2. For CNF models, the maximum output is 220 W with convection cooling.
3. For U-frame models, the total combined output power is 320W with a minimum of 27 CFM forced air, 180 W maximum with convection cooling.
4. For CNF models, the maximum output is 180 W with convection cooling.
5. For U-frame models, the total combined output power is 400W with a minimum of 27 CFM forced air, 200 W maximum with convection cooling.
6. For CNF models, the maximum output is 200 W with convection cooling.
7. Output can be custom set within range.
8. Measured at 10 kHz ~ 20 MHz bandwidth, with a 22 µF electrolytic and 0.1 µF ceramic capacitor on the output.
9. 1% minimum load is required to maintain ripple and regulation (10% for dual output models).
