## 100 Series High Density Miniature Blocks

### Product Facts

- n **No Wire Crimping Required** — tubular clamp contacts hold wire ranging from #30 to #12 AWG better than crimp-on terminals.
- n **Saves Installation Time and Costs** — tubular clamp contacts are supplied with captive screws backed out.
- n **Nylon housing standard; polypropylene for fire retardant characteristics.**
- n **Positive Stop** — helps prevent wire from being inserted too far, and helps prevent screw from being tightened on insulation. Easy access contact provides for safe, reliable, and cost-effective connection.
- n **Quick Installation and Change** — additional sections may be added or removed without removing channel mounting screw.
- n **Choice of Five Mounting Channels:**
  - n Miniature aluminum
  - n Zinc-plated steel
  - n Pre-punched aluminum
  - n Break-away steel
- n **Single and Double Tier blocks fit all standard BUCHANAN mounting channels. Single Tier blocks fit both miniature and standard channels.**
- n **Choice of Marking Surfaces** — matte-finish area for marking directly on block; slide-in vinyl strip (blank or preprinted) also available.

These miniature terminal blocks fit on a much smaller channel to save valuable panel space or can be surface mounted directly to the panel. Miniature blocks accept wire as large as #12 AWG and are available in four styles: Miniature (nylon), Miniature (polypropylene), Single Tier and Double Tier.

## 900 Series, Medium Duty

### Product Facts

- n High circuit density - 183 circuits per 6-foot length, 3/8 inch pitch.
- n Choice of five contact styles - tubular clamp, tubular screw, strap screw, quick connect and tubular screw quick connect.
- n Sections snap-fit with Heavy Duty, Intermediate Heavy Duty, and Fuse & Switch blocks.
- n Readily identify circuits - mark directly on block sections or use removable marking strip. Preprinted marking strips also available.
- n Rated up to 50 amperes per circuit.
- n Flat base models mount directly to surfaces or on miniature channel. Dovetail base mounts on standard size channel.
- n Packaged for rapid handling and assembly - 100 per carton.
- n Only one end section needed per block assembly.
- n Fanning strips - interlocking sectional fanning strips allow entire circuit groups to be connected and disconnected as a single unit.
- n Factory assembled blocks available, including marking strips and different contact sections.

NEMA 900 Series is available in .375" [9.53] centerline, in direct or channel mount, tubular or strap versions, and screw, clamp or quick connect configurations. Corrosion-resistant versions are also available.

NEMA 900 Series snap fit with the Medium Duty 500, 600 and 700 Series, as well as with the Heavy Duty, Intermediate Heavy Duty and Fuse & Switch blocks.

**Note:** All part numbers are RoHS Compliant.

**ERT Series, Medium Duty Radiation Resistant**

**Physical Properties**  
**Effect of Radiation on Physical Properties**

The effects of radiation (neutron and gamma particles) on RYTON R-4 material have been studied. Since RYTON, as an engineering plastic, may fill applications in nuclear installations these effects are important. The test results show no effects on physical properties by these relatively high exposures to gamma and neutron radiation. There is no indication from these data of crosslinking or degradation of the RYTON R-4 material.

**Note:** Determination of the suitability of the ERT Series Blocks for particular applications rests solely with customers.

## Engineering Notes

---

A large grid area for engineering notes, consisting of a 30x30 grid of small squares, intended for drawing or writing technical specifications.

## 200 Series Heavy Duty

### Product Facts

- n Choose from 5 different contact styles.
- n 600 volt UL and NEMA rating.
- n Conservatively rated from 50 to 90 amperes per circuit, depending on which contact style is selected.
- n Choose any of three mounting methods — two-way flat base models surface mount directly to the panel or snap-on miniature channel. Dovetail base models mount on standard channel.
- n Packaged for rapid handling and assembly — snap-fit sections are packed 10 per carton.
- n Only one end section needed per block assembly.
- n Readily identify circuits — mark directly on block sections or use removable marking strip. Pre-printed strips are also available.

This compact, heavy duty block line accepts single or combination wires up to #4 AWG, solid or stranded. The compact design allows at least 138 circuits per 6-foot length to be mounted. The pitch of this 600 volt block is 0.50" [12.70] (centerline spacing).

