

MICROCHIP

**EVB-KSZ9897
Gigabit Ethernet Switch
Evaluation Board
User's Guide**

Note the following details of the code protection feature on Microchip devices:

- Microchip products meet the specification contained in their particular Microchip Data Sheet.
- Microchip believes that its family of products is one of the most secure families of its kind on the market today, when used in the intended manner and under normal conditions.
- There are dishonest and possibly illegal methods used to breach the code protection feature. All of these methods, to our knowledge, require using the Microchip products in a manner outside the operating specifications contained in Microchip's Data Sheets. Most likely, the person doing so is engaged in theft of intellectual property.
- Microchip is willing to work with the customer who is concerned about the integrity of their code.
- Neither Microchip nor any other semiconductor manufacturer can guarantee the security of their code. Code protection does not mean that we are guaranteeing the product as "unbreakable."

Code protection is constantly evolving. We at Microchip are committed to continuously improving the code protection features of our products. Attempts to break Microchip's code protection feature may be a violation of the Digital Millennium Copyright Act. If such acts allow unauthorized access to your software or other copyrighted work, you may have a right to sue for relief under that Act.

Information contained in this publication regarding device applications and the like is provided only for your convenience and may be superseded by updates. It is your responsibility to ensure that your application meets with your specifications. MICROCHIP MAKES NO REPRESENTATIONS OR WARRANTIES OF ANY KIND WHETHER EXPRESS OR IMPLIED, WRITTEN OR ORAL, STATUTORY OR OTHERWISE, RELATED TO THE INFORMATION, INCLUDING BUT NOT LIMITED TO ITS CONDITION, QUALITY, PERFORMANCE, MERCHANTABILITY OR FITNESS FOR PURPOSE. Microchip disclaims all liability arising from this information and its use. Use of Microchip devices in life support and/or safety applications is entirely at the buyer's risk, and the buyer agrees to defend, indemnify and hold harmless Microchip from any and all damages, claims, suits, or expenses resulting from such use. No licenses are conveyed, implicitly or otherwise, under any Microchip intellectual property rights unless otherwise stated.

**QUALITY MANAGEMENT SYSTEM
CERTIFIED BY DNV
= ISO/TS 16949 =**

Microchip received ISO/TS-16949:2009 certification for its worldwide headquarters, design and wafer fabrication facilities in Chandler and Tempe, Arizona; Gresham, Oregon and design centers in California and India. The Company's quality system processes and procedures are for its PIC® MCUs and dsPIC® DSCs, KEELOQ® code hopping devices, Serial EEPROMs, microperipherals, nonvolatile memory and analog products. In addition, Microchip's quality system for the design and manufacture of development systems is ISO 9001:2000 certified.

Object of Declaration: EVB-KSZ9897

EU Declaration of Conformity

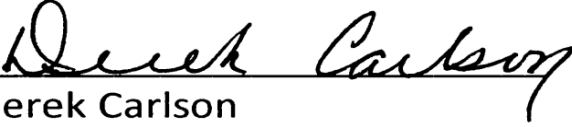

This declaration of conformity is issued by the manufacturer.

The development/evaluation tool is designed to be used for research and development in a laboratory environment. This development/evaluation tool is not a Finished Appliance, nor is it intended for incorporation into Finished Appliances that are made commercially available as single functional units to end users under EU EMC Directive 2004/108/EC and as supported by the European Commission's Guide for the EMC Directive 2004/108/EC (8th February 2010).

This development/evaluation tool complies with EU RoHS2 Directive 2011/65/EU.

This development/evaluation tool, when incorporating wireless and radio-telecom functionality, is in compliance with the essential requirement and other relevant provisions of the R&TTE Directive 1999/5/EC and the FCC rules as stated in the declaration of conformity provided in the module datasheet and the module product page available at www.microchip.com. For information regarding the exclusive, limited warranties applicable to Microchip products, please see Microchip's standard terms and conditions of sale, which are printed on our sales documentation and available at www.microchip.com.

Signed for and on behalf of Microchip Technology Inc. at Chandler, Arizona, USA.

Preface

NOTICE TO CUSTOMERS

All documentation becomes dated, and this manual is no exception. Microchip tools and documentation are constantly evolving to meet customer needs, so some actual dialogs and/or tool descriptions may differ from those in this document. Please refer to our web site (www.microchip.com) to obtain the latest documentation available.

Documents are identified with a “DS” number. This number is located on the bottom of each page, in front of the page number. The numbering convention for the DS number is “DSXXXXA”, where “XXXX” is the document number and “A” is the revision level of the document.

