

The S-5715 Series, developed by CMOS technology, is a high-accuracy Hall IC that operates with high-speed / middle-speed detection and low current consumption.

The output voltage changes when the S-5715 Series detects the intensity level of flux density. Using the S-5715 Series with a magnet makes it possible to detect the open / close and rotation state in various devices.

High-density mounting is possible by using the small SOT-23-3 or the super-small SNT-4A packages.

Due to its high-accuracy magnetic characteristics, the S-5715 Series can make operation's dispersion in the system combined with magnet smaller.

**Caution** This product is intended to use in general electronic devices such as consumer electronics, office equipment, and communications devices. Before using the product in medical equipment or automobile equipment including car audio, keyless entry and engine control unit, contact to ABLIC Inc. is indispensable.

## ■ Features

- |   |  |
|---|--|
| • Pole detection <sup>*1</sup> :                        | Detection of both poles, S pole or N pole              |
| • Detection logic for magnetism <sup>*1</sup> :         | Active "L", active "H"                                 |
| • Output form <sup>*1</sup> :                           | Nch open-drain output, CMOS output                     |
| • Magnetic sensitivity:                                 | $B_{OP} = 3.0 \text{ mT typ.}$                         |
| • Operating cycle (current consumption) <sup>*1</sup> : | Product with both poles detection                      |
|   | $t_{CYCLE} = 0.10 \text{ ms (1400 } \mu\text{A) typ.}$ |
|   | $t_{CYCLE} = 0.90 \text{ ms (155 } \mu\text{A) typ.}$  |
|   | $t_{CYCLE} = 5.70 \text{ ms (26 } \mu\text{A) typ.}$   |
|   | Product with S pole or N pole detection                |
|   | $t_{CYCLE} = 0.05 \text{ ms (1400 } \mu\text{A) typ.}$ |
|   | $t_{CYCLE} = 1.25 \text{ ms (60 } \mu\text{A) typ.}$   |
|   | $t_{CYCLE} = 6.05 \text{ ms (13 } \mu\text{A) typ.}$   |
| • Power supply voltage range:                           | $V_{DD} = 2.7 \text{ V to } 5.5 \text{ V}$             |
| • Operation temperature range:                          | $T_a = -40^\circ\text{C to } +85^\circ\text{C}$        |
| • Lead-free (Sn 100%), halogen-free <sup>*2</sup>       |  |

\*1. The option can be selected.

\*2. Refer to "■ Product Name Structure" for details.

## ■ Applications

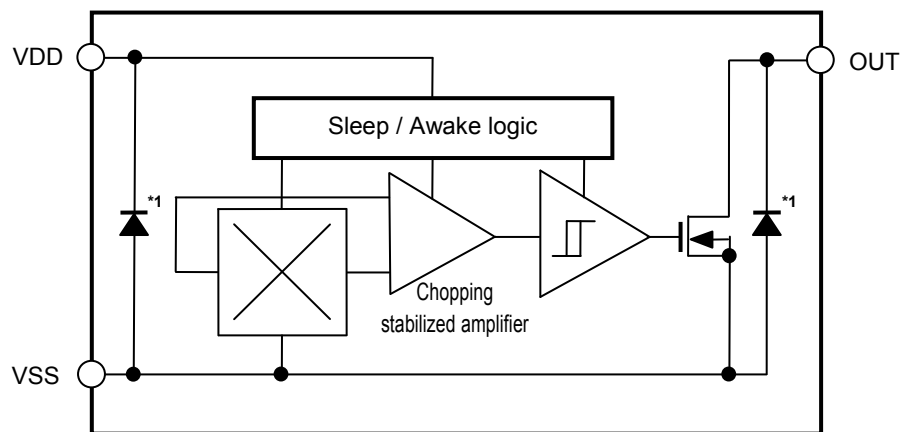

- Plaything, portable game
- Home appliance
- Housing equipment
- Industrial equipment

## ■ Packages

- SOT-23-3
- SNT-4A

## ■ Pin Configurations

### 1. SOT-23-3

Figure 3

Table 6

Pin No.	Symbol	Description
1	VSS	GND pin
2	VDD	Power supply pin
3	OUT	Output pin

### 2. SNT-4A

Figure 4

Table 7

Pin No.	Symbol	Description
1	VDD	Power supply pin
2	VSS	GND pin
3	NC <sup>*1</sup>	No connection
4	OUT	Output pin

<sup>\*1</sup>. The NC pin is electrically open.  
 The NC pin can be connected to the VDD pin or the VSS pin.

