

ZMOTION™ Lens and Pyroelectric Sensor

Product Specification

PS028609-0213

Warning: DO NOT USE THIS PRODUCT IN LIFE SUPPORT SYSTEMS.

LIFE SUPPORT POLICY

ZILOG'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS PRIOR WRITTEN APPROVAL OF THE PRESIDENT AND GENERAL COUNSEL OF ZILOG CORPORATION.

As used herein

Life support devices or systems are devices which (a) are intended for surgical implant into the body, or (b) support or sustain life and whose failure to perform when properly used in accordance with instructions for use provided in the labeling can be reasonably expected to result in a significant injury to the user. A critical component is any component in a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system or to affect its safety or effectiveness.

Revision History

Each instance in the revision history table reflects a change to this document from its previous revision. For more details, refer to the corresponding pages or appropriate links provided in the table below.

| Date | Revision Level | Description | Page Number |
|----------|----------------|---|---|
| Feb 2013 | 09 | Moved NCL-11 lens specification to Table 2 ; added the CM 0.77 GI V2 lens specification; alphanumerically reordered all lenses. | 2 , 8 |
| May 2012 | 08 | Added the NCL-11 and EWA 0.3 GI V2 lens specifications. | 36 , 18 |
| Nov 2011 | 07 | Added the NCL-3R and NCL-10S lens specifications. | 22 , 34 |
| Mar 2011 | 06 | Intrusion lens specifications added. | 38 |
| Jan 2011 | 05 | Modifications to some lens/sensor descriptions in Table 2 . | |
| Jan 2011 | 04 | Updated to include two new Nicera sensors. | 19 , 29 |
| Nov 2010 | 03 | Updated to new Zilog/IXYS logo and accepted Zilog style; replaced all instances of <i>ePIR</i> with <i>advanced passive infrared</i> . | All |
| Sep 2010 | 02 | Replaced Zilog logos, ePIR with ZMOTION, and Zdots with Module; fixed formatting and pagination issues; removed references to GP and General Purpose. | All |
| Oct 2010 | 01 | Original issue | All |

Overview

Zilog's ZMOTION Detection and Control and Intrusion Detection product families provide integrated and flexible solutions for Passive Infrared (PIR)-based motion detection applications. These product families are based on the ZMOTION MCU, a high-performance microcontroller featuring integrated PIR motion detection algorithms. Each family includes a selection of lenses and PIR sensors to fit a wide range of application requirements. Each lens and sensor combination is optimized for its intended application by configuration settings loaded into the ZMOTION MCU ensuring the best possible performance while significantly reducing development risk and minimizing time to market. Zilog's PIR Motion Detection Technology provides a dramatic improvement in both sensitivity and stability over traditional designs and is scalable to many market segments including Security/Intrusion Detection, Lighting Control, HVAC, Access Control, Vending, Display, Proximity, Power Management, Occupancy Sensing and many others.

This document provides the zone patterns and mechanical dimensions for the Zilog-supported lenses and pyroelectric sensors included in the ZMOTION Family. Each supported lens and pyroelectric sensor combination is provided with an associated configuration file for the ZMOTION MCU. It is possible to use other lenses and pyroelectric sensors not directly supported by Zilog by developing the appropriate configuration settings based on one of the existing files.

There are two general groups of lenses provided:

- ZMOTION Detection and Control for general motion detection applications
- ZMOTION Intrusion Detection for security applications

All lenses and pyroelectric sensors listed in this document are available from Zilog as a bundle (which includes MCU, lens and pyroelectric sensor) or individually from their associated manufacturers. Because Zilog is regularly adding new lens support to these ZMOTION product families, please obtain the latest version of this document from our website at: www.zilog.com/ZMOTION.

PIR Sensor Specifications

The pyroelectric sensors included in the ZMOTION product families are manufactured by Nippon Ceramic Company Ltd. (Nicera). Please refer to their website for any specific information you may require.

Table 1 shows the pyroelectric sensors available for both the ZMOTION Detection and Control and Intrusion Detection Families.

