

Features

- Low Distortion Transformer Signal Coupling (0.01% max)
- Complete Ring Detector Circuit
- Low Power Hook Switch
- Electronic Inductor/Gyrator Circuit
- Solid State Surge Protection
- Transient Protection Zener Diodes
- Complete Hybrid Circuit (2-4 Wire Converter) Included
- Compatible with All Modem Chip Sets
- V.32 bis/V.34 Compatible

Applications

- Modems
- Fax Machines
- Remote Data Acquisition
- Security Systems
- Voice Mail Systems
- PC Motherboard
- Computer Telephony
- Process Control
- Medical
- PBX
- Direct Broadcast Satellite

Block Diagram

Description

IXYS Integrated Circuits Division's Cybergate™ CYG2217 DAA module provides a complete telephone line interface circuit including a 2-4 wire converter for transmit and receive signal separation in a small 1.07" x 1.07" x 0.4" package. The module provides a fast and cost effective solution for designs that require an interface to the telephone line. The module is designed to meet FCC part 68 requirements, thus providing a low risk design solution.

Approvals

- UL Recognized Component: File E174201

Ordering Information

| Part | Description |
|---------|----------------------|
| CYG2217 | DAA Module (18/Tube) |

1 Specifications

1.1 Absolute Maximum Ratings @ 25°C

| Symbol | Ratings | Units |
|-----------------------------------------------------|---------|------------------|
| Isolation Voltage | 1000 | V _{rms} |
| Tip/Ring Load Current (Continuous) | 120 | mA |
| Hook Switch LED Drive Current | 50 | mA |
| Hook Switch LED Reverse Voltage | 5 | V |
| Ring Detect Phototransistor Voltage V _{CC} | 20 | V |
| Relative Humidity (non-condensing) | 10-85 | % |
| Operational Temperature | 0-70 | °C |
| Storage Temperature | 0-100 | °C |

Absolute maximum ratings are stress ratings. Stresses in excess of these ratings can cause permanent damage to the device. Functional operation of the device at conditions beyond those indicated in the operational sections of this data sheet is not implied.

1.2 DC Electrical Characteristics @ 25°C (Unless Otherwise Noted)

| Parameter | Conditions | Minimum | Typical | Maximum | Units |
|----------------------------------------------------------|--------------------------------------|---------|---------|---------|-------|
| On-Hook Impedance 2, 1 (R, T) per FCC 68.312 | @100V _{DC} Across Pins 1, 2 | 10 | - | - | MΩ |
| Off-Hook Line Leakage Current 2, 1 (R, T) per FCC 68.312 | @100V _{DC} Across Pins 1, 2 | - | - | 10 | μA |
| Power Supply Current @V _{CC} | V _{CC} = 5V | 4 | 5 | 6 | mA |
| Hook Switch Control Current @ OH | V _{OH} = 2.4V | 3.5 | 4.1 | 5 | mA |
| | V _{OH} = 5V | 11.8 | 12.4 | 13 | |
| Hook Switch Control Voltage Off-Hook On-Hook | - | 2 | 3 | 20 | V |
| | - | - | 0.2 | 0.5 | |

1.3 AC Signal Path Electrical Characteristics @ 25°C (Unless Otherwise Noted)

| Parameter | Conditions | Minimum | Typical | Maximum | Units |
|---------------------------------------------|------------------------------|---------|---------|---------|-------|
| Return Loss | 600Ω, 1800Hz | 39 | 40 | - | dB |
| Insertion Loss Transmit Receive | 600Ω, 1800Hz, Test Circuit 1 | 6 | 6.5 | 7 | dB |
| | 600Ω, 1800Hz, Test Circuit 2 | -1 | 0 | +1 | |
| Frequency Response | 300Hz - 3500Hz | -0.25 | - | +0.25 | dB |
| Longitudinal Balance On-Hook Off-Hook | Per FCC 68.310 | 60 | - | - | dB |
| | | 40 | - | - | |
| Transhybrid Loss | 600Ω, 1800Hz | - | -32 | -10 | dB |
| Total Harmonic Distortion | 600Ω, 1800Hz | - | -80 | - | dB |
| DC Loop Current | - | 20 | - | 120 | mA |