## ■ Absolute Maximum Ratings

**Table 8**

(Ta = +25°C unless otherwise specified)

Item		Symbol	Absolute Maximum Rating	Unit
Power supply voltage		$V_{DD}$	$V_{SS} - 0.3$ to $V_{SS} + 7.0$	V
Output current		$I_{OUT}$	$\pm 2.0$	mA
Output voltage	Nch open-drain output product	$V_{OUT}$	$V_{SS} - 0.3$ to $V_{SS} + 7.0$	V
	CMOS output product		$V_{SS} - 0.3$ to $V_{DD} + 0.3$	V
Power dissipation	SOT-23-3	$P_D$	430 <sup>*1</sup>	mW
	SNT-4A		300 <sup>*1</sup>	mW
Operation ambient temperature		$T_{opr}$	-40 to +85	°C
Storage temperature		$T_{stg}$	-40 to +125	°C

\*1. When mounted on board

[Mounted board]

(1) Board size: 114.3 mm × 76.2 mm × t1.6 mm

(2) Name: JEDEC STANDARD51-7

**Caution** The absolute maximum ratings are rated values exceeding which the product could suffer physical damage. These values must therefore not be exceeded under any conditions.

**Figure 5 Power Dissipation of Package (When Mounted on Board)**

## ■ Electrical Characteristics

## ■ Magnetic Characteristics

### 1. Product with both poles detection

Table 15

(Ta = +25°C, V<sub>DD</sub> = 5.0 V, V<sub>SS</sub> = 0 V unless otherwise specified)

Item	Symbol	Condition	Min.	Typ.	Max.	Unit	Test Circuit
Operation point*1	S pole	B <sub>OPS</sub>	–	1.4	3.0	4.0	mT
	N pole	B <sub>OPN</sub>	–	–4.0	–3.0	–1.4	mT
Release point*2	S pole	B <sub>RPS</sub>	–	1.1	2.2	3.7	mT
	N pole	B <sub>RPN</sub>	–	–3.7	–2.2	–1.1	mT
Hysteresis width*3	S pole	B <sub>HYSS</sub>	B <sub>HYSS</sub> = B <sub>OPS</sub> – B <sub>RPS</sub>		–	0.8	mT
	N pole	B <sub>HYSN</sub>	B <sub>HYSN</sub> =  B <sub>OPN</sub> – B <sub>RPN</sub>		–	0.8	mT

### 2. Product with S pole detection

Table 16

(Ta = +25°C, V<sub>DD</sub> = 5.0 V, V<sub>SS</sub> = 0 V unless otherwise specified)

Item	Symbol	Condition	Min.	Typ.	Max.	Unit	Test Circuit
Operation point*1	S pole	B <sub>OPS</sub>	–	1.4	3.0	4.0	mT
Release point*2	S pole	B <sub>RPS</sub>	–	1.1	2.2	3.7	mT
Hysteresis width*3	S pole	B <sub>HYSS</sub>	B <sub>HYSS</sub> = B <sub>OPS</sub> – B <sub>RPS</sub>		–	0.8	mT

### 3. Product with N pole detection

Table 17

(Ta = +25°C, V<sub>DD</sub> = 5.0 V, V<sub>SS</sub> = 0 V unless otherwise specified)

Item	Symbol	Condition	Min.	Typ.	Max.	Unit	Test Circuit
Operation point*1	N pole	B <sub>OPN</sub>	–	–4.0	–3.0	–1.4	mT
Release point*2	N pole	B <sub>RPN</sub>	–	–3.7	–2.2	–1.1	mT
Hysteresis width*3	N pole	B <sub>HYSN</sub>	B <sub>HYSN</sub> =  B <sub>OPN</sub> – B <sub>RPN</sub>		–	0.8	mT

\*1. B<sub>OPN</sub>, B<sub>OPS</sub>: Operation points

B<sub>OPN</sub> and B<sub>OPS</sub> are the values of magnetic flux density when the output voltage (V<sub>OUT</sub>) is inverted after the magnetic flux density applied to the S-5715 Series by the magnet (N pole or S pole) is increased (the magnet is moved closer).

Even when the magnetic flux density exceeds B<sub>OPN</sub> or B<sub>OPS</sub>, V<sub>OUT</sub> retains the status.

\*2. B<sub>RPN</sub>, B<sub>RPS</sub>: Release points

B<sub>RPN</sub> and B<sub>RPS</sub> are the values of magnetic flux density when the output voltage (V<sub>OUT</sub>) is inverted after the magnetic flux density applied to the S-5715 Series by the magnet (N pole or S pole) is decreased (the magnet is moved further away).

Even when the magnetic flux density falls below B<sub>RPN</sub> or B<sub>RPS</sub>, V<sub>OUT</sub> retains the status.

\*3. B<sub>HYSN</sub>, B<sub>HYSS</sub>: Hysteresis widths

B<sub>HYSN</sub> and B<sub>HYSS</sub> are the difference between B<sub>OPN</sub> and B<sub>RPN</sub>, and B<sub>OPS</sub> and B<sub>RPS</sub>, respectively.

