The leads are bent to an angle of 15º. Each lead is subjected to 3 cycles.
Lead Integrity (Tension/ Pull)	MIL-STD 883K, Method 2004.7, Condition A_1	Pull of 0.227kg applied for 30 seconds. The force is then increased until the pins snap.

EMC STANDARDS

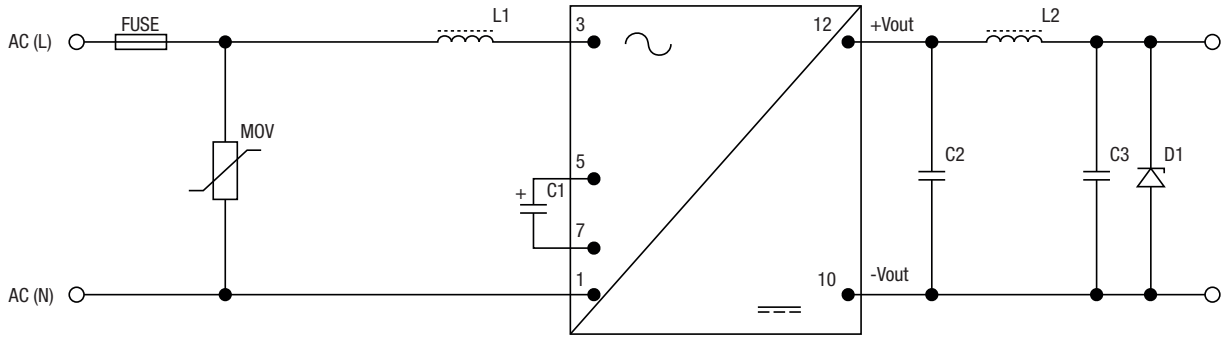
Conducted input noise	EN55032, Class B with external X cap
Radiated noise	EN55032, Class B
ESD immunity	IEC/EN61000-4-2 level 3 perf criteria A
Conducted transient immunity	EN61000-4-6, 10 Vrms, perf criteria A
Conducted surge immunity	EN61000-4-5, Installation class 3, perf criteria A
EFT/Burst	EN61000-4-4, level 3, perf criteria A
Radiated field immunity	EN61000-4-3, 10 V/m, perf criteria A
Dips and interruptions	EN61000-4-11, 100% reduction for 20ms (A), 60% reduction for 200ms (A), 30% reduction for 500ms (A), 100% reduction for 5s (B)
Magnetic fields	EN61000-4-8 30A/m, perf criteria A

PART NUMBER STRUCTURE



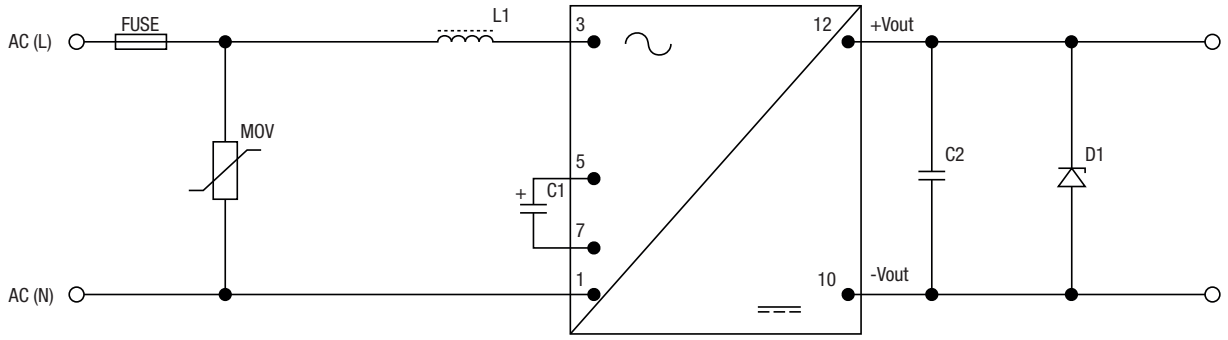
APPLICATION NOTES

Components required to meet datasheet specifications - 5V output types



FUSE	1W 10Ω fusible resistor
MOV	Component fitted for compliance with EN61000-4-5, Installation class 3, perf criteria A
L1	330µH
C1	6.8µF 400V
C2	68µF 20mΩ low ESR polymer
L2	6.8µH 84682C
C3	22µF
D1	SMBJ7.0A transient voltage suppressor - component fitted for overshoot protection

