

**1.0Ω, 250V**

## Integrated Power Module for Small Appliance Motor Drive Applications

### Description

IRSM505-044 and IRSM515-044 are 3-phase Integrated Power Modules (IPM) designed for advanced appliance motor drive applications such as energy efficient fans and pumps. These advanced IPMs offers a combination of low  $R_{DS(on)}$  Trench FREDFET technology and the industry benchmark half-bridge high voltage, rugged driver in a familiar package. The modules are optimized for low EMI characteristics.

IRSM505-044 includes temperature feedback while IRSM515-044 does not.

### Features

- 250V 3-phase inverter including high voltage gate drivers
- Integrated bootstrap functionality
- Low 1.0Ω (max, 25°C)  $R_{DS(on)}$  Trench FREDFET
- Under-voltage lockout for all channels
- Matched propagation delay for all channels
- Temperature feedback via NTC (IRSM505-044 only)
- Optimized dV/dt for loss and EMI trade offs
- Open-source for single and leg-shunt current sensing
- 3.3V logic compatible
- Driver tolerant to negative transient voltage (-Vs)
- Advanced input filter
- Rugged design for PM fan and pump motors
- Isolation 1900V<sub>RMS</sub>, 1min

| Base Part Number | NTC | Package Type | Standard Pack |          | Orderable Part Number |
|------------------|-----|--------------|---------------|----------|-----------------------|
|                  |     |              | Form          | Quantity |                       |
| IRSM505-044      | Yes | SOP23        | Tube          | 240      | IRSM505-044PA         |
|                  |     | DIP23        | Tube          | 240      | IRSM505-044DA         |
|                  |     | DIP23A       | Tube          | 240      | IRSM505-044DA2        |
| IRSM515-044      | No  | SOP23        | Tube          | 240      | IRSM515-044PA         |
|                  |     | DIP23        | Tube          | 240      | IRSM515-044DA         |
|                  |     | DIP23A       | Tube          | 240      | IRSM515-044DA2        |

## Internal Electrical Schematic

IRSM505-044

IRSM515-044

## Absolute Maximum Ratings

Absolute maximum ratings indicate sustained limits beyond which damage to the module may occur. These are not tested at manufacturing. All voltage parameters are absolute voltages referenced to COM unless otherwise stated in the table.

† Qualification standards can be found at International Rectifier's web site <http://www.irf.com/>

†† Higher qualification ratings may be available should the user have such requirements. Please contact your International Rectifier sales representative for further information.

††† SOP23 package only. Higher MSL ratings may be available for the specific package types listed here. Please contact your International Rectifier sales representative for further information.

## Module Pin-Out Description

| Pin | Name              | Description                                          |
|-----|-------------------|------------------------------------------------------|
| 1   | COM               | Logic Ground                                         |
| 2   | V <sub>B1</sub>   | High Side Floating Supply Voltage 1                  |
| 3   | V <sub>CC1</sub>  | 15V Supply 1                                         |
| 4   | HIN1              | Logic Input for High Side Gate Driver - Phase 1      |
| 5   | LIN1              | Logic Input for Low Side Gate Driver - Phase 1       |
| 6   | NC                | Not Connected                                        |
| 7   | V <sub>B2</sub>   | High Side Floating Supply Voltage 2                  |
| 8   | V <sub>CC2</sub>  | 15V Supply 2                                         |
| 9   | HIN2              | Logic Input for High Side Gate Driver - Phase 2      |
| 10  | LIN2              | Logic Input for Low Side Gate Driver - Phase 2       |
| 11  | V <sub>TH</sub>   | Thermistor Output (IRSM505-044DA)                    |
|     | NC                | Not Connected (IRSM515-044DA)                        |
| 12  | V <sub>B3</sub>   | High Side Floating Supply Voltage 3                  |
| 13  | V <sub>CC3</sub>  | 15V Supply 3                                         |
| 14  | HIN3              | Logic Input for High Side Gate Driver - Phase 3      |
| 15  | LIN3              | Logic Input for Low Side Gate Driver - Phase 3       |
| 16  | NC                | Not Connected                                        |
| 17  | V+                | DC Bus Voltage Positive                              |
| 18  | U/V <sub>S1</sub> | Output - Phase 1, High Side Floating Supply Offset 1 |
| 19  | V <sub>R1</sub>   | Phase 1 Low Side Source                              |
| 20  | V <sub>R2</sub>   | Phase 2 Low Side Source                              |
| 21  | V/V <sub>S2</sub> | Output - Phase 2, High Side Floating Supply Offset 2 |
| 22  | V <sub>R3</sub>   | Phase 3 Low Side Source                              |
| 23  | W/V <sub>S3</sub> | Output - Phase 3, High Side Floating Supply Offset 2 |