**200 Series, Heavy Duty, 600V, 0.50" [1.27] Pitch**

## 200 Series Heavy Duty Specifications

### Material & Finish

**Voltage Rating:** Blocks meet 600 volt creepage and clearance requirements of NEMA, UL and CSA for general industrial control equipment and panelboards. Withstand voltages greatly in excess of IEEE switchgear standards for 750 volts.

**Ampacity:** For a single #4 AWG wire the maximum amperage recommended is 85 amps.

### Standard Contacts:

**Material:** Electrical grade copper or copper alloy conductor. Steel Screws plated to resist corrosion in most industrial applications

**AL-CU Tubular Screw:** Aluminum compatibility with aluminum or copper conductors. AL-CU is tin-plated brass.

### Environmental Contacts (for highly corrosive atmospheres)

**Tubular Screw:** Electrical grade copper tube with nickel plating. Nickel plated brass screws.

**Strap Screw:** Nickel plated brass straps and screws. Nickel plating exceeds specification QQ-N-290 Class I, Type VII.

### Nylon Housing:

**Material**—Nylon; Unfilled Type 6/6

**Max. Continuous Temperature**—125°C [257°F]

### Breakdown Voltage (AC, 60 Hz)

Contact-to-Contact: 7000V

Contact-to-Ground: 7800V

**Dielectric Strength (RH 40% at Sea Level)**—470-385 Volts/mil thickness Per ASTM D149

**UL High Voltage Arc Tracking (inches/min.)**—.01-.35

**Water Absorption (24 hrs. % wt. gain)**—1.5%

**Flammability**—UL94V-2

**Chemical Resistance**—Resistant to aromatic hydrocarbons, strong alkalis Per ASTM D543

**Radiation Resistance (ergs g-1 (C))**—8 x 10<sup>7</sup>

**Color**—Translucent White

### Independent Testing Service Listing and Recognition

WIRE SIZES, Solid or Stranded

Tubular Screw

1 #4 AWG, 1 #6 AWG,

1 or 2 #8 AWG, 1 to 4 #10 AWG,

1 or 5 #12 AWG, 1 to 4 #14 AWG,

1 or 6 #16 AWG, 1 to 8 #18 AWG,

Tubular Clamp

1 #6 AWG, 1 or 2 #8 AWG,

**Dovetail Base Mounted On Standard #60 Channel**

## 200 Series, Heavy Duty Phenolic Blocks

### Product Facts

- n **Sturdy Heavy Duty block accepts single or combinations of wire up to #4 AWG solid or stranded — at least 122 circuits per 6-foot length, 9/16" center-to-center spacing.**
- n **Choose from four different contact styles conservatively rated up to 90 amperes.**
- n **600 volt UL and NEMA rating.**
- n **Surface mounted flat base and channel mounted dovetail base models available.**
- n **Only one end section needed per block assembly.**
- n **Interlocking sectional fanning strips allow entire circuit groups to be connected and disconnected as a single unit.**
- n **Readily identify circuits — available with painted marking surface or use removable marking strip. Pre-printed strips are also available.**
- n **Factory assembled blocks available.**
- n **Heavy Duty Phenolic Block Sections Snap-fit with 300 & 600 volt, medium duty phenolic, heavy duty nylon and polypropylene, and Fuse and Switch blocks.**

This family of phenolic heavy duty blocks is ideal for high temperature, high current applications. The rugged material withstands temperatures up to 302°F [150°C].

**Note:** All part numbers are RoHS Compliant.

**200 Series, Heavy Duty Phenolic, 600 V, 0.56" [14.24] Pitch**

## 200 Series, Heavy Duty Phenolic Specifications

### Material & Finish

#### Standard Contacts

**Material:** Electrical grade copper or copper alloy conductor. Steel Screws plated to resist corrosion in most industrial applications.

#### Environmental Contacts (for highly corrosive atmospheres)

**Tubular Screw:** - Electrical grade copper tube with nickel plating.

Nickel plated brass screws.

**Strap Screw:** - Nickel plated brass straps and screws

Nickel plating exceeds specification QQ-N-290 Class I, Type VII.

