

## Cree® XLamp® XR-E LED

### PRODUCT DESCRIPTION

The XLamp XR-E LED is leading the LED lighting revolution with its unprecedented lighting-class brightness, efficacy, lifetime and quality of light. These lighting-class features enable the XLamp XR-E LED to replace many traditional light sources and save money with energy-efficient light and long lifetimes.

Cree XLamp LEDs bring high performance and quality of light to a wide range of lighting applications, including color-changing lighting, portable and personal lighting, outdoor lighting, indoor directional lighting, commercial lighting and emergency-vehicle lighting.

### FEATURES

- Available in white (2600 K to 10,000 K CCT), blue, royal blue and green
- Maximum drive current: up to 1000 mA
- Maximum junction temperature: 150 °C
- Industry-leading JEDEC standard pre-qualification testing
- Reflow solderable – JEDEC J-STD-020C compatible
- Electrically neutral thermal path
- RoHS- and REACH-compliant
- UL-recognized component (E326295)

### TABLE OF CONTENTS

|                                              |    |
|----------------------------------------------|----|
| Flux Characteristics - White .....           | 2  |
| Flux Characteristics - Color .....           | 3  |
| Characteristics .....                        | 4  |
| Relative Spectral Power Distribution .       | 5  |
| Relative Flux vs. Junction Temperature ..... | 6  |
| Electrical Characteristics .....             | 7  |
| Thermal design .....                         | 7  |
| Relative Flux vs. Current .....              | 8  |
| Typical Spatial Distribution .....           | 8  |
| Reflow Soldering Characteristics .....       | 9  |
| Notes .....                                  | 10 |
| Mechanical Dimensions .....                  | 12 |
| Tape and reel .....                          | 13 |
| Dry Packaging and Packaging .....            | 14 |

## FLUX CHARACTERISTICS (T<sub>j</sub> = 25 °C) - WHITE

The following tables describe the available colors and flux for XR-E LEDs by listing the correlated color temperature or dominant wavelength range for the entire family and by providing several base order codes. It is important to note that the base order codes listed here are a subset of the total available order codes for the product family. For more order codes, as well as a complete description of the order-code nomenclature, please consult the XR Family Binning and Labeling document.

| Color         | CCT Range |          | Base Order Codes<br>Min. Luminous Flux |           | Order Code           |
|---------------|-----------|----------|----------------------------------------|-----------|----------------------|
|               | Min.      | Max.     | Group                                  | Flux (lm) |                      |
| Cool White    | 5000 K    | 10,000 K | P4                                     | 80.6      | XREWHT-L1-0000-00901 |
|               |           |          | Q2                                     | 87.4      | XREWHT-L1-0000-00A01 |
|               |           |          | Q3                                     | 93.9      | XREWHT-L1-0000-00B01 |
|               |           |          | Q4                                     | 100       | XREWHT-L1-0000-00C01 |
|               |           |          | Q5                                     | 107       | XREWHT-L1-0000-00D01 |
|               |           |          | R2                                     | 114       | XREWHT-L1-0000-00E01 |
| Neutral White | 3700 K    | 5000 K   | P3                                     | 73.9      | XREWHT-L1-0000-008E4 |
|               |           |          | P4                                     | 80.6      | XREWHT-L1-0000-009E4 |
|               |           |          | Q2                                     | 87.4      | XREWHT-L1-0000-00AE4 |
|               |           |          | Q3                                     | 93.9      | XREWHT-L1-0000-00BE4 |

|               |           |          | N4                                     | 62.0      | XREWHT-L1-0000-006E7 |
|               |           |          | P2                                     | 67.2      | XREWHT-L1-0000-007E7 |
|               |           |          | P3                                     | 73.9      | XREWHT-L1-0000-008E7 |
|               |           |          | P4                                     | 80.6      | XREWHT-L1-0000-009E7 |

### Notes:

- Cree maintains a tolerance of +/- 7% on flux and power measurements, ±0.005 on chromaticity (CCx, CCy) measurements and ±2 on CRI measurements.
- Typical CRI for Cool White & Neutral White (3700 K – 10,000 K CCT) is 75.
- Typical CRI for Warm White (2600 K – 3700 K CCT) is 80.

## FLUX CHARACTERISTICS ( $T_j = 25\text{ }^{\circ}\text{C}$ ) - COLOR

The following tables describe the available colors and flux for XR-E LEDs by listing the correlated color temperature or dominant wavelength range for the entire family and by providing several base order codes. It is important to note that the base order codes listed here are a subset of the total available order codes for the product family. For more order codes, as well as a complete description of the order-code nomenclature, please consult the XR Family Binning and Labeling document.

| Color      | Dominant Wavelength Range |          |       |          | Base Order Codes<br>Min Radiant Flux (mW) |           | Order Code           |

## ELECTRICAL CHARACTERISTICS ( $T_j = 25^\circ\text{C}$ )

## THERMAL DESIGN

White  $\geq 5,000\text{ K}$ , Royal Blue, Blue

White  $< 5,000\text{ K}$ , Green

## RELATIVE FLUX VS. CURRENT ( $T_j = 25^\circ\text{C}$ )

## TYPICAL SPATIAL DISTRIBUTION

## REFLOW SOLDERING CHARACTERISTICS

In testing, Cree has found XLamp XR-E LEDs to be compatible with JEDEC J-STD-020C, using the parameters listed below. As a general guideline, Cree recommends that users follow the recommended soldering profile provided by the manufacturer of solder paste used.