For the most up-to-date information on development tools, see the MPLAB® IDE online help. Select the Help menu, and then Topics to open a list of available online help files.

INTRODUCTION

This chapter contains general information that will be useful to know before using EVB-KSZ9897. Items discussed in this chapter include:

- [Document Layout](#)
- [Conventions Used in this Guide](#)
- [The Microchip Web Site](#)
- [Development Systems Customer Change Notification Service](#)
- [Customer Support](#)
- [Document Revision History](#)

DOCUMENT LAYOUT

This document describes how to use the EVB-KSZ9897 as a development tool for the Microchip EVB-KSZ9897 gigabit Ethernet switch. The manual layout is as follows:

- **Chapter 1. “Overview”** – Shows a brief description of the EVB-KSZ9897.
- **Chapter 2. “Board Details & Configuration”** – Includes details and instructions for using the EVB-KSZ9897.
- **Appendix A. “EVB-KSZ9897 Evaluation Board”** – This appendix shows the EVB-KSZ9897.
- **Appendix B. “EVB-KSZ9897 Evaluation Board Schematics”** – This appendix shows the EVB-KSZ9897 schematics.
- **Appendix C. “Bill of Materials (BOM)”** – This appendix includes the EVB-KSZ9897 Bill of Materials (BOM).

CONVENTIONS USED IN THIS GUIDE

This manual uses the following documentation conventions:

DOCUMENTATION CONVENTIONS

Description	Represents	Examples
Arial font:		
Italic characters	Referenced books	<i>MPLAB® IDE User's Guide</i>
	Emphasized text	...is the <i>only</i> compiler...
Initial caps	A window	the Output window
	A dialog	the Settings dialog
	A menu selection	select Enable Programmer
Quotes	A field name in a window or dialog	"Save project before build"
Underlined, italic text with right angle bracket	A menu path	<u>File>Save</u>
Bold characters	A dialog button	Click OK
	A tab	Click the Power tab
N'Rnnnn	A number in verilog format, where N is the total number of digits, R is the radix and n is a digit.	4'b0010, 2'hF1
Text in angle brackets < >	A key on the keyboard	Press <Enter>, <F1>
Courier New font:		
Plain Courier New	Sample source code	#define START
	Filenames	autoexec.bat
	File paths	c:\mcc18\h
	Keywords	_asm, _endasm, static
	Command-line options	-Opa+, -Opa-
	Bit values	0, 1
	Constants	0xFF, 'A'
Italic Courier New	A variable argument	<i>file.o</i> , where <i>file</i> can be any valid filename
Square brackets []	Optional arguments	mcc18 [options] <i>file</i> [options]
Curly brackets and pipe character: { }	Choice of mutually exclusive arguments; an OR selection	errorlevel {0 1}
Ellipses...	Replaces repeated text	var_name [, var_name...]
	Represents code supplied by user	void main (void) { ... }

THE MICROCHIP WEB SITE

Microchip provides online support via our web site at www.microchip.com. This web site is used as a means to make files and information easily available to customers. Accessible by using your favorite Internet browser, the web site contains the following information:

- **Product Support** – Data sheets and errata, application notes and sample programs, design resources, user's guides and hardware support documents, latest software releases and archived software
- **General Technical Support** – Frequently Asked Questions (FAQs), technical support requests, online discussion groups, Microchip consultant program member listing
- **Business of Microchip** – Product selector and ordering guides, latest Microchip press releases, listing of seminars and events, listings of Microchip sales offices, distributors and factory representatives

DEVELOPMENT SYSTEMS CUSTOMER CHANGE NOTIFICATION SERVICE

Microchip's customer notification service helps keep customers current on Microchip products. Subscribers will receive e-mail notification whenever there are changes, updates, revisions or errata related to a specified product family or development tool of interest.

To register, access the Microchip web site at www.microchip.com, click on Customer Change Notification and follow the registration instructions.