**Wire Range:** Strap Screw: #22-10 AWG max., solid or stranded with crimp terminals

**Strap Clamp:** #18-8 AWG, solid or stranded

**Tubular Screw:** #18-4 AWG, solid or stranded

**Tubular Clamp:** #18-6 AWG, solid or stranded

**Wire Strip Length:** Strap Screw: As needed for lugging

**Strap Clamp:** 1/2 in. [12.7]

**Tubular Screw:** 1/2 in. [12.7]

**Tubular Clamp:** 1/2 in. [12.7]

**Screw Type:** Strap Screw: 10-32 slotted binding head

**Strap Clamp:** 8-32 pan head w/ clamp

**Tubular Screw:** 1/4-28 slotted headless

**Tubular Clamp:** 1/4-28 slotted headless

**Strap Screw:** Maximum width of lugs: 11/32 in. [8.73]

### Nylon Housing

**Material**—Phenolic, Filled Flame Retardant

**Max. Continuous Temperature**—150°C, [302°F]

**Breakdown Voltage**—

Contact-to-Contact: 7800V

Contact-to-Ground: 9400V

**Dielectric Strength (RH 40% at Sea Level)**—300 Volts/mil thickness per ASTM #D149

**UL High Voltage Arc Tracking (Inches/min.)**—.49-.58 [12.45-14.73]

**Water Absorption (24 hrs. % wt. gain)**—0.45% per ASTM D570

**Flammability**—UL94V-1

**Chemical Resistance**—Resistant to acids, alkalis, and aliphatic hydrocarbons and ketones, per ASTM D543.

**Radiation Resistance (ergs g-1 (C))**—2.7 x 108 min.

**Color**—Black

**Note:** All part numbers are RoHS Compliant.

**200 Series, Heavy Duty Phenolic**

**Flat Base**

**Dovetail Base Mounted On Standard #60 Channel**

**Sectional Fanning Strips**

## 800 Series, Intermediate Heavy Duty

### Product Facts

- n An exceptionally compact block that accepts single or combinations of AWG wire sizes as large as #1/0 — at least 92 circuits per 6-foot length, 3/4 inch center-to-center spacing.
- n Tubular screw contact style accepts AWG wire sizes from #12 thru #1/0, solid or stranded.
- n Same block mounts on surface or channel — two-way mounting base fits standard channel or mounts directly to flat surfaces.
- n Packaged for rapid handling and assembly — snap-fit sections packaged 10 per carton.
- n Contacts conservatively rated at 155 amperes per circuit when used with copper wire.
- n Only one end section needed per block assembly.
- n Readily identify circuits — blocks available with painted marking surface or use removable vinyl marking strip. Preprinted marking strips are also available.
- n Factory assembled blocks available.
- n Nylon housing material for the most rugged applications.
- n Allen head screw for aluminum wire — screw tip design helps protect aluminum wire from overtightening. Slotted screw head for copper wire.
- n Intermediate Heavy Duty blocks snap-fit with 300 & 600V, Medium Duty phenolic, Heavy Duty nylon, polypropylene and phenolic and Fuse and Switch blocks.

This line of 600 volt blocks is rated up to 150 A and is available in a standard version and a corrosion resistant version.

**800 Series, Intermediate Heavy Duty, 600 V, 0.75" Pitch**

Same part used for both panel and channel mounting.

**Material & Finish**

**Housing Material**—Polyamide type 6/6, unfilled

**Max Continuous Temp.**—125°C [257°F]

**Water Absorption (24hrs. % wt. gain)**—1.5%

**Flammability**—UL94V-2

**Chemical Resistance**—Resistant to aromatic hydrocarbons, strong alkalis

**Radiation Resistance (ergs g-1 (C))**—8 x 10<sup>7</sup>

**Color**—Translucent white

**Electrical Properties**

**Voltage Rating**—Blocks meet 600V clearance and creepage requirements of NEMA, UL, and CSA standards for general industrial control equipment and panelboards. Withstand voltages in excess of IEEE switchgear standards for 750V.

