

### General Description

The RFFM4227 is a low noise amplifier (LNA) designed for Wi-Fi 802.11b/g/n systems. The integrated input and output 50Ω match minimizes layout area in the customer's application, reduces the bill of materials and manufacturability cost. Performance is focused on a balance of low noise and gain that increases the receive sensitivity.

The RFFM4227 integrates a bypass path that enables a defined gain step. The device is provided in a 1.6mm x 1.6mm x 0.5mm, 6-pin DFN package.

6 Pad 1.6 x 1.6 mm DFN Package

### Product Features

- 2400 – 2500 MHz
- 15 dB LNA Gain
- 1.3 dB Noise Figure
- 6 dB Bypass Loss
- Input and Output Matched to 50 Ω
- Integrated 5 GHz Rejection Filter
- 1.6 x 1.6 mm DFN Package

### Functional Block Diagram

Top View

### Applications

- Wireless Routers
- Access Points
- Residential Gateways
- Customer Premise Equipment
- Internet of Things

### Ordering Information

| Part No.         | Description                        |
|------------------|------------------------------------|
| RFFM4227SB       | Sample Bag with 5 pcs              |
| RFFM4227SQ       | Sample Bag with 25 pcs             |
| RFFM4227SR       | 7" Reel with 100 pcs               |
| RFFM4227TR7      | 7" Reel with 2,500 pcs             |
| RFFM4227TR13-10k | 13" Reel with 10,000 pcs           |
| RFFM4227PCK-410  | Assembled Evaluation Board + 5 pcs |

### Absolute Maximum Ratings

| Parameter                                                                      | Rating                       |
|--------------------------------------------------------------------------------|------------------------------|
| DC Supply Voltage (No RF Applied)                                              | -0.3 to +5.5 V <sub>DC</sub> |
| Control Voltage                                                                | -0.5 to +4 V <sub>DC</sub>   |
| Storage Temperature                                                            | -40 to +150 °C               |
| RF Input Power into 50 Ω Load for 802.11b/g/ in LNA On Mode (No Damage)        | +20 dBm                      |
| RF Input Power into 50 Ω Load for 802.11b/g/ in <u>Bypass</u> Mode (No Damage) | +30 dBm                      |

Exceeding any one or a combination of the Absolute Maximum Rating conditions may cause permanent damage to the device. Extended application of Absolute Maximum Rating conditions to the device may reduce device reliability.

### Recommended Operating Conditions

| Parameter                            | Min  | Typ | Max  | Units |
|--------------------------------------|------|-----|------|-------|
| Operating Frequency                  | 2400 |     | 2500 | MHz   |
| Operating Temperature                | -40  |     | +85  | °C    |
| Power Supply Voltage V <sub>CC</sub> | 3    | 5   | 6    | V     |
| Control Voltage - High               | 2.8  | 3.1 | 3.3  | V     |
| Control Voltage - Low                | 0    |     | 0.2  | V     |

Electrical specifications are measured at specified test conditions. Specifications are not guaranteed over all recommended operating conditions.

### Electrical Specifications

| Parameter                               | Conditions                                                              | Min  | Typ | Max | Units |
|-----------------------------------------|-------------------------------------------------------------------------|------|-----|-----|-------|
| <b>LNA MODE</b>                         | Unless otherwise noted: V <sub>CC</sub> = 3.3V, T = +25 °C, CTRL = High |      |     |     |       |
| Noise Figure                            |                                                                         |      | 1.3 | 1.6 | dB    |
| Small Signal Gain                       |                                                                         | 14   | 15  |     | dB    |
| Gain Flatness Across any 40 MHz Channel |                                                                         | -0.2 |     | 0.2 | dB    |

|--------------|--------|--------------------------------------------------------------------------------------------------------------------------------------------|
| 1            | CTRL   | Control voltage                                                                                                                            |
| 2            | RF_IN  | RF input. This port is matched to 50 $\Omega$ and DC blocked                                                                               |
| 3            | GND    | Ground connection                                                                                                                          |
| 4            | GND    | Ground connection                                                                                                                          |
| 5            | RF_OUT | RF output. This port is matched to 50 $\Omega$ and DC blocked .                                                                            |
| 6            | VCC    | Supply voltage                                                                                                                             |
| Package Base | GND    | RF/DC ground. Use recommended via pattern to minimize inductance and thermal resistance. See PCB Mounting Pattern for suggested footprint. |

### Package Dimensions

#### Notes:

1. All dimensions are in millimeters. Angles are in degrees.
2. The terminal #1 identifier and terminal numbering conform to JESD 95-1 SPP-012.
3. Contact plating: NiPdAu

### PCB Mounting Pattern

Thermal vias for center slug should be incorporated into the PCB design. The number and size of thermal vias will depend on the application, the power dissipation, and the electrical requirements. Example of the number and size of vias can be found on the evaluation board layout.

#### Notes:

1. All dimensions are in millimeters. Angles are in degrees.
2. Ensure good package backside paddle solder attach for reliable operation and best electrical performance.

### Handling Precautions

| Parameter                        | Rating   | Standard                 |
|----------------------------------|----------|--------------------------|
| ESD – Human Body Model (HBM)     | Class 1C | ESDA / JEDEC JS-001-2012 |
| ESD – Charged Device Model (CDM) | Class C3 | JEDEC JESD22-C101F       |
| MSL – Moisture Sensitivity Level | Level 2  | IPC/JEDEC J-STD-020      |

Caution!  
ESD-Sensitive Device

### Solderability

Compatible with both lead-free (260°C max. reflow temp.) and tin/lead (245°C max. reflow temp.) soldering processes. Solder profiles available upon request.

Contact plating: NiPdAu

### RoHS Compliance

This part is compliant with EU 2002/95/EC RoHS directive (Restrictions on the Use of Certain Hazardous Substances in Electrical and Electronic Equipment). This product also has the following attributes:

- Lead Free
- Halogen Free (Chlorine, Bromine)
- Antimony Free
- TBBP-A (C<sub>15</sub>H<sub>12</sub>Br<sub>4</sub>O<sub>2</sub>) Free
- PFOS Free
- SVHC Free
- Qorvo Green

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

## JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели,  
кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