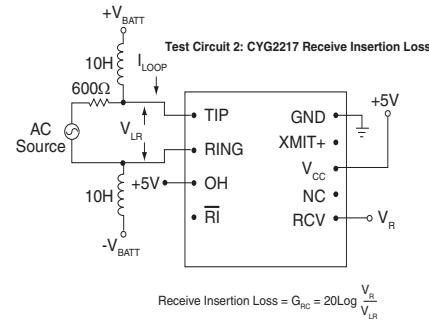

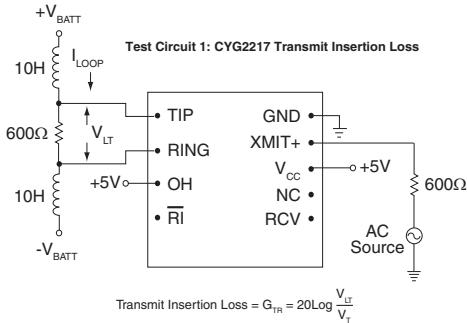

1.4 Ring Detection Circuit Electrical Characteristics @ 25°C (Unless Otherwise Noted)

| Parameter | Conditions | Minimum | Typical | Maximum | Units |
|--------------------------------------|-------------------------|---------|---------|---------|------------------|
| Ringing Voltage Detection Range | - | 20 | - | 150 | V _{rms} |
| Ringing Frequency Detection Range | - | 15 | - | 70 | Hz |
| Ringer Equivalence Number | - | - | 0.8B | - | - |
| RING (Pin 5) Output Voltage (Pulsed) | @ V _{CC} = +5V | - | - | 0.8 | V |
| Logic "0", Ring Present | | - | - | - | |
| Logic "1", Ring Not Present | | - | - | - | V _{CC} |

1.5 Surge and Isolation Electrical Characteristics @ 25°C (Unless Otherwise Noted)

| Parameter | Conditions | Minimum | Typical | Maximum | Units |
|--------------------------------------------------------------|----------------|---------|---------|---------|------------------|
| Surge Protection Voltage Tip & Ring (Pins 1, 2) | - | - | - | 300 | V |
| Isolation Voltage, Pins (18, 17, 16, 15, 14, 5, 4) to (1, 2) | Per FCC 68.302 | 1000 | - | - | V _{rms} |

1.6 Test Circuits

1.7 CYG2217 Pinouts and Definitions

| Pinouts | Pin | Name | Function |
|---------|-----|-----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| CYG2217 | 1 | TIP | Connection to telephone line Tip connected through an external fuse. |
| | 2 | RING | Connection to telephone line Ring conductor. |
| | 4 | OH | Driving this pin high asserts the off-hook condition. The hook switch LED is current limited by an internal 300Ω resistor |
| | 5 | RI | Active LOW indicates an incoming ring signal. This is pulsed LOW by the AC ring signal, and is not a steady state LOW during ringing. |
| | 14 | RCV | Provides the analog output signal from the 2-4 wire converter of the CYG2217. RCV uses a 2.5 volt reference signal, and therefore must be capacitively coupled to host equipment that uses a ground reference. |
| | 15 | NC | No Connection |
| | 16 | V _{CC} | Provides power to the CYG2217. Typically +5V, V _{CC} should not exceed 20V. |
| | 17 | XMIT+ | Provides the analog input signal from the 2-4 wire converter of the CYG2217. XMIT+ uses a 2.5 volt reference signal, and therefore must be capacitively coupled to host equipment that uses a ground reference. |
| | 18 | GND | Connection to host system ground. |
| | 18 | Top View | Pinout diagram showing the physical layout of the pins. TIP and RING are at the top, followed by OH, RI, RCV, NC, V _{CC} , XMIT+, and GND at the bottom. There are also two pairs of pins labeled 1-2 and 4-5. |