**Breakdown Voltage, AC, 60Hz**—  
Contact-to-Contact: 8,800V  
Contact-to-Ground: 9000V

**Dielectric Strength — RH 40% @ Sea Level**—470-385 Volts/mil thickness per ASTM D149

**Operating Voltage**—Blocks meet 600V creepage and clearance requirements; withstand voltage greatly exceeds standards for 750V

**UL High Voltage Arc Tracking (in./min.)**—0.1-.35 [0.25-8.89]

**Contacts**

**Standard Contacts**

**Material**—Electrical grade copper conductor

**Screws**—Steel, zinc plated to resist corrosion in most applications

**Duramax Contacts (for highly corrosive atmospheres)**

**Tubular Screw**—Electrical grade copper tube with nickel plating; nickel plated brass screws. Nickel plating exceeds specification QQ-N-290 Class 1, Type VII.

**Wire Range**—#12-1/0 AWG, solid or stranded

**Wire Strip Length**—11/16" [17.46]

**Screw Type**—7/16" [11.11] - 20 slotted headless screw

Description	Part No.	Catalog No.
Tubular Screw, Unpainted	1437395-2	814
Tubular Screw, Painted	1437395-3	824-BU
Corrosion Resistant, Unpainted	5-1437389-8	D814-BU
Corrosion Resistant, Painted	5-1437389-9	D824
End Section	1-1437395-4	830-BU

**Notes:**

For factory assembled blocks on channel, prefix Catalog # with "0" and suffix with number of blocks desired. Without channel (maximum of 6 sections) delete "0". See page 275 for dimensions and other details.

Example: Ten tubular screw sections preassembled on channel = 082410

For unpainted factory assembled blocks supplied with a removable marking strip add -1 to Catalog Number.

For blocks with two or more different contact sections, imprinted marking strips or special features; consult Technical Support.

**Independent Testing Service Listing and Recognition**

**UL Wire Sizes**—Solid or Stranded, Tubular Screw

1 — #1/0 AWG, 1 — #1 AWG

## 400 Series, Ultra Heavy Duty

### Product Facts

#### 400 Series

- Compact 2/0 or 250 kcmil (MCM) block - at least 57 circuits per 6-foot length, 1-3/16" [30.16] center-to-center spacing.
- High current capacity snap-fit sectional block — tubular contacts accept single or combinations of wire sizes as large as 250 kcmil (MCM).
- Two contact styles available; rated up to 270 amperes for copper wire.
- Allen head screws allow maximum torque when using large wire sizes.
- Withstand voltages in excess of IEEE switchgear standards for 750 volts. Meet clearance and creepage spacing specified in UL, CSA, and NEMA Industrial Control Standards for 600 volts.
- Same block directly mounts on surface or channel mounts.
- Only one end section needed per block assembly.
- Readily identify circuits—order blocks with painted marking area or use removable vinyl marking strip. Preprinted marking strips are also available.
- Factory assembled blocks available.
- Ultra Heavy Duty phenolic block sections do not snap-fit with other block styles.

This Ultra Heavy Duty line includes the 400 Series rated up to 270 A.

**400 Series, Ultra Heavy Duty, 600 V, 1.19" [30.23] Pitch**

**Material & Finish**

**Housing Material**—Phenolic, filled flame retardant

**Flammability**—UL94V-1

**Color**—Black

**Contacts:**

**Material**—Electrical grade copper conductor; plated steel screws resist corrosion

**Tubular Screw Type**—

- Small: 1/2" [12.7] - 13 Hex
- Large: 3/4" [19.05] - 16 Hex socket set screw

**Mechanical Properties**

**Pitch (terminal spacing)**—1.19" [30.23]; 9 circuits/foot

**Wire Strip Length**—  
Tubular Screw (small): 1" [25.4]  
Tubular Screw (large): 1" [25.4]

**Electrical Properties**

**Maximum Current**—255A for a single 250MCM wire

**Operating Voltage**—Blocks meet 600V creepage and clearance requirements; withstand voltage greatly exceeds standards for 750V

**Wire Range**—Tubular Screw (small): #4-#2/0 AWG solid or stranded; Tubular Screw (large): #6 AWG-250 kcmil (MCM) solid or stranded