The Development Systems product group categories are:

- **Compilers** – The latest information on Microchip C compilers, assemblers, linkers and other language tools. These include all MPLAB C compilers; all MPLAB assemblers (including MPASM assembler); all MPLAB linkers (including MPLINK object linker); and all MPLAB librarians (including MPLIB object librarian).
- **Emulators** – The latest information on Microchip in-circuit emulators. This includes the MPLAB REAL ICE and MPLAB ICE 2000 in-circuit emulators.
- **In-Circuit Debuggers** – The latest information on the Microchip in-circuit debuggers. This includes MPLAB ICD 3 in-circuit debuggers and PICkit 3 debug express.
- **MPLAB IDE** – The latest information on Microchip MPLAB IDE, the Windows Integrated Development Environment for development systems tools. This list is focused on the MPLAB IDE, MPLAB IDE Project Manager, MPLAB Editor and MPLAB SIM simulator, as well as general editing and debugging features.
- **Programmers** – The latest information on Microchip programmers. These include production programmers such as MPLAB REAL ICE in-circuit emulator, MPLAB ICD 3 in-circuit debugger and MPLAB PM3 device programmers. Also included are nonproduction development programmers such as PICSTART Plus and PIC-kit 2 and 3.

CUSTOMER SUPPORT

Users of Microchip products can receive assistance through several channels:

- Distributor or Representative
- Local Sales Office
- Field Application Engineer (FAE)
- Technical Support

Customers should contact their distributor, representative or field application engineer (FAE) for support. Local sales offices are also available to help customers. A listing of sales offices and locations is included in the back of this document.

Technical support is available through the web site at:

<http://www.microchip.com/support>

DOCUMENT REVISION HISTORY

Revision A (March 2017)

- Initial Release of this Document.

Chapter 1. Overview

1.1 INTRODUCTION

The EVB-KSZ9897 evaluation board features three Gigabit Ethernet products, KSZ9897R, KSZ9031RNX and LAN7801. The KSZ9897R is a seven-port managed gigabit Ethernet switch. It has five 10BASE-T_e/100BASE-T_X/1000BASE-T physical layer transceivers (PHYs) and associated MAC units, and two MAC ports with individually configurable RGMII/MII/RMII interfaces. These two ports can be used for direct connection to a host Microprocessor or Microcontroller, another Ethernet switch or an Ethernet PHY.

KSZ9031 is a single chip 10/100/1000 Mbps IEEE 802.3 compliant Ethernet PHY. This demonstration board features the RGMII variant, KSZ9031RNX, of the KSZ9031 family. This feature-rich device offers diagnostic features, such as, LinkMD®, Parametric NAND tree and loopback functions to facilitate system bring-up and debugging in product testing and deployment. The on-chip termination resistors for the four differential pairs reduce the total board cost.

LAN7801 is a USB 3.1 to 10/100/1000 Gigabit Ethernet bridge with integrated OTP and EEPROM controller. The internal USB controller and USB PHY are compliant with the USB 3.1 Gen 1 SuperSpeed standard that implements Control, Interrupt, Bulk-in, and Bulk-out USB Endpoints. The Ethernet controller is compliant with the IEEE 802.3, IEEE 802.3u, IEEE 802.3ab, and 802.3az (Energy Efficient Ethernet) standards. The device provides multiple power management features, including Energy Efficient Ethernet (IEEE 802.3az), support for Microsoft's Always On Always Connected (AOAC), and "Magic Packet", "Wake On LAN", and "Link Status Change" wake events.

An external clock, DSC400, is used on this board to provide very low jitter clock pulses to the KSZ9897, LAN7801 and KSZ9031 Gigabit Ethernet controllers. The DSC400 is a four output crystal-less™ clock generator. It utilizes MEMS technology to provide excellent jitter and stability while providing excellent shock and vibration immunity. The device outputs wide frequency range of 2.3 MHz to 460 MHz with high noise rejection of -50 dBc. The DSC400 provides two independent select lines for choosing between two sets of pre-configured frequencies per bank. It also has two Output Enable pins to allow for enabling and disabling outputs.

On this board, the KSZ9897R Ethernet switch's five ports, 1 through 5, are connected directly to RJ45 Ethernet jacks with integrated magnetics which are available to use with any Ethernet devices. The rest of the two MAC ports are configured as RGMII interfaces. Port 6 is connected to a KSZ9031 Gigabit Ethernet PHY and an RJ45 Ethernet jack with integrated magnetics and port 7 is connected to a LAN7801 USB-to-Ethernet bridge and a USB connector.

The scope of this document is to describe the EVB-KSZ9897 evaluation board setup, which includes RGMII, SPI and I²C interface and corresponding jumper configurations. A simplified block diagram of the board is shown in [Figure 1-1](#).

FIGURE 1-1: KSZ9897 BLOCK DIAGRAM

1.2 REFERENCES

Concepts and material available in the following documents will be helpful when reading this document. Visit www.microchip.com for the latest documentation.

