

# ULTRA-PRECISION 1:8 CML FANOUT BUFFER WITH INTERNAL I/O TERMINATION

Precision Edge®  
SY58031U

## FEATURES

- Precision 1:8, 400mV CML fanout buffer
- Guaranteed AC performance over temperature and voltage:
  - Clock frequency range: DC to >6GHz
  - <60ps  $t_r/t_f$  time
  - <270ps  $t_{pd}$
  - <20ps output-to-output skew
- Low-jitter performance:
  - 75fs<sub>RMS</sub> phase jitter (typ)
- 50Ω source-terminated CML outputs
- 400mV CML output swing into 50Ω load
- Fully differential I/O
- Accepts an input signal as low as 100mV
- Unique, patent-pending input termination and VT pin accepts DC-coupled and AC-coupled differential inputs: (LVPECL, LVDS, and CML)
- Power supply 2.5V ±5% or 3.3V ±10%
- Industrial temperature range: -40°C to +85°C
- Available in 32-pin (5mm x 5mm) MLF® package

Precision Edge®

## DESCRIPTION

The SY58031U is a 2.5V/3.3V precision, high-speed, fully differential CML 1:8 fanout buffer. The SY58031U is optimized to provide eight identical output copies with less than 20ps of skew and only 75fs<sub>RMS</sub> phase jitter. It can process clock signals as fast as 6GHz.

The differential input includes Micrel's unique, 3-pin input termination architecture that allows the SY58031U to directly interface to CML, LVPECL, and LVDS differential signals (AC- or DC-coupled) without any level-shifting or termination resistor networks in the signal path. The result is a clean, stub-free, low-jitter interface solution. The CML outputs feature 400mV typical swing into 50Ω loads and provide an extremely fast rise/fall time guaranteed to be less than 60ps.

The SY58031U operates from a 2.5V ±5% supply or 3.3V ±10% supply and is guaranteed over the full industrial temperature range (-40°C to +85°C). For applications that require high-speed 1:8 LVPECL fanout buffers, consider the SY58032U and SY58033U. The SY58031U is part of Micrel's high-speed, Precision Edge® product line.

All support documentation can be found on Micrel's web site at [www.micrel.com](http://www.micrel.com).

## APPLICATIONS

- All SONET and all GigE clock distribution
- All Fibre Channel clock and data distribution
- Network routing engine timing distribution
- High-end, low-skew multiprocessor synchronous clock distribution

| SY58031UMG <sup>(3)</sup>      | MLF-32       | Industrial      | SY58031U with Pb-Free bar-line indicator | Pb-Free NiPdAu |
| SY58031UMGTR <sup>(2, 3)</sup> | MLF-32       | Industrial      | SY58031U with Pb-Free bar-line indicator | Pb-Free NiPdAu |

**Notes:**

1. Contact factory for die availability. Dice are guaranteed at T<sub>A</sub> = 25°C, DC electricals only.
2. Tape and Reel.
3. Pb-Free package recommended for new designs.

**PIN DESCRIPTION**

| Pin Number   | Pin Name   | Pin Function   |
|--|--|--|
| 3, 6   | IN, /IN  | Differential Signal Input: Each pin of this pair internally terminates with 50Ω to the VT pin. Note that this input will default to an indeterminate state if left open. See “Input Interface Applications” section.   |
| 4  | VT   | Input Termination Center-Tap: Each input terminates to this pin. The VT pin provides a center-tap for each input (IN, /IN) to the termination network for maximum interface flexibility. See “Input Interface Applications” section.   |
| 2, 7, 17, 24   | GND, Exposed Pad   | Ground. Exposed pad must be connected to a ground plane that is the same potential as the ground pin.  |
| 1, 8, 9, 16, 18, 23, 25, 32                                    | VCC  | Positive Power Supply: Bypass with 0.1μF  0.01μF low ESR capacitors as close to the pins as possible.  |
| 31, 30, 29, 28, 27, 26, 22, 21, 20, 19, 15, 14, 13, 12, 11, 10 | Q0, /Q0, Q1, /Q1, Q2, /Q2, Q3, /Q3, Q4, /Q4, Q5, /Q5, Q6, /Q6, Q7, /Q7 | CML Differential Output Pairs: Differential buffered output copy of the input signal. The CML output swing is typically 400mV into 50Ω. Unused output pairs may be left floating with no impact on jitter. See “CML Output Termination” section.                             |
| 5  | VREF-AC  | Bias Reference Voltage: Equal to V <sub>CC</sub> -1.2V (typical), and used for AC-coupled applications. See “Input Interface Applications” section. When using V <sub>REF-AC</sub> , bypass with 0.01μF capacitor to V <sub>CC</sub> . Maximum sink/source current is 0.5mA. |

