## EAO Product Information

Series 19

---

Description .....	3
Product Assembly .....	4
Devices raised mounting .....	5
Accessories.....	6
Technical Data.....	9
Application guidelines.....	11
Drawings.....	12
Index.....	15

### Product Information

#### General notes

The series contains indicators and illuminated pushbuttons with maintained and momentary action and one contact which may be normally closed or normally open (snap-action element for closing). The illuminated pushbuttons are fitted with snap-action or low-level switching systems.

The front dimensions are 9 x 9 mm or 9 mm dia.

#### Mounting

Mounting from the front through the mounting hole is assured even when the wiring has already been attached.

The units are equipped with soldering/plug-in terminals.

#### Lenses

The flat lenses, made of polycarbonate, are obtainable in various colours. The transparent lens is available with translucent or transparent support.

#### Marking

A limited amount of marking can be provided.

#### Illumination

Perfect illumination of the different coloured lenses is assured by filament lamps Bi-Pin T1 longlife (6 ... 24 V) or LED Bi-Pin T1. LED are available in the colours white, red, yellow, orange and green.

Luminosity and wave length scattering caused by the technology used in the LED manufacturing processes may lead to visual differences in our products.

#### Position indication

The status of a maintained action switch can be determined by the position of the lens.

### Specimen order

#### Indicator :

- Indicator actuator, 9 mm dia., soldering terminal 19-030.005

#### Essential accessories :

- Lens plastic blue, transparent, flush, 9 mm dia. 19-931.6
- Single-LED, T1 Bi-Pin, 3.6 VDC, weiss 10-2603.3179C

*We reserve the right to modify technical data  
All dimensions in mm*

## Indicator, raised mounting

- 1 Lens
- 2 Switch housing
- 3 Front plate
- 4 Fixing nut

## Pushbutton illuminative, raised mounting

- 1 Lens
- 2 Switch housing
- 3 Front plate
- 4 Fixing nut

## Indicator actuator

### Essential Accessories:

-  Lens page 6
-  Single-LED page 7

		yellow	2.2 VDC, 20 mA	<b>10-2602.3174C</b>	0.001

### Multi-LED

	Socket	Light colour	Operating voltage/-current	Typ-Nr.	
<b>Multi-LED</b> max. PIN length 5 mm	T1 Bi-Pin	green	28 VDC, 12 mA	<b>10-4613.3105B</b>	0.001
		orange	28 VDC, 12 mA	<b>10-4613.3103B</b>	0.001
		red	28 VDC, 12 mA	<b>10-4613.3102B</b>	0.001
		yellow	28 VDC, 12 mA	<b>10-4613.3104B</b>	0.001

## Assembling

### Fixing nut

	Typ-Nr.	 kg
<b>Fixing nut</b> Ø 9/M8 x 13 mm	<b>19-991</b>	0.001

### Dressing tool

	Typ-Nr.	 kg
<b>Dressing tool</b> for aligning buttons	<b>19-906</b>	0.011

### Lens remover

	Typ-Nr.	 kg
<b>Lens remover</b>	<b>19-910</b>	0.002

### Lamp remover

	Typ-Nr.	 kg
<b>Lamp remover</b>	<b>11-906</b>	0.003

CAUTION  
A switching process might be released when replacing the Lamp/LED !

### Mounting tool

	Typ-Nr.	 kg
<b>Mounting tool</b> for Fixing nut long 19-991	<b>19-905</b>	0.011

## Actuator with snap-action switching element

### Switching system

Single-break, snap-action switching system.  
1 normally open contact

### Material

#### Material of contact

Gold plated Silver, Silver plated

#### Switch housing

Polyetherimide (PEI), self-extinguishing

#### Actuator housing

Polyphenyleneoxide (PPO), self-extinguishing, colour black

### Mechanical characteristics

#### Terminals

Universal terminal:  
Max. wire diameter 2 x 0.8 mm  
Max. wire cross-section of stranded cable 1 x 0.75 mm<sup>2</sup>

Plug-in terminal: 2.0 x 0.5 mm  
For these terminals we can also supply a plug-in base which, when soldered on to the board, enables the switch to be plugged in.