**Dielectric Strength (RH 40% @ sea level)**—300 V/mil thickness per ASTM D149

**Breakdown Voltage, AC, 60Hz**—  
Contact-to-Contact: 10,000V  
Contact-to-Ground: 10,000V

**UL High Voltage Arc Tracking (in./min.)**—49-.58 [12.45-14.73]

**Environmental Properties**

**Max. Continuous Temperature**—150°C [302°F]

**Water Absorption (24hrs. % wt. gain)**—.45% per ASTM D149

**Chemical Resistance**—Resistant to acids, alkalis, and aliphatic hydrocarbons and ketones per ASTM D543

**Radiation Resistance (ergs g-1 (C))**—2.7 x 108

**Note:** For Direct Mounting, use #10 pan head screws every six circuits. recommended torque: 15-20 in.-lbs.

**Same part used for both panel and channel mounting.**

## Engineering Notes

---

## Fuse & Switch

### Product Facts

#### High Density Blocks

- n Fuse and Switch Blocks rated 15A and 300V.
- n High Density 0.36" [9.14] centerline spacing saves panel space; at least 33 circuits per foot.

#### Fuse Blocks

- n Provide in-line circuit protection for virtually any circuit or group of circuits — select contacts for terminated or unterminated wire.
- n Remove, check and replace fuses safely and quickly — switch action fuse blocks open circuits before fuse can be removed or installed.
- n Contacts conservatively rated to 30 amperes.

#### Switch Blocks

- n Quickly and easily interrupt a circuit or group of circuits — insert switch blocks directly in line. Contacts available for terminated or unterminated wire.
- n Keep circuits open for extended periods — switch blade can be removed entirely from block for lock-out protection.
- n Rated to 15 amperes.

#### Common Features of 300 & 0300 Series

- n At least 91 circuits per 6-foot length, 3/4 inch center-to-center spacing.
- n Blocks meet 600 volt clearance and creepage spacings specified in UL, CSA, and NEMA Industrial Control Standards.
- n Choose nylon housing material — for more rugged applications; polypropylene for fire retardant characteristics.
- n Dovetail base fits standard mounting channel — can also be mounted on flat surfaces.
- n Only one end section needed per block assembly.

- n Readily identify circuits — mark directly on white, matte-surface puller assembly, marking tab on block, or use removable marking tape.
- n Open or close several circuits simultaneously — holes in puller handles allow use of nylon “ganging” rods.
- n Fuse and Switch block sections snap-fit with 300 & 600 Volt, phenolic Medium Duty, Heavy Duty, and Intermediate Heavy Duty blocks.

This broad line features High Density Blocks (Series 0135), Nylon & Polypropylene Blocks (Series 0300) and Phenolic Blocks (Series 300).

**Note:** All part numbers are RoHS Compliant.

P0380	4-1437397-7	P0380	4-1437397-7

**Specifications**

**Pitch**—0.75" [19.05] centerline, 16 circuits per foot

**Voltage Rating**—Blocks meet 600 volt creepage and clearance requirements of NEMA, UL and CSA for general industrial control equipment and panelboards. Withstand voltages greatly in excess of IEE switchgear standards for 750 volts.

**Fuse Size**—Any 13/32 x 1-1/2 in. [10.32 x 28.10] ferrule type cartridge fuse up to 25 amps, indicating or non-indicating, which meets Mil. Spec. F-15160.

**Standard Contacts**

**Material**—Electrical grade copper or copper alloy conductor. Steel Screws plated to resist corrosion in most industrial applications