## Application Notes

A basic application schematic is shown below.

**Figure 3:** Basic sensor-less motor drive circuit connection. Motor is connected to U, V, W

A complete reference design board for running any permanent magnet motor via sensorless sinusoidal control is available. The board – photo below – features the  $\mu$ IPM™-DIP module and the iMotion™ digital control IC. Reference design kits are available on the [International Rectifier website](http://www.irf.com) (irf.com > Design Resources > Reference Designs > Intelligent Power Modules)

**Figure 4:** Reference design board featuring the  $\mu$ IPM™-DIP module and the iMotion™ IRLMCF171 digital control IC

Figures 5-6 show the typical current capability for this module at specified conditions. In all tests, the application board – the IRMCS1071-1-D reference board – was placed in a box to prevent cooling from ambient airflow. The figures represent current capability for the module as used without any heat sink.  $\Delta T_{JA}$  represents the difference in temperature between the junction of the high-side V-phase Mosfet and the ambient, measured 10cm above and 6cm away from the board. Ambient temperature kept within 28-29°C.

**Figure 5:** Maximum sinusoidal phase current vs PWM switching frequency, no heat sink. Space Vector Modulation,  $V_+=150V$ ,  $T_A=28^\circ C$ ,  $T_J=128^\circ C$

**Figure 6:** Maximum sinusoidal phase current vs PWM switching frequency, no heat sink. Space Vector Modulation,  $V_+=150V$ ,  $T_A=28^\circ C$ ,  $T_J=98^\circ C$

The module contains an NTC – connected between COM and the  $V_{TH}$  pin – which can be used to monitor the temperature of the module. The NTC is effectively a resistor whose value decreases as the temperature rises. The NTC resistance can be calculated at any temperature as follows:

$$R_{TH} = R_{25} e^{\left[ B \left( \frac{1}{T_{TH}} - \frac{1}{T_{25}} \right) \right]}, \text{ where } R_{25} \text{ is } 47\text{k}\Omega \text{ and } B \text{ is } 4050\text{K}$$

An external resistor network is connected to the NTC, the simplest of which is one resistor pulled up to  $V_{CC}$  as shown in Figure 3. The  $V_{TH}$  vs NTC temperature,  $T_{TH}$  curve for this configuration is shown in Figure 7 below. The min, typical and max curves result from the NTC having a  $\pm 5\%$  tolerance on its resistance and  $\pm 2\%$  tolerance on the B-parameter.

Figure 8 shows the thermistor temperature,  $T_{TH}$  plotted against the high-side V-phase junction temperature,  $T_J$  for a module without a heat sink. It is thus advisable to shut down the module when  $T_{TH}$  reaches  $125^\circ\text{C}$ .

**Figure 7:**  $V_{TH}$  vs  $T_{TH}$  with  $V_{TH}$  pin pulled up to  $V_{CC}$  with a  $7.50\text{k}\Omega$  (1%, 100ppm) resistor. A 15V, 1% variation in  $V_{CC}$  is assumed.

**Figure 8:**  $T_{TH}$  vs  $T_J$  for a module without a heat sink.  $V_{CC}=15.3V$ ,  $R=7.50k\Omega$

## SOP23 Package Outline

Dimensions in mm

**#1**

16-MAX1.00

16-0.60 ± 0.10

**#16**

(1.165)

15\*1.778=26.67 ± 0.30

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

## JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели,  
кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