#### Tightening torque

for fixing nut max. 20 Ncm

#### Actuating force

1.6 N

#### Actuating travel

2.8 mm ±0.2 mm

#### Mechanical lifetime

2 million operations

### Electrical characteristics

#### Switch rating

Silver plated:  
Max. 50 VAC / 72 VDC, 0.8 A or 50 W  
Min. 20 V, 10 mA  
Gold plated:  
Max. 50 VAC / 72 VDC, 100 mA or 5 W  
Min. 100 µV, 50 µA

#### Electric strength

2500 VAC, 50 Hz, 1 min. between all terminals and earth, as per IEC 60512-2-11

### Environmental conditions

#### Storage temperature

-40 °C ... +85 °C

#### Service temperature

without illumination -25 °C ... +65 °C  
with incandescent lamp -25 °C ... +45 °C  
with LED -25 °C ... +65 °C  
for indicators and illuminated pushbuttons mounted as a block, make sure the heat can escape freely

#### Protection degree

IP 40 front side, as per IEC 60529

## Actuator with low level switching element

### Switching system

This low-level switching system was designed for switching low powers in electronic circuits. The switching system assures reliable switching of loads.  
Single-break momentary contact, as normally open or normally closed with 4 independent points of contact.  
Special features are the long life, extremely short rebound time and stable contact resistance.  
1 normally open or 1 normally closed contact.

### Material

#### Material of contact

Gold plated

#### Actuator housing

Polyphenyleneoxide (PPO), self-extinguishing, colour black

### Mechanical characteristics

#### Terminals

Universal terminal:  
Max. wire diameter 2 x 0.8 mm  
Max. wire cross-section of stranded cable 1 x 0.75 mm<sup>2</sup>

Plug-in terminal: 2.0 x 0.5 mm  
For these terminals we can also supply a plug-in base which, when soldered on to the board, enables the switch to be plugged in.

#### Tightening torque

for fixing nut max. 20 Ncm

#### Actuating force

1.8 N ±0.3 N

#### Actuating travel

2.8 mm ±0.2 mm

#### Rebound time

Typ. <100 µs

#### Mechanical lifetime

5 million operations

### Electrical characteristics

#### Contact resistance

≤50 mΩ starting value (initial) as per IEC 60512-2-2b

#### Switch rating

10 µA, 100 µV to 100 mA at 42 VAC/VDC

#### Electric strength

2500 VAC, 50 Hz, 1 min. between all terminals and earth, as per IEC 60512-2-11

### Environmental conditions

#### Storage temperature

-40 °C ... +85 °C

#### Service temperature

without illumination -25 °C ... +65 °C  
with incandescent lamp -25 °C ... +45 °C  
with LED -25 °C ... +65 °C

for indicators and illuminated pushbuttons mounted as a block,  
make sure the heat can escape freely

**Protection degree**

IP 40 front side, as per IEC 60529

**Shock resistance**

(Single impacts, semi-sinusoidal)

15 g for 11 ms, as per IEC 60512-4-3, IEC 60068-2-27

## Suppressor circuits

When switching inductive loads such as relays, DC motors, and DC solenoids, it is always important to absorb surges (e.g. with a diode) to protect the contacts. When these inductive loads are switched off, a counter emf can severely damage switch contacts and greatly shorten lifetime.

Fig. 1 shows an inductive load with a free-wheeling diode connected in parallel. This free-wheeling diode provides a path for the inductor current to flow when the current is interrupted by the switch. Without this free-wheeling diode, the voltage across the coil will be limited only by dielectric breakdown voltages of the circuit or parasitic elements of the coil. This voltage can be kilovolts in amplitude even when nominal circuit voltages are low (e.g. 12 VDC) see Fig. 2.

The free-wheeling diode should be chosen so that the reverse breakdown voltage is greater than the voltage driving the inductive load. The DC blocking voltage ( $V_R$ ) of the free-wheeling diode can be found in the datasheet of a diode. The forward current should be equal or greater than the maximum current flowing through the load.

**To get an efficient protection, the free-wheeling diode must be connected as close as possible to the inductive load!**

Switching with inductive load

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

## JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели, кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