**Remark** The unit of magnetic density mT can be converted by using the formula 1 mT = 10 Gauss.

## ■ Test Circuits

\*1. Resistor (R) is unnecessary for the CMOS output product.

**Figure 6 Test Circuit 1**

**Figure 7 Test Circuit 2**

**Figure 8 Test Circuit 3**

Figure 9 Test Circuit 4

\*1. Resistor (R) is unnecessary for the CMOS output product.

Figure 10 Test Circuit 5

■ Standard Circuit

\*1. Resistor (R) is unnecessary for the CMOS output product.

Figure 11

**Caution** The above connection diagram and constant will not guarantee successful operation. Perform thorough evaluation using the actual application to set the constant.

## ■ Operation

### 1. Direction of applied magnetic flux

The S-5715 Series detects the flux density which is vertical to the marking surface.

In product with both poles detection, the output voltage ( $V_{OUT}$ ) is inverted when the S pole or N pole is moved closer to the marking surface.

In product with S pole detection, the output voltage ( $V_{OUT}$ ) is inverted when the S pole is moved closer to the marking surface.

In product with N pole detection, the output voltage ( $V_{OUT}$ ) is inverted when the N pole is moved closer to the marking surface.

Figure 12 and Figure 13 show the direction in which magnetic flux is being applied.

#### 1.1 SOT-23-3

Figure 12

#### 1.2 SNT-4A

Figure 13

### 2. Position of Hall sensor

Figure 14 and Figure 15 show the position of Hall sensor.

The center of this Hall sensor is located in the area indicated by a circle, which is in the center of a package as described below.

The following also shows the distance (typ. value) between the marking surface and the chip surface of a package.

#### 2.1 SOT-23-3

Figure 14

#### 2.2 SNT-4A

Figure 15

### 3. Basic operation

The S-5715 Series changes the output voltage level ( $V_{OUT}$ ) according to the level of the magnetic flux density (N pole or S pole) applied by a magnet.

The following explains the operation when the magnetism detection logic is active "L".

#### 3.1 Product with both poles detection

When the magnetic flux density vertical to the marking surface exceeds  $B_{OPN}$  or  $B_{OPS}$  after the S pole or N pole of a magnet is moved closer to the marking surface of the S-5715 Series,  $V_{OUT}$  changes from "H" to "L". When the S pole or N pole of a magnet is moved further away from the marking surface of the S-5715 Series and the magnetic flux density is lower than  $B_{RPN}$  or  $B_{RPS}$ ,  $V_{OUT}$  changes from "L" to "H".

**Figure 16** shows the relationship between the magnetic flux density and  $V_{OUT}$ .

**Figure 16**

#### 3.2 Product with S pole detection

When the magnetic flux density vertical to the marking surface exceeds  $B_{OPS}$  after the S pole of a magnet is moved closer to the marking surface of the S-5715 Series,  $V_{OUT}$  changes from "H" to "L". When the S pole of a magnet is moved further away from the marking surface of the S-5715 Series and the magnetic flux density is lower than  $B_{RPS}$ ,  $V_{OUT}$  changes from "L" to "H".

**Figure 17** shows the relationship between the magnetic flux density and  $V_{OUT}$ .

**Figure 17**

### 3.3 Product with N pole detection

When the magnetic flux density vertical to the marking surface exceeds  $B_{OPN}$  after the N pole of a magnet is moved closer to the marking surface of the S-5715 Series,  $V_{OUT}$  changes from "H" to "L". When the N pole of a magnet is moved further away from the marking surface of the S-5715 Series and the magnetic flux density is lower than  $B_{RPN}$ ,  $V_{OUT}$  changes from "L" to "H".

**Figure 18** shows the relationship between the magnetic flux density and  $V_{OUT}$ .

**Figure 18**

## ■ Precautions

- If the impedance of the power supply is high, the IC may malfunction due to a supply voltage drop caused by feed-through current. Take care with the pattern wiring to ensure that the impedance of the power supply is low.
- Note that the IC may malfunction if the power supply voltage rapidly changes.
- Do not apply an electrostatic discharge to this IC that exceeds the performance ratings of the built-in electrostatic protection circuit.
- Large stress on this IC may affect on the magnetic characteristics. Avoid large stress which is caused by bend and distortion during mounting the IC on a board or handle after mounting.
- ABLIC Inc. claims no responsibility for any disputes arising out of or in connection with any infringement by products including this IC of patents owned by a third party.

※1. ランドパターンの幅に注意してください (0.25 mm min. / 0.30 mm typ.).