**AL-CU Tubular Screw**—Aluminum compatibility with aluminum or copper conductors. AL-CU is tin-plated brass.

**Environmental Contacts  
(for highly corrosive atmospheres)**

**Tubular Screw**—Electrical grade copper tube with nickel plating. Nickel plated brass screws.

**Strap Screw**—Nickel plated brass straps and screws. Nickel plating meets specification QQ-N-290A Class I, Grade G.

**Polyamide Material:**

**Housing Material**—Polyamide, Unfilled Type 6/6

**Max. Continuous Temperature**—125°C, (257°F)

**Breakdown Voltage (AC, 60 Hz)**—

Contact-to-Contact: 7000V

Contact-to-Ground: 10,000V

**Dielectric Strength (RH 40% at Sea Level)**—470-385 Volts/mil thickness Per ASTM D149

**UL High Voltage Arc Tracking (inches/min.)**—0.1-0.35 [25-8.89]

**Water Absorption (24 hrs. % wt. gain)**—1.5% per ASTM D570

**Flammability**—UL94V-2

**Chemical Resistance**—Resistant to aromatic hydrocarbons, strong alkalies per ASTM D543

**Radiation Resistance (ergs g-1 (C))**—8 x 107

**Color**—Translucent White

**Polypropylene Material:**

**Housing Material**—Polypropylene, Filled self-extinguishing

**Max. Continuous Temperature**—105°C, (221°F)

**Breakdown Voltage (AC, 60Hz)**—

Contact-to-Ground: 10,000V

Contact-to-Contact: 7000V

**Dielectric Strength (RH 40% at Sea Level)**—500 Volts/mil thickness per ASTM D149

**UL High Voltage Arc Tracking (inches/min.)**—Did not track

**Water Absorption (24 hrs. % wt. gain)**—0.02% Per ASTM D570

**Flammability**—UL94V-0

**Chemical Resistance**—Resistant to most acids, alkalines, and saline solutions. Also resistant to higher aliphatic solvents and polar substances per ASTM D543

**Radiation Resistance (ergs g-1 (C))**—No data Available

**Color**—Opaque White

**Fuse Puller:**

Material	High-temperature, glass-reinforced nylon
Color	Black

**Switch Handle:**

Material	Polypropylene
Color	White

## One-Piece Phenolic Blocks

### Product Facts

- n Two, four, six, eight, and twelve circuit models available — 5/8" [15.88] center-to-center contact spacing.
- n No assembly required — each is a single, easily installed unit.
- n Three contact styles available — strap screw, captive strap clamp, and moving tubular contact.
- n Use wire up to #6 AWG with tubular contact. Strap screw and strap clamp contacts are available for #8 and smaller.
- n Withstand voltages in excess of IEEE standards for 750 volts. Meet clearance and creepage spacings specified in UL, CSA, and NEMA Industrial Control Standards for 600 Volts.
- n Strap contacts rated at 50 amperes — tubular contact conservatively rated at 70 amperes.
- n Pilot point screws supplied with strap screw and clamp contacts — speeds installation time.
- n Plain white marking strip supplied with each block — circuits are easily identified.
- n Special purpose blocks available—choose from blocks with solder posts, printed circuit board pins, or nuts on screw posts, removable circuit links, and a shorting bar.

Traditionally, these rugged One-Piece Blocks are the standard means of connection for heavy industrial applications like rail transport, utility, and traffic control industries. Ideal for dirty and vibration prone environments.

## B100, #B100 Series, One-Piece Blocks, 600 V — Phenolic

### Material & Finish

**Housing Material**—Phenolic, filled flame retardant

**Flammability**—UL94V-1

**Color**—Black

### Contacts

**Standard Material**—Electrical grade copper or copper alloy conductor. Steel screws plated to resist corrosion in most industrial applications.

**Brass Material**—For Corrosive Environment (2B100, 4B100 Series) Nickel plated brass straps and screws. Meets specification QQ-N-290A Class 1, Grade G

**Wire Range**—Strap Screw: #18-8 AWG solid or stranded; Tubular Clamp: #14-6 AWG solid or stranded

**Screw Type**—Strap Screw: #10-32 Binding Head; Tubular Clamp: #1/4" [6.35]-28 Set Screw

**Strap Screw**—7/16" [11.11] max. lug width

### Mechanical Properties

**Pitch (terminal spacing)**— .63" [16.00]

**Wire Strip Length**—Strap Screw: as needed for lugging; Tubular Clamp: 1/2" [12.1]

### Electrical Properties

**Maximum Current**—70A for a single #6 AWG wire

**Operating Voltage**—Blocks meet 600V creepage and clearance requirements for general industrial control equipment and panelboards; greatly exceeds IEEE switchgear standards for 750 volts.