Table 1. ZMOTION Pyroelectric Sensors

| Manufacturer | Part Number | Description |
|--------------|--------------|----------------------|
| Nicera | RE200B-P | Basic Dual Element |
| Nicera | SDA02-54-P | Premium Dual Element |
| Nicera | SBDI46-504AA | Quad Element |

ZMOTION Lens Selection Guide

Select a lens and pyroelectric sensor based on the intended application from Table 2. Lenses and pyroelectric sensors for security/intrusion-related applications are listed in Table 3.

Table 2. ZMOTION Detection and Control Lenses and Pyroelectric Sensors

| Part Number | Description | Recommended Applications | Configuration Header File | Pyroelectric Sensor |
|--|-----------------------------------|---|---------------------------|---------------------|
| AA 0.9 GI T1 Lens Specification – see page 7 | Animal Alley Array (88°) | Corner wall mount or very high ceiling with rectangular floor pattern | API_INIT_01.h | RE200B-P |
| | 35.6mm x 49.9mm Flat Fresnel lens | Warehouse Lighting (Bay Light) | | SDA02-54-P |
| | 22.9mm focal length | Combined Intrusion and Lighting Control | | |
| | 25 meter range | HVAC | | |
| | 22 equal segments | | | |

Note: *The NCL-11 and EWA 0.3 GI V2 lenses are not currently part of the standard ZMOTION bundled suite or offered in ZMOTION development kits. However, the optimized API settings for this lens are available in the [ZMOTION Detection Lens and Pyro Sensor Configuration Guide \(WP0018\)](#).

Table 2. ZMOTION Detection and Control Lenses and Pyroelectric Sensors (Continued)

| Part Number | Description | Recommended Applications | Configuration Header File | Pyroelectric Sensor |
|--|---|---|---------------------------|--------------------------|
| CM 0.77 GI V2 Lens Specification – see page 8 | Ceiling Mount Array (360°) 37mm diameter circular lens 19.6mm focal length 12.2m radius at 3.7m height 4:1 floor coverage diameter-to-height ratio | High ceiling mount for commercial lighting control Commercial HVAC | API_INIT_02.h | SBDI46-504AA RE200B-P |

Note: *The NCL-11 and EWA 0.3 GI V2 lenses are not currently part of the standard ZMOTION bundled suite or offered in ZMOTION development kits. However, the optimized API settings for this lens are available in the [ZMOTION Detection Lens and Pyro Sensor Configuration Guide \(WP0018\)](#).

ZMOTION Detection and Control Lens Specifications

Figures 1 through 27 on the following pages discuss the specifications of the lenses selected for the ZMOTION Detection and Control family of products. To see specifications for lenses used in security and intrusion detection applications, refer to the [ZMOTION Intrusion Detection Lens Specifications](#) section on page 38.

AA 0.9 GI T1 Lens Specification

The AA 0.9 GI T1 lens array is optimized for dual element pyroelectric sensors in long range sensing applications. It is normally used with the grooved side facing the pyroelectric detector, and curved at a 0.9 inch (22.9mm) radius about the sensitive area of the detector. The detector position should be 0.492" (12.5mm) below the upper edge, and centered left-right.

Figure 1. The AA 0.9 GI T1 Lens Specification

CM 0.77 GI V2 Lens Specification

The CM 0.77 GI V2 lens is intended for high ceiling-mounted commercial lighting and HVAC applications in which high floor coverage is required. See Figures 2 and 3.

Figure 2. CM 0.77 GI V2 Lens Specification: Front View

SIDE VIEW:

Figure 3. CM 0.77 GI V2 Lens Specification: Floor Coverage, Side View

CM 0.77 GI V3 Lens Specification

The CM 0.77 GI V3 lens array is intended for ceiling-mounted applications and is optimized for use with both dual and quad element pyroelectric sensors. The detector mounting flange should be 0.46" (11.7 mm) from the pyroelectric sensor's element. The angle from the center line to the placement notch is 15 degrees.

Figure 4. The CM 0.77 GI V3 Lens Specification, #1 of 2

Figure 5. The CM 0.77 GI V3 Lens Specification, #2 of 2

CM 0.77 GI V5 Lens Specification

The CM 0.77 GI V5 lens array is intended for ceiling-mounted applications and is optimized for both dual and quad element pyroelectric detectors. The detector mounting flange should be 0.46" (11.7 mm) from the pyroelectric sensor's element.