Note that this general guideline may not apply to all PCB designs and configurations of reflow soldering equipment.

| Profile Feature                                       | Lead-Based Solder | Lead-Free Solder |
|-------------------------------------------------------|-------------------|------------------|
| Average Ramp-Up Rate ( $T_{s_{max}}$ to $T_p$ )       | 3 °C/second max.  | 3 °C/second max. |
| Preheat: Temperature Min ( $T_{s_{min}}$ )            | 100 °C            | 150 °C           |
| Preheat: Temperature Max ( $T_{s_{max}}$ )            | 150 °C            | 200 °C           |
| Preheat: Time ( $t_{s_{min}}$ to $t_{s_{max}}$ )      | 60-120 seconds    | 60-180 seconds   |
| Time Maintained Above: Temperature ( $T_L$ )          | 183 °C            | 217 °C           |
| Time Maintained Above: Time ( $t_L$ )                 | 60-150 seconds    | 60-150 seconds   |
| Peak/Classification Temperature ( $T_p$ )             | 215 °C            | 260 °C           |
| Time Within 5 °C of Actual Peak Temperature ( $t_p$ ) | 10-30 seconds     | 20-40 seconds    |
| Ramp-Down Rate                                        | 6 °C/second max.  | 6 °C/second max. |
| Time 25 °C to Peak Temperature                        | 6 minutes max.    | 8 minutes max.   |

Note: All temperatures refer to topside of the package, measured on the package body surface.

## NOTES

### Lumen Maintenance Projections

Cree now uses standardized IES LM-80-08 and TM-21-11 methods for collecting long-term data and extrapolating LED lumen maintenance. For information on the specific LM-80 data sets available for this LED, refer to the public LM-80 results document at [www.cree.com/xlamp\\_app\\_notes/LM80\\_results](http://www.cree.com/xlamp_app_notes/LM80_results).

Please read the XLamp Long-Term Lumen Maintenance application note at [www.cree.com/xlamp\\_app\\_notes/lumen\\_maintenance](http://www.cree.com/xlamp_app_notes/lumen_maintenance) for more details on Cree's lumen maintenance testing and forecasting. Please read the XLamp Thermal Management application note at [www.cree.com/xlamp\\_app\\_notes/thermal\\_management](http://www.cree.com/xlamp_app_notes/thermal_management) for details on how thermal design, ambient temperature, and drive current affect the LED junction temperature.

### Moisture Sensitivity

XLamp LEDs are shipped in sealed, moisture-barrier bags (MBB) designed for long shelf life. If XLamp LEDs are exposed to moist environments after opening the MBB packaging but before soldering, damage to the LED may occur during the soldering operation. The following derating table defines the maximum exposure time (in days) for an XLamp LED in the listed humidity and temperature conditions. LEDs with exposure time longer than the time specified below must be baked according to the baking conditions listed below.

Cree recommends keeping XLamp LEDs in their sealed moisture-barrier packaging until immediately prior to use. Cree also recommends returning any unused LEDS to the resealable moisture-barrier bag and closing the bag immediately after use.

| Temp. | Maximum Percent Relative Humidity |     |     |     |     |     |     |
|-------|-----------------------------------|-----|-----|-----|-----|-----|-----|
|       | 30%                               | 40% | 50% | 60% | 70% | 80% | 90% |
| 30 °C | 9                                 | 5   | 4   | 3   | 1   | 1   | 1   |
| 25 °C | 12                                | 7   | 5   | 4   | 2   | 1   | 1   |
| 20 °C | 17                                | 9   | 7   | 6   | 2   | 2   | 1   |

### Baking Conditions

It is not necessary to bake all XLamp LEDs. Only the LEDs that meet all of the following criteria must be baked:

1. LEDs that have been removed from the original MBB packaging.
2. LEDs that have been exposed to a humid environment longer than listed in the Moisture Sensitivity section above.
3. LEDs that have not been soldered.

LEDs should be baked at 80 °C for 24 hours. LEDs may be baked on the original reels. Remove LEDs from MBB packaging before baking. Do not bake parts at temperatures higher than 80 °C. This baking operation resets the exposure time as defined in the Moisture Sensitivity section above.

**Storage Conditions**

XLamp LEDs that have been removed from original MBB packaging but not soldered yet should be stored in a room or cabinet that will maintain an atmosphere of  $25 \pm 5$  °C and no greater than 10% RH (relative humidity). For LEDs stored in these conditions, storage time does not add to exposure time as defined in the Moisture Sensitivity section above.

**RoHS Compliance**

The levels of RoHS restricted materials in this product are below the maximum concentration values (also referred to as the threshold limits) permitted for such substances, or are used in an exempted application, in accordance with EU Directive 2011/65/EC (RoHS2), as amended through June 8, 2011. RoHS Declarations for this product can be obtained from your Cree representative or obtained from the Product Ecology section of [www.cree.com](http://www.cree.com).

**REACH Compliance**

REACH substances of high concern (SVHCs) information is available for this product. Since the European Chemical Agency (ECHA) has published notices of their intent to frequently revise the SVHC listing for the foreseeable future, please contact a Cree representative to insure you get the most up-to-date REACH Declaration. Historical REACH banned substance information (substances restricted or banned in the EU prior to 2010) is also available upon request.

**Vision Advisory Claim**

**WARNING:** Do not look at exposed lamp in operation. Eye injury can result. See LED Eye Safety at [www.cree.com/xlamp\\_app\\_notes/led\\_eye\\_safety](http://www.cree.com/xlamp_app_notes/led_eye_safety).

## MECHANICAL DIMENSIONS ( $T_A = 25\text{ }^{\circ}\text{C}$ )

All measurements are  $\pm .1\text{mm}$  unless otherwise indicated.

## TAPE AND REEL

All Cree carrier tapes conform to EIA-481D, Automated Component Handling Systems Standard.

All dimensions in mm.

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

## JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели,  
кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
