

The Future of Analog IC Technology[®]

EVKT850-KNOB-Q-01A

Rotary Knob Kit for the MagAlpha

DESCRIPTION

The EVKT-KNOB is an evaluation kit for the MagAlpha magnetic position sensor family. The EVKT-KNOB allows users to run and test the MagAlpha sensor quickly. It is delivered assembled with a knob and magnet. The sensor is mounted in an end-of-shaft configuration.

The EVKT-KNOB is compatible with the MACOM kit, offering seamless connection and operation of the MagAlpha and allowing users to evaluate MagAlpha functionalities and performances, such as noise level, refresh rate, power-up time, magnetic field dependence, and so on.

FEATURES

- Ready-to-Use Knob with End-of-Shaft Magnet
- Extra Spacers
- Compatible with MagAlpha Communication Interface Kit (EVKT-MACOM)

APPLICATIONS

- Knobs
- Potentiometer Replacements
- Dials
- Appliances
- Consumer Goods

All MPS parts are lead-free, halogen-free, and adhere to the RoHS directive. For MPS green status, please visit the MPS website under Quality Assurance. "MPS" and "The Future of Analog IC Technology" are registered trademarks of Monolithic Power Systems, Inc.

OVERVIEW

Figure 1: EVKT-KNOB

Board Type

Different board types are available, and each of them has a different schematic and layout design. The board type to use is determined by the selected sensor part number.

Table 1: Board Type

Board Type	Kit Part Number	Board Part Number	MPS Chip Part Number
Board type 1	EVKT100-KNOB	EVMA100-Q-00A	MA100
	EVKT300-KNOB	EVMA300-Q-00A	MA300
	EVKT700-KNOB	EVMA700-Q-00A	MA700
	EVKT750-KNOB	EVMA750-Q-00A	MA750
Board type 2	EVKT102-KNOB	EVMA102-Q-01A	MA102
	EVKT302-KNOB	EVMA302-Q-01A	MA302
	EVKT310-KNOB	EVMA310-Q-01A	MA310
	EVKT702-KNOB	EVMA702-Q-01A	MA702
	EVKT710-KNOB	EVMA710-Q-01A	MA710
	EVKT730-KNOB	EVMA730-Q-01A	MA730
	EVKT800-KNOB	EVMA800-Q-01A	MA800
	EVKT820-KNOB	EVMA820-Q-01A	MA820
EVKT850-KNOB	EVMA850-Q-01A	MA850	

EVKT-KNOB Content

Figure 2: Kit Contents

1. EVMA board with MagAlpha mounted
2. 0.7mm and 2.0mm spacers
3. Knob with magnet
4. Extra cylinder magnet, NdFeB N35 D=5mm H=2.5mm (not shown)

CN1.14	IO4 ³	Pin 6 (IO).
CN1.15	IO2 ³	Pin 2 (IO).
CN1.16	IO3 ³	Pin 3 (IO).

NOTES:

- 2) The availability of this option depends of the chip part ID. Please refer to the part datasheet directly.
- 3) Please refer to the chip datasheet directly to know which feature is available on this pin.

MAGNETIC FIELD

A NdFeB cylinder magnet is mounted at the end of the aluminum shaft.

Table 6: Magnet Characteristics

Material	NdFeB (N35 or N35H)
Remanence (Br)	1.2T
Diameter	5mm
Height	2.5mm
Magnetization	Diametrical

How to Change the Mechanical Zero

Unscrew the knob with a Hex key 1/16". Hold the shaft with a pin inserted in the 2mm diameter hole and rotate the knob to the desired position. When tightening the screw, ensure that the shaft is fully inserted. Note that the zero position can also be adjusted through programming, as described in the MagAlpha datasheet.

Figure 13: Adjusting the Magnet Angular Position

How to Change the Magnetic Field Amplitude

The performance of the MagAlpha remains the same from 75mT to 150mT and higher (the MagAlpha has no maximum operating field). The critical region is the lower end of the specified range. Some parameters (i.e.: noise, linearity) deteriorate gradually when the magnetic field becomes weak. The two spacers enclosed in this evaluation kit allow the sensor (the noise level in particular) to be tested at low magnetic fields.

Figure 14: Magnetic Field vs. Air Gap for the Supplied Magnet

The EVMA nominal magnet sensor distance is 1.5mm, providing a magnetic field of 75mT. With the spacers, the field strength is reduced to 50mT or 25mT (see Table 7).

Table 7: Setting of the Air Gap

Spacer Thickness (mm)	Air Gap (mm)	Magnetic Field (mT)
None	1.5	75
0.7	2.2	50
2	3.5	25

Figure 15: Air Gap Setting

MAGNET SUPPLIERS

The table below shows a non-exhaustive list of possible magnet suppliers. The magnetization direction must be chosen wisely given the fact that most magnets sold are often axially magnetized, which is not a magnetization direction usually required in magnetic angle sensing applications. Angle sensing applications usually use diametrically magnetized magnets.

Maurer Magnetic

Maurer Magnetic has a selection of diametrically magnetized magnets well-suited for contactless rotary angle applications. Samples of the types mentioned below should always be available with no lead time.

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели, кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