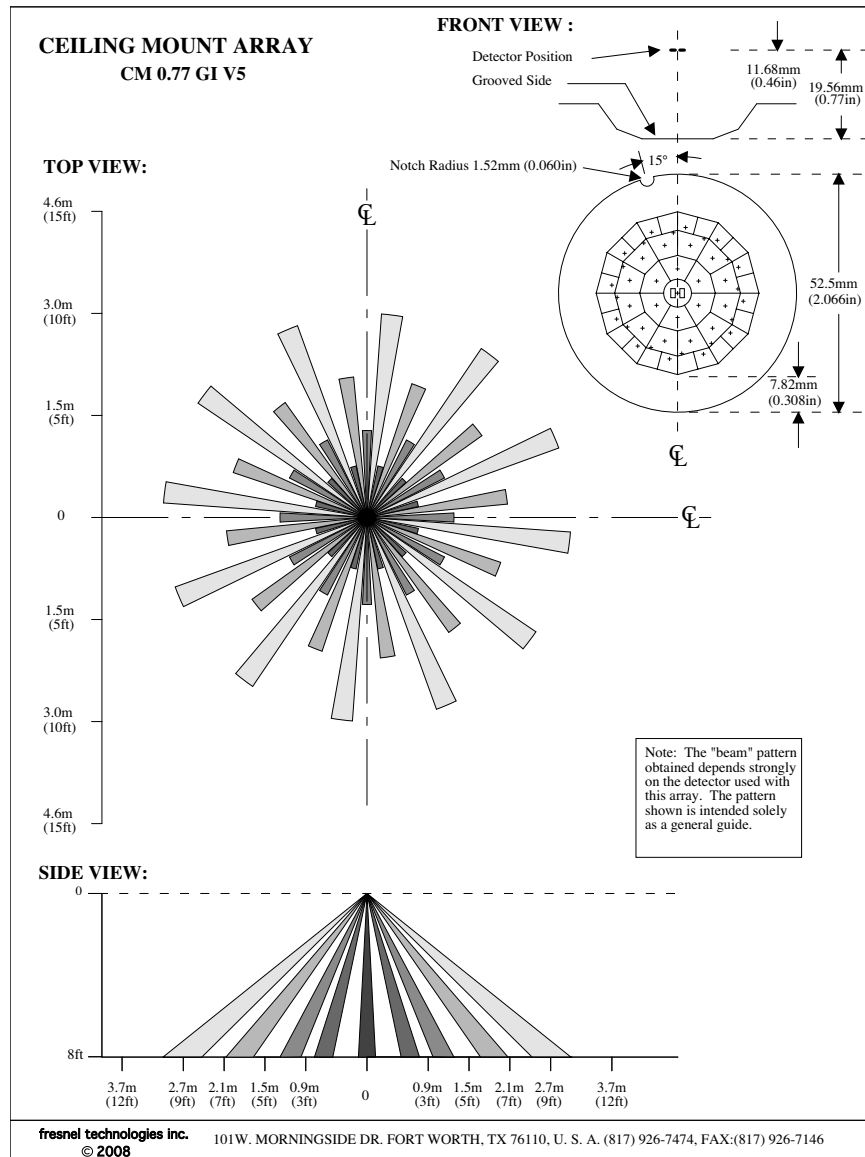

Figure 6. The CM 0.77 GI V3 Lens Specification, #1 of 3

Figure 7. The CM 0.77 GI V3 Lens Specification, #2 of 3

Figure 8. The CM 0.77 GI V3 Lens Specification, #3 of 3

CWM 0.5 GI V1 Lens Specification

The CWM 0.5 GI V1 lens array is intended for both wall and ceiling-mounted applications and is optimized for both dual and quad element pyroelectric detectors. The lens is intended to clip directly into the circuit board over top of the pyroelectric sensor.

