1.0 Installation & Operation

The SolaHD STV25K Series Surge Protective Device is a high-quality transient diversion system designed to protect sensitive equipment from damaging transient voltage surges resulting from load switching, lightning strikes, and other sources.

The installer should perform the following steps to ensure a quality installation. Please read all instructions before starting the installation of this product. These instructions do not replace national or local electrical codes. Check applicable codes to ensure compliance.

⚠ DANGER! Only qualified personnel should install or service this system. Electrical safety precautions must be followed when installing or servicing this equipment. To prevent risk of electrical shock, turn off and lock out all power sources to the unit before making electrical connections or servicing.

1.1 Environment

The unit is designed for indoor operation in an ambient temperature range of -40°C to $+60^{\circ}\text{C}$ (-40°F to $+140^{\circ}\text{F}$), with a relative humidity of 0% to 95% non-condensing.

Do not install in areas with excessive dust, corrosive vapors, flammable materials, or explosive atmospheres.

1.2 Mechanical Dimensions

1.3 DIN Rail Mounting

1. Tilt unit as illustrated.
2. Put unit onto the DIN rail.
3. Push unit downward until it stops.
4. Push at the lower front edge to lock.
5. Gently shake the unit to ensure that it is secure.

NOTE: Press the button located at the top (rear) of the enclosure to unlock and remove from the DIN rail.

1.4 Supplemental Enclosures

The STV25K must be installed inside an enclosure and located to prevent accidental contact with terminals during maintenance and service.

1.5 Maximum Current Capability

The total current draw in which the STV25K may continuously handle is 20 A.

NOTE: Overloading the unit can cause permanently damage.

1.6 Recommended Fuse

Bussman type SC-25 Class G, rated 250 V ac minimum; 25 A maximum or equivalent.

1.7 Nominal Voltage

The maximum continuous operating voltage (MCOV) for model STV 25K-10S is 150 V ac; 275 V ac for model STV 25K-24S.

NOTE: Failure to use the unit at its rated voltage can permanently damage the unit or provide inadequate surge protection.

1.8 Summary Alarm Contacts

Summary alarm Form C (1 N.O. and 1 N.C.) relay contacts rated 125 V ac, 5 A maximum are provided for remote indication of protection status. Connections can be made to these terminals using #18 AWG conductors.

1.9 Conductor Size

The conductor size to the input and output of the STV25K ranges from #14 AWG to #10 AWG.

1.10 Grounding

Input and output ground terminals must be connected for proper operation. This grounding is not only required for safety, but also for equipment performance. Incorrect grounding can reduce or impede the operation of the unit.

1.11 Voltage Protection Ratings (VPRs)

To maintain the voltage protection ratings marked on these products, as obtained by Underwriters Laboratories, Inc. in accordance with ANSI/UL 1449, 3rd edition, the Standard for Safety, Surge Protective Devices (SPDs), #12 AWG wire must be utilized to connect the STV25K to your protected load. Connections made with conductors other than #12 AWG may result in different VPRs.

1.12 Wiring Connections

Before making connections to the unit, verify that the unit model number and nameplate voltage rating are appropriate for connection to the intended power source. See Table 1 for voltage rating applications with typical power source configurations.

1.13 Applying Power

Apply power to the unit and ensure status indications are normal. Under normal conditions, the green LED is illuminated.

If the green LED is not illuminated, check all connections and ensure reliable and proper voltages are supplied to the unit. For further assistance, please contact SolaHD Technical Support at (800) 377-4384 or (847) 268-6651 or by e-mail at solahd.technicalservices@emerson.com.

Table 1: Voltage Ratings & Power Source Configurations

Model:
STV25K-10S
Nominal Voltage (50/60 Hz):
120 V ac
System Configuration:
Single-phase, 2W + G

Source Configuration:

Model:
STV25K-24S
Nominal Voltage (50/60 Hz):
240 V ac
System Configuration:
Single-phase, 2W + G

Source Configuration:

2.0 Specifications

Table 2: Technical Specifications

Parameters	Model	
	STV25K-10S	STV25K-24S
Nominal Input Voltage	120 V ac	240 V ac
System Configuration	Single-phase, 2W + G	Single-phase, 2W + G
Maximum Continuous Operating Voltage (MCOV)	150 V ac	275 V ac
Operating Frequency Range	47–63 Hz	
Input Current Rating	20 A	
Short Circuit Current Rating (SCCR)	5 kAIC when protected by a listed Class G fuse rated at 25 A, 480 V ac minimum	
Surge Current Rating	25 kA per phase	
Nominal Discharge Current (I_n)	3 kA	
Response Time	<0.5 ns	
Modes of Protection	All Modes: L–N, L–L, L–G, N–G	
EMI/RFI Noise Rejection	Normal mode: 50 dB minimum Common mode: 40 dB minimum	
Operating Temperature	-40°C to +60°C (-40°F to +140°F)	
Operating Humidity	0 to 95% non-condensing	
Dimensions, D x W x H	4.35 in. x 2.56 in. x 4.84 in. (110.5 mm x 65.0 mm x 122.9 mm)	
Net Weight	3.0 lb. (1.36 kg)	
Enclosure	Metal, IP20	
Mounting Type	DIN rail mounting NOTE: Optional chassis mounting bracket is available, P/N SDN-PMBRK2	
Connections	Screw terminals, #12 AWG	
Status Indication	Green LED, Form C relay contacts	
Safety Approvals	UL 1449 3 rd edition	
Warranty	10 year limited warranty	
UL 1449 3rd Edition Type 4 Voltage Protection Ratings (VPRs)		
Line to Neutral	500 V	N/A
Line to Line	N/A	900 V
Line to Ground	500 V	900 V
Neutral to Ground	500 V	N/A

3.0 Registration & Warranty

3.1 Product Registration

To register your product for updates and information on service and support, visit our Web site at: <http://www.solahd.com/support/registration.htm>.

3.2 Warranty Information

Please see the “Terms & Conditions of Sale”.

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели, кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