2 Manufacturing Information

2.1 Handling and Assembly Recommendations

The CYG2217 is not hermetically sealed, and should not be exposed to any liquid-based rinsing processes. IXYS Integrated Circuits Division recommends two (2) approaches: (1) the modem should be installed in a wave-soldering process that uses a no-clean soldering flux that will mostly evaporate during the normal wave-soldering processes, (2) the modem should be soldered in by hand after the rest of the card is wave-soldered.

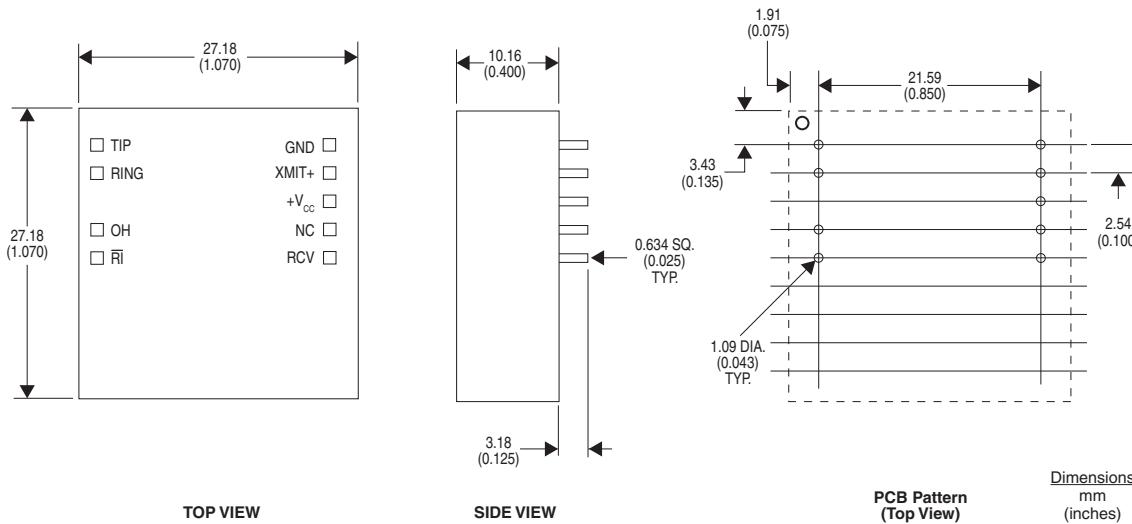

2.2 Reflow Profile

This product has a maximum solder temperature as shown below.

| Device | Maximum Temperature |
|---------|---------------------|
| CYG2217 | 260°C |

2.3 Mechanical Dimensions

2.3.1 CYG2217

IXYS Integrated Circuits Division makes no representations or warranties with respect to the accuracy or completeness of the contents of this publication and reserves the right to make changes to specifications and product descriptions at any time without notice. Neither circuit patent licenses nor indemnity are expressed or implied. Except as set forth in IXYS Integrated Circuits Division's Standard Terms and Conditions of Sale, IXYS Integrated Circuits Division assumes no liability whatsoever, and disclaims any express or implied warranty, relating to its products including, but not limited to, the implied warranty of merchantability, fitness for a particular purpose, or infringement of any intellectual property right.

The products described in this document are not designed, intended, authorized or warranted for use as components in systems intended for surgical implant into the body, or in other applications intended to support or sustain life, or where malfunction of IXYS Integrated Circuits Division's product may result in direct physical harm, injury, or death to a person or severe property or environmental damage. IXYS Integrated Circuits Division reserves the right to discontinue or make changes to its products at any time without notice.

OCEAN CHIPS

Океан Электроники

Поставка электронных компонентов

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибутором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибутором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели, кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