- *KSZ9897R Data Sheet*
- *KSZ9031RNX Data Sheet*
- *LAN7801 Data Sheet*
- *EVB-KSZ9897 Schematic*
- *DSC400 Data Sheet*

1.3 TERMS AND ABBREVIATIONS

EVB - Evaluation Board

MII - Media Independent Interface

MIIM - Media Independent Interface Management, also known as MDIO/MDC

RGMII - Reduced Gigabit Media Independent Interface

I²C - Inter Integrated Circuit

SPI - Serial Protocol Interface

PHY - Physical Transceiver

Chapter 2. Board Details & Configuration

This section includes sub-sections on the following KSZ9897 details:

- Power
- Resets
- Clock
- Configuration
- Mechanicals

2.1 POWER

2.1.1 +5V Power

A 5V/2A power supply should be connected to J7 on the board. The SW2 switch must be in the ON position to power the board. The F1 fuse is provided on the board for the over voltage protection.

2.2 RESETS

2.2.1 Power-on Reset

There are three jumpers, J15, J21 and J23, available for configuring the various reset options for the chips. Unless experimentation with reset is required, it is suggested to use the default configurations highlighted in bold text in the tables below. With these default settings, pressing the SW1 reset button will reset all three devices (KSZ9897, KSZ9031 and LAN7801). By changing the jumpers, the effect of SW1 can be limited to a subset of the three devices.

2.3 CLOCK

The evaluation board utilizes an external clock, DSC400, which provides 25 MHz 25 ppm clock to the KSZ9897, LAN7801 and KSZ9031. It also provides 125 MHz to the LAN7801.

2.4 CONFIGURATION

The following sub-sections describe the various board features and configuration settings. A top view of the KSZ9897 is shown in [Figure 2-1](#).

FIGURE 2-1: KSZ9897 TOP VIEW WITH CALLOUTS

Board Details & Configuration

2.4.1 Switch Settings

SW4 is an eight-position switch which controls many of the KSZ9897 configuration strap options. The KSZ9897 samples these signals at the rising edge of RESET_N to determine some internal settings. Following reset, the configuration of these switches is irrelevant. For initial bring-up, leave most switches in the OFF/OPEN position.

2.4.1.1 KSZ9897 MANAGEMENT INTERFACE MODE

The management interface can be configured to be SPI, I²C or MIIM (a.k.a. MDC/MDIO). This is controlled by switches 1 and 7 of SW4.

[Table 2-1](#) details the switch configuration for the management interface mode.

TABLE 2-1: MANAGEMENT INTERFACE MODE

SW4.7 (LED4_1)	SW4.1(LED3_1)	Mode
On	On	MDIO
On	Off	I ² C
Off	Don't Care	SPI

2.4.1.2 OTHER SWITCH SETTINGS

Please refer the device data sheet for the detailed configuration strap settings.

2.4.2 Jumper Settings

[Table 2-2](#), [Table 2-3](#) and [Table 2-4](#) describe the jumper settings. The preferred configuration is shown in bold text.

TABLE 2-2: TWO-PIN JUMPERS

Jumper	Label	Description	Open	Closed
J16	P6 100 Mbps	KSZ9897 Port 6 RGMII speed configuration strap setting. The setting of this jumper takes effect only after reset. This setting must match the actual link speed of port 6. The KSZ9897 port 6 speed can also be set via the SPI or I ² C interface by writing to registers 0x6300 (bit 4) and 0x6301 (bit 6). See the data sheet for details. This method is required when the port 6 link speed is 10 Mbps.	1000 Mbps	100 Mbps
J18	IBA Enable	Enable KSZ9897 In-Band-Management (IBA) (Configuration strap)	Disabled (Default)	Enabled
J28	EEPROM CS	Enable external EEPROM for LAN7801	Disabled	Enabled

TABLE 2-3: THREE-PIN JUMPERS

Jumper	Label	Description	Jumper 1-2	Jumper 2-3
J6	PWR SEL	Board power source: 5V barrel connector or USB	Power from barrel jack	USB powered (not recommended)
J8	VDET SEL	LAN7801 USB Vbus detect	Board +3.3V	Vbus from USB connector (Default)
J11	PME Mode SEL	LAN7801 PME Mode input pin	High (Default)	Low

TABLE 2-3: THREE-PIN JUMPERS (CONTINUED)