Figure 9. The CM 0.5 GI V1 Lens Specification: Wall Mount

Figure 10. The CM 0.5 GI V1 Lens Specification: Ceiling Mount, #1 of 2

Figure 11. The CM 0.5 GI V1 Lens Specification: Ceiling Mount, #2 of 2

EWA 0.3 GI V2 Lens Specification

The EWA 0.3 GI V2 lens is intended for wall-mounted room occupancy and proximity sensing applications in which an extra-wide sensing angle is required. See Figure 12.

Figure 12. The EWA 0.3 GI V2 Lens Specification, Dimensions

NCL-3B Lens Specification

The NCL-3B lens is intended for wall-mounted entrance and proximity-sensing applications.

Figure 13. The NCL-3B Lens Dimensions

Figure 14. The NCL-3B Lens Specification, X Axis

Figure 15. The NCL-3B Lens Specification, Y Axis

NCL-3R Lens Specification

The NCL-3R lens is intended for wall-mounted entrance and proximity-sensing applications. This lens features two orientations, Tab A and Tab B, that can be used with the pyroelectric sensor to provide different beam patterns. Figures 16 through 19.

ZMOTION Intrusion Detection Lens Specifications

Figures 34 through 33 provide the zone patterns and mechanical dimensions for the ZMOTION Intrusion Detection family of products. Recommended placement of the pyroelectric sensor is provided with the detector and lens inclined downward at an angle of 12 degrees. If you wish to use a tilt angle other than 12 degrees while maintaining the specified zone patterns, move the pyroelectric sensor up by 0.021" (0.53 mm) for each degree less than 12 degrees, or down by the same amount for each degree greater than 12 degrees.

The WA 1.2 GI 12 V4, LR 1.2 GI 12 V3 and VB 1.2 GI V1 lenses can be interchanged in the same end product without modifications to the placement or angle of the lens.

These lenses may also be used in nonintrusion applications. For additional lenses that do not require security/intrusion detection capabilities, refer to the [ZMOTION Detection and Control Lens Specifications](#) section on page 6.

LR 1.2 GI 12 V3 Lens Specification

The LR 1.2 GI 12 V3 lens array is optimized for dual-element pyroelectric sensors in long-range corridor security applications. It is normally used with the grooved side facing the pyroelectric detector, and curved at a 1.2 inch (30.5 mm) radius about the sensitive area of the detector. The detector and the lens array should be inclined downward at an angle of 12 degrees. If you wish to use a tilt angle other than 12 degrees while maintaining the specified zone pattern, move the pyroelectric sensor up by 0.021" (0.53 mm) for each degree less than 12 degrees, or down by the same amount for each degree greater than 12 degrees. The detector position should be 0.812" (20.6 mm) below the upper edge, and centered left-to-right.

Figure 32. LR 1.2 GI 12 V3 Lens Specification

VB 1.2 GI V1 Lens Specification

The VB 1.2 GI V1 lens array is optimized for dual-element pyroelectric sensors in vertical barrier or curtain-type security applications. It is normally used with the grooved side facing the pyroelectric detector, and curved at a 1.2 inch (30.5 mm) radius about the sensitive area of the detector. The detector and the lens array should be inclined downward at an angle of 12 degrees. If you wish to use a tilt angle other than 12 degrees while maintaining the specified zone pattern, move the pyroelectric sensor up by 0.021" (0.53mm) for each degree less than 12 degrees, or down by the same amount for each degree greater than 12 degrees. The detector position should be 0.812" (20.6 mm) below the upper edge, and centered left-to-right.

Figure 33. VB 1.2 GI V1 Lens Specification

WA 1.2 GI 12 V4 Lens Specification

The WA 1.2 GI 12 V4 lens array is optimized for dual-element pyroelectric sensors in large-area security applications. It is normally used with the grooved side facing the pyroelectric detector, and curved at a 1.2 inch (30.5mm) radius about the sensitive area of the detector. The detector and the lens array should be inclined downward at an angle of 12 degrees. If you wish to use a tilt angle other than 12 degrees while maintaining the specified zone pattern, move the pyroelectric sensor up by 0.021" (0.53mm) for each degree less than 12 degrees, or down by the same amount for each degree greater than 12 degrees. The detector position should be 0.812" (20.6mm) below the upper edge, and centered left-to-right.

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели, кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