※2. パッケージ中央にランドパターンを広げないでください (1.10 mm ~ 1.20 mm)。

- 注意
1. パッケージのモールド樹脂下にシルク印刷やハンダ印刷などしないでください。
  2. パッケージ下の配線上のソルダーレジストなどの厚みをランドパターン表面から0.03 mm以下にしてください。
  3. マスク開口サイズと開口位置はランドパターンと合わせてください。
  4. 詳細は“SNTパッケージ活用の手引き”を参照してください。

※1. Pay attention to the land pattern width (0.25 mm min. / 0.30 mm typ.).

※2. Do not widen the land pattern to the center of the package (1.10 mm to 1.20 mm).

**Caution 1. Do not do silkscreen printing and solder printing under the mold resin of the package.**

**2. The thickness of the solder resist on the wire pattern under the package should be 0.03 mm or less from the land pattern surface.**

**3. Match the mask aperture size and aperture position with the land pattern.**

**4. Refer to "SNT Package User's Guide" for details.**

※1. 请注意焊盘模式的宽度 (0.25 mm min. / 0.30 mm typ.).

※2. 请勿向封装中间扩展焊盘模式 (1.10 mm ~ 1.20 mm)。

注意 1. 请勿在树脂型封装的下面印刷丝网、焊锡。

2. 在封装下、布线上的阻焊膜厚度 (从焊盘模式表面起) 请控制在 0.03 mm 以下。

3. 钢网的开口尺寸和开口位置请与焊盘模式对齐。

4. 详细内容请参阅 "SNT 封装的应用指南"。

## Disclaimers (Handling Precautions)

1. All the information described herein (product data, specifications, figures, tables, programs, algorithms and application circuit examples, etc.) is current as of publishing date of this document and is subject to change without notice.
2. The circuit examples and the usages described herein are for reference only, and do not guarantee the success of any specific mass-production design.  
ABLIC Inc. is not liable for any losses, damages, claims or demands caused by the reasons other than the products described herein (hereinafter "the products") or infringement of third-party intellectual property right and any other right due to the use of the information described herein.
3. ABLIC Inc. is not liable for any losses, damages, claims or demands caused by the incorrect information described herein.
4. Be careful to use the products within their ranges described herein. Pay special attention for use to the absolute maximum ratings, operation voltage range and electrical characteristics, etc.  
ABLIC Inc. is not liable for any losses, damages, claims or demands caused by failures and / or accidents, etc. due to the use of the products outside their specified ranges.
5. Before using the products, confirm their applications, and the laws and regulations of the region or country where they are used and verify suitability, safety and other factors for the intended use.
6. When exporting the products, comply with the Foreign Exchange and Foreign Trade Act and all other export-related laws, and follow the required procedures.
7. The products are strictly prohibited from using, providing or exporting for the purposes of the development of weapons of mass destruction or military use. ABLIC Inc. is not liable for any losses, damages, claims or demands caused by any provision or export to the person or entity who intends to develop, manufacture, use or store nuclear, biological or chemical weapons or missiles, or use any other military purposes.
8. The products are not designed to be used as part of any device or equipment that may affect the human body, human life, or assets (such as medical equipment, disaster prevention systems, security systems, combustion control systems, infrastructure control systems, vehicle equipment, traffic systems, in-vehicle equipment, aviation equipment, aerospace equipment, and nuclear-related equipment), excluding when specified for in-vehicle use or other uses by ABLIC, Inc. Do not apply the products to the above listed devices and equipments.  
ABLIC Inc. is not liable for any losses, damages, claims or demands caused by unauthorized or unspecified use of the products.
9. In general, semiconductor products may fail or malfunction with some probability. The user of the products should therefore take responsibility to give thorough consideration to safety design including redundancy, fire spread prevention measures, and malfunction prevention to prevent accidents causing injury or death, fires and social damage, etc. that may ensue from the products' failure or malfunction.  
The entire system in which the products are used must be sufficiently evaluated and judged whether the products are allowed to apply for the system on customer's own responsibility.
10. The products are not designed to be radiation-proof. The necessary radiation measures should be taken in the product design by the customer depending on the intended use.
11. The products do not affect human health under normal use. However, they contain chemical substances and heavy metals and should therefore not be put in the mouth. The fracture surfaces of wafers and chips may be sharp. Be careful when handling these with the bare hands to prevent injuries, etc.
12. When disposing of the products, comply with the laws and ordinances of the country or region where they are used.
13. The information described herein contains copyright information and know-how of ABLIC Inc. The information described herein does not convey any license under any intellectual property rights or any other rights belonging to ABLIC Inc. or a third party. Reproduction or copying of the information from this document or any part of this document described herein for the purpose of disclosing it to a third-party is strictly prohibited without the express permission of ABLIC Inc.
14. For more details on the information described herein or any other questions, please contact ABLIC Inc.'s sales representative.
15. This Disclaimers have been delivered in a text using the Japanese language, which text, despite any translations into the English language and the Chinese language, shall be controlling.

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

## JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели,  
кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