### Absolute Maximum Ratings<sup>(1)</sup>

Power Supply Voltage ( $V_{CC}$ ) ..... -0.5V to +4.0V  
 Input Voltage ( $V_{IN}$ ) ..... -0.5V to  $V_{CC}$   
 Current ( $V_T$ )  
 Source or sink current on  $V_T$  pin .....  $\pm 100$ mA  
 Input Current ( $V_T$ )  
 Source or sink current on IN, /IN .....  $\pm 50$ mA  
 Current ( $V_{REF}$ )  
 Source or sink current on  $V_{REF-AC}$ <sup>(3)</sup> .....  $\pm 1.5$ mA  
 Lead Temperature Soldering, (20 sec.) ..... 260°C  
 Storage Temperature Range ( $T_S$ ) ..... -65°C to +150°C

### Operating Ratings<sup>(2)</sup>

Power Supply Voltage ( $V_{CC}$ ) ..... +2.375V to +3.60V  
 Ambient Temperature Range ( $T_A$ ) ..... -40°C to +85°C  
 Package Thermal Resistance<sup>(4)</sup>  
 MLF® ( $\theta_{JA}$ )  
 Still-Air ..... 35°C/W  
 MLF® ( $\psi_{JB}$ )  
 Junction-to-Board ..... 20°C/W

## DC ELECTRICAL CHARACTERISTICS<sup>(5)</sup>

$T_A = -40^\circ\text{C}$  to  $+85^\circ\text{C}$

**Notes:**

1. Permanent device damage may occur if "Absolute Maximum Ratings" are exceeded. This is a stress rating only and functional operation is not implied at conditions other than those detailed in the operational sections of this data sheet. Exposure to absolute maximum ratings conditions for extended periods may affect device reliability.
2. The data sheet limits are not guaranteed if the device is operated beyond the operating ratings.
3. Due to the limited drive capability, use for input of the same package only.
4. Thermal performance assumes exposed pad is soldered (or equivalent) to the device's most negative potential (GND) on the PCB.  $\psi_{JB}$  uses 4-layer  $\theta_{JA}$  in still-air number unless otherwise stated.
5. The circuit is designed to meet the DC specifications shown in the above tables after thermal equilibrium has been established.
6.  $V_{IH}$  (min) not lower than 1.2V.

## AC ELECTRICAL CHARACTERISTICS<sup>(7)</sup>

$V_{CC} = 2.5V \pm 5\%$  or  $3.3V \pm 10\%$ ;  $R_L = 100\Omega$  across each output pair or equivalent;  $T_A = -40^\circ C$  to  $+85^\circ C$ , unless otherwise stated.

| Symbol           | Parameter  | Condition  | Min | Typ | Max | Units |
|------------------|--|--|-----|-----|-----|-------|
| $f_{MAX}$        | Maximum Operating Frequency                            | $V_{OUT} \geq 200mV$ Clock                         | 6   |     |     | GHz   |
| $t_{pd}$         | Propagation Delay (IN-to-Q)                            |  | 120 | 230 | 270 | ps    |
| $t_{pd\ tempco}$ | Differential Propagation Delay Temperature Coefficient |  |     | 35  |     | fs/°C |

|                  | Part-to-Part   | <b>Note 9</b>                                      |     |     | 100 | ps    |
| $t_{JITTER}$     | RMS Phase Jitter                                       | Output: 622MHz<br>Integration Range: 12kHz - 20MHz |     | 75  |     | fs    |
| $t_r, t_f$       | Output Rise/Fall Time                                  | 20% to 80%, at full output swing                   | 20  | 45  | 60  | ps    |

**Notes:**

- 7. High frequency AC electricals are guaranteed by design and characterization. All outputs loaded,  $V_{IN} \geq 100mV$ .
- 8. Output-to-output skew is measured between outputs under identical transitions.
- 9. Part-to-part skew is defined for two parts with identical power supply voltages at the same temperature and with no skew of the edges at the respective inputs. Part-to-part skew includes variation in  $t_{pd}$ .

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «**JONHON**», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «**FORSTAR**».

## JONHON

«**JONHON**» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«**FORSTAR**» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели, кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