Jumper	Label	Description	Jumper 1-2	Jumper 2-3
J21	LAN7801 RESET SEL	LAN7801 Reset input source	Master SW1 & RC Circuit (Default)	Alternate RC circuit
J23	KSZ9897 RESET SEL	KSZ9031 Reset input source	Master SW1 & RC circuit	LAN7801 Reset output (Default)
J24	KSZ9897 MDIO enable	Install these jumpers to allow the KSZ9897 MIIM interface (together with the KSZ9031 MIIM interface) to be accessible from the LAN7801 or from J17. If the KSZ9897 management port is configured for SPI or I ² C, do not install these jumpers.		
J25	KSZ9897 MDC enable			

TABLE 2-4: MULTI-PIN HEADERS

Jumper	Label	Description	Configuration
J15	KSZ9031 RESET SEL	KSZ9031 Reset input source 3x2 header	Install a jumper on one of the three pairs only: 1-2: LAN7801 Reset output (Default) 3-4: Master SW1 & RC circuit 5-6: Alternate RC circuit
J17	MDIO/MDC ISO	KSZ9031 MIIM (MDC/MDIO) external access and jumpers 4hx2 header	Install jumpers 3-4 and 5-6 to access the KSZ9031 MIIM bus from the LAN7801. (Not currently available) For external access to KSZ9031 MIIM bus, install only jumper 2-4, and use pins 1,3,5 and 7 for external connection.
J14	GPIO	LAN7801 GPIO pins 8x1 header	Provides access to the GPIO pins of the LAN7801. No jumpers.
J22	AARDVARK	KSZ9897 SPI/I ² C header for external access 5x2 header	Supports Aardvark (TTP100005 - Total Phase Aardvark I ² C/SPI Host Adapter) and Cheetah (TTP100004 - Total Phase Cheetah SPI Host Adapter) from Totalphase.

2.4.3 SPI, I²C and MIIM Management

External access to the KSZ9031 MIIM bus is available via header J17 as outlined in the table above. External access to the KSZ9897 (either SPI, I²C or MIIM) is available via header J22 as outlined in [Table 2-4](#). If both connections are needed simultaneously, it will be necessary to remove resistor R95. Please visit [Table 2-5](#) and [Table 2-6](#) for I²C and SPI connections.

TABLE 2-5: I²C

I ² C Signal	Connector Pin
SDA	J22.3 and/or J22.8
SCL	J22.7 (R126 not currently installed)
GND	J22.2 and/or J22.10

Board Details & Configuration

TABLE 2-6: SPI

SPI Signal	Connector Pin
MISO	J22.5
MOSI	J22.8
SCK	J22.7
SS	J22.9
GND	J22.2 and/or J22.10

FIGURE 2-2: SPI/AARDVARK HEADER

Note: Communication formats and register details are provided in the device data sheets. Note that SPI or I²C provide access to all KSZ9897 registers, but MIIM does not. It only provides access to the PHY registers of the switch.

2.5 USING THE EVB-KSZ9897

The EVB-KSZ9897 board can be used to connect up to 7 Ethernet devices using 6 Ethernet ports and 1 USB port.

For example, connect a PC (PC1) on port 1 and another PC (PC2) to port 2. Configure both PCs for STATIC IP address using the Ethernet interface's properties windows. Then, run a simple PING command to test communication between the two PCs. Lastly, connect PC2 to the USB port, port 7, on the board.

A user can access the KSZ9897 switch's internal registers by connecting Aardvark I²C/SPI host adapter to jumper 22. The adapter is available to purchase from MicrochipDirect.com web site (part number TTP100005).

2.6 MECHANICALS

NOTES:

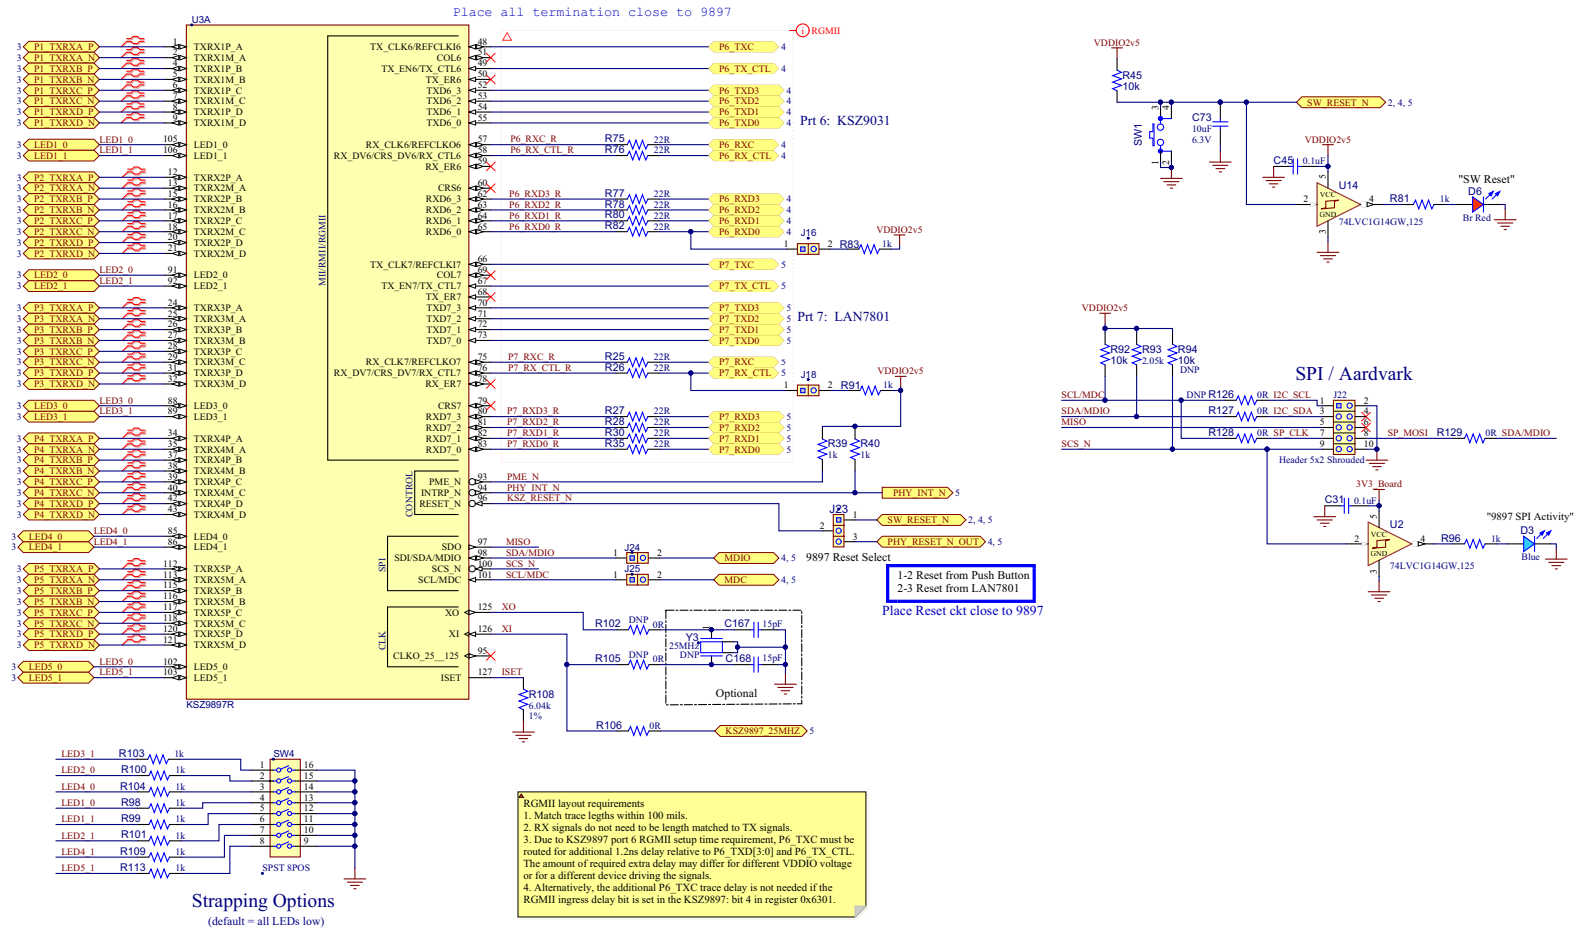

Appendix B. EVB-KSZ9897 Evaluation Board Schematics

B.1 INTRODUCTION

This appendix shows the EVB-KSZ9897 Evaluation Board Schematics.

FIGURE B-1: KSZ9897 FUNCTIONAL

RGMI layout requirements

1. Match trace lengths within 100 mils.
2. RX signals do not need to be length matched to TX signals.
3. Due to KSZ9897 port 6 RGMI setup time requirement, P6_TXC must be routed for additional 1.2ns delay relative to P6_TXD[3:0] and P6_TX_CTL.
4. Alternatively, the additional P6_TXC trace delay is not needed if the RGMI ingress delay bit is set in the KSZ9897: bit 4 in register 0x6301.

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели,
кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