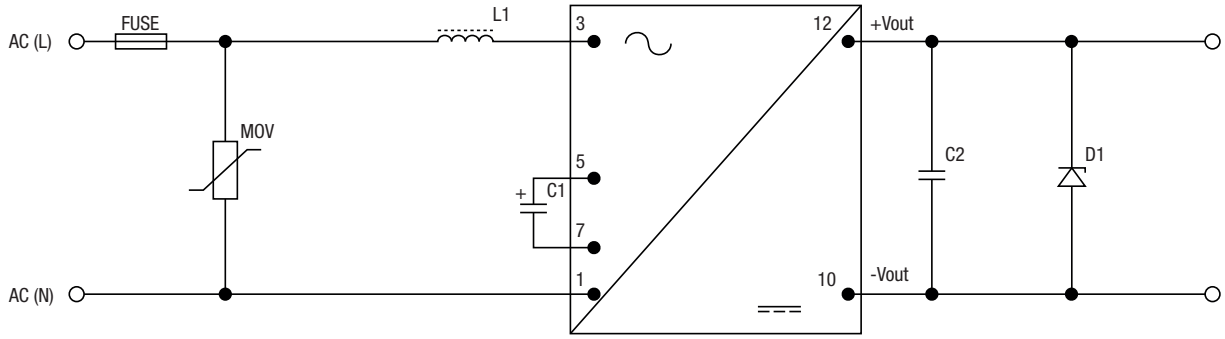
Components required to meet datasheet specifications - 12V output types



FUSE	1W 10Ω fusible resistor
MOV	Component fitted for compliance with EN61000-4-5, Installation class 3, perf criteria A
L1	330µH
C1	6.8µF 400V
C2	68µF 20mΩ low ESR polymer
D1	SMBJ20A transient voltage suppressor - component fitted for overshoot protection

APPLICATION NOTES (continued)

Components required to meet datasheet specifications - 24V output types



FUSE	1W 10Ω fusible resistor
MOV	Component fitted for compliance with EN61000-4-5, Installation class 3, perf criteria A
L1	330µH
C1	6.8µF 400V
C2	47µF 25mΩ low ESR polymer
D1	SMBJ30A transient voltage suppressor - component fitted for overshoot protection

Advisory Notes

The BAC1 series is not hermetically sealed, customers should ensure that parts are fully dried before input power application.

Output Capacitance and start-up times

The recommended specified caps on page 4 and 5 can already meet datasheet specification, there is no need to add extra caps. However, if customers connects to load capacitance, the below load capacitance are max (additional to recommended specified caps) to ensure start up at minimum AC input.

Part No.	Maximum Load Capacitance (per output)	Start-up times (AC input)	Start-up times (DC input)
	µF	s	s
BAC1S05SC	220	0.5	5
BAC1S12SC	100	1	5
BAC1S24SC	100	1	5

Minimum Load

The minimum load to meet full datasheet specification is 5% of the full rated load across the specified input voltage range.

24V output type - minimum input voltage requirements

At -40C the part is guaranteed to start into 100% load with a minimum input voltage of 115Vac; once the product is operating, the product will continue to operate at lower input voltages with higher output loading.

The product will start at -40C with 80% or lower load with an input voltage of 100VAC; once the product is operating, the product will continue to operate at lower input voltages with higher output loading.

CHARACTERISATION TEST METHODS

Ripple & Noise Characterisation Method

Ripple and noise measurements are performed with the following test configuration.

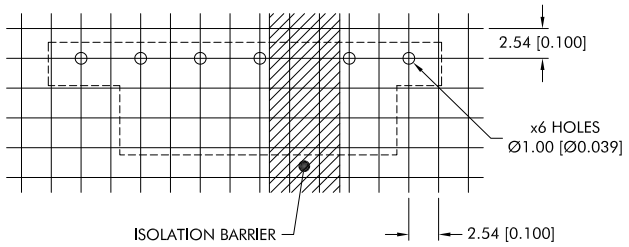
12	+Vout

RECOMMENDED FOOTPRINT DETAILS



The isolation barrier shown must not have any copper traces even on internal layers. This is to avoid compromising the creepage and clearnace distance.
PCB layouts must take into consideration the required clearance and creepage requirements to maintain the clearance and creepage of the isolation barrier.
All dimensions in mm (inches).

OCEAN CHIPS
Океан Электроники
Поставка электронных компонентов

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «**JONHON**», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «**FORSTAR**».

AVIC JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели, кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