**Dielectric Strength (RH 40% @ sea level)**—300 Volts/mil thickness per ASTM D149

**UL High Voltage Arc Tracking (in./min.)**—.49-.58 [12.45-14.73]

### Environmental Properties

**Max. Continuous Temperature**—150°C (302°F)

**Water Absorption (24hrs. % wt. gain)**—.45% per ASTM D570

**Chemical Resistance**—Resistant to acids, alkalis, and aliphatic hydrocarbons and ketones per ASTM D543

**Radiation Resistance (ergs G<sup>-1</sup> (C))**—2.7 x 10<sup>8</sup> min

#### Notes:

For prenumbered marking strip, add suffix "N" to Catalog Number. Cannot be used on 3B or 4B series.

For factory assembled hinged cover, add suffix "H" to Catalog Number. Cannot be used on 3B or 4B series.

For factory assembled thumbscrew-fastened cover, add suffix "T" to Catalog Number. Cannot be used on 3B or 4B series.

Screws and removable links shipped unassembled.

\*Shorting blocks are supplied with 2 shorting screws each.

Except for 3B and 4B Series

**Pre-Printed Marking Strips**

Circuit identification is greatly simplified with the use of pre-printed strips for BUCHANAN terminal blocks. These hot-stamped strips are available for all snap-assembled sections (except Fuse, Switch, and Circuit Breaker models which are marked individually). The strips can be ordered separately or pre-installed on factory assembled sectional block units.

Unlike painted or screened letters, hot-stamped letters are designed to not rub or flake off during industrial use so that they will retain their legibility.

Marking strips are stamped with consecutive numbers that can be ordered to read from left-to-right or right-to-left, and in vertical or horizontal positions. Number sequences can begin with any number. This allows circuits to be identified in a manner most consistent with the terminal block application.

## UL 1059 Basic Voltage Rating

Voltage ratings of terminal blocks are based on the minimum spacing between electrical conductive parts of opposite polarity or between an electrically conductive part and a metal mounting surface measured under two conditions: Through Air, defined as the distance an arc must take through the air to go from one live conductor to another or from a live conductor to ground; and Over Surface, defined as the distance an arc must take over a surface of the insulating material going from one terminal to ground, assuming the arc will travel along the surface rather than through the air. The following chart shows UL 1059 spacing requirements in inches.

### Voltage Rating

Description	Voltage	Spacing Requirements	
		Thru Air	Over Surface
Class A Service equipment including deadfront switchboards, panel boards, service entrance devices, etc.	51 - 150 151 - 300 251 - 600	1/2 [12.7] 3/4 [19.05] 1 [25.4]	3/4 [19.05] 1 1/4 [31.75] 2 [50.8]
Class B Commercial appliances including business equipment, electronic data processing equipment and the like	51 - 150 151 - 300 251 - 600	1/16 [1.59] 3/32 [2.38] 3/8 [9.53]	1/16 [1.59] 3/32 [2.38] 1/2 [12.7]
Class C General industrial and machine tools; controls which can be further defined as equipment falling under UL508	51 - 150 151 - 300 301 - 600	1/8 [3.18] 1/4 [6.35] 3/8 [9.53]	1/4 [6.35] 3/8 [9.53] 1/2 [12.7]
Devices having limited ratings <sup>a</sup>	51 - 300 301 - 600	1/16 [1.59] 3/16 [4.76]	1/8 [3.18] 3/8 [9.53]

<sup>a</sup>Load on any single circuit can not exceed 15 A at 51-150 V, 10 A at 151-300 V, 5 A at 301-600 V or the maximum current rating, whichever is less.

### Standard Test Criteria

Test	Per:
Heat Cycling (term)	UL486E Section 10
Static Heating (term)	UL486E Section 11
Secureness	UL486E Section 12
Pullout	UL486E Section 14
Heating Test (block)	UL1059 Section 10
Dielectric Withstand	UL1059 Section 11
Strength of Base	UL1059 Section 13
Tab Pull	UL1059 Section 14
VPTA	UL1059 Section 15
Salt Spray	MIL-202 Method 101
Solderability	MIL-202 Method 208
Solvents	MIL-202 Method 215

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

## JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели, кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
