

# MICRO SWITCH™ HDLS Series

## Heavy-Duty Limit Switches

### DESCRIPTION

Honeywell Sensing and Control's MICRO SWITCH™ heavy-duty limit switches' modular construction allows for a wide variety of actuator styles, operating heads, and electrical circuitry options. The plug-in versions greatly reduce downtime on high production lines as replacement of the switch is accomplished in seconds. The base receptacle contains all the wiring and conduit connection while the switching component with operating head easily assembles to the base and is attached with two screws.

### FEATURES AND BENEFITS

- Rugged, zinc die-cast housings with epoxy coating for indoor and outdoor applications
- Sealed to NEMA 1, 3, 4, 4X, 6, 6P, 12, 13; IP 65/66/67
- Full complement of bodies and head styles for design flexibility
- Wide variety of actuators and electrical circuitry options available
- Conduit options available for global applications
- Rotary actuated heads are field adjustable for CW actuation, CCW actuation or both to reduce inventory
- Keyed head design for secure head-to-body retention and 90 degree head rotation
- Plug-in and non plug-in bodies have identical operating characteristics and dimensionally interchangeable
- Actuating levers for single and double pole, plug-in and non plug-in bodies provide same tracking and minimize inventory
- UL, CSA, CE, and CCC for global use
- Fluorosilicone seals available for low temperature applications
- Fluorocarbon seals available for chemically harsh environments and higher temperature applications.
- Self-lifting pressure plate terminals saves wiring time

### APPLICATIONS

- Material handling
- Balers/compactors
- Automotive machine tools
- Conveyors
- Food & beverage machinery
- Machine tools
- Power plants
- Off-road equipment
- Agricultural equipment
- Valves
- Shipboard and dockside

# MICRO SWITCH™ HDLS Series

## MICRO SWITCH™ HDLS SERIES OPERATING HEADS

**SIDE ROTARY:** Available levers provide greater versatility. Heads may be positioned with shaft on any side. All are momentary action except maintained head (LSN Series).

**LSA - Standard:** 60° minimum overtravel, 15° maximum pretravel, 5° (single pole) and 7° (double pole) maximum differential travel. Operating temperature range from -12 °C to 121 °C [10 °F to 250 °F].\*

**LSR - Low operating torque:** 60° minimum overtravel, 15° maximum pretravel, 0.19 Nm [1.7 in lb] maximum operating torque. Operating temperature range from -1 °C to 121 °C [250 °F to 250 °F].\*

**LSN - Maintained contact:** Maintained on counterclockwise rotation and reset on clockwise rotation, and vice versa. Operating temperature range from -1 °C to 121 °C [30 °F to 250 °F].

**LSP - Low differential:** 68° minimum overtravel, 7° maximum pretravel, 3° (single pole) and 4° (double pole) maximum differential travel. Operating temperature range from -12 °C to 121 °C [10 °F to 250 °F].\*

**LSH - Low torque, low differential travel:** 68° minimum overtravel. Features low operating torque and narrow differential travel. Operating temperature range from -1 °C to 121 °C [30 °F to 250 °F].\*

**LSU - Low pretravel:** 5° max. pretravel, 70° min. overtravel, and a second step of 18° max. Operating temperature range from -12 °C to 121 °C [10 °F to 250 °F].\*

**LSL - Sequence action:** 48° minimum overtravel. Delayed action between operation of two poles. Operating temperature range from -12 °C to 121 °C [10 °F to 250 °F].\*

**LSM - Center neutral:** 53° minimum overtravel. One set of contacts operates on the clockwise rotation, and another set on the counterclockwise rotation. Operating temperature range from -1 °C to 121 °C [30 °F to 250 °F].\*

**LST - Momentary action with extra low torque:** 12 in oz of operating and full travel torque with momentary action. Operating temperature range from -12 °C to 121 °C [10 °F to 250 °F].\*

**LSS - Gravity return:** Has no return spring mechanism so weight of the lever must provide the return force. Extremely light operating torque (5 in oz max.) is useful in conveyor applications and can be operated by small or lightweight objects. Operating temperature range from -1 °C to 121 °C [30 °F to 250 °F].\*

**TOP ROTARY:** Available levers provide greater versatility. Heads may be positioned with shaft on any side. All are momentary action except maintained head.

**LSB:** With 100° minimum overtravel. Various levers that fit side rotary shafts may be used on the top rotary shaft. Switch is ideal when increased overtravel is required. Momentary action. Standard operating temperature range from -1 °C to 121 °C [30 °F to 250 °F].\*

**TOP PLUNGERS:** Available with 4,83 mm [0.19 in] minimum overtravel. Top pin plungers are offered in pin plunger, an adjustable plunger, and a roller plunger. Standard temperature range of -12 °C to 93 °C [10 °F to 200 °F].

**LSC - Top pin plunger:** A corrosion-resistant steel plunger for in-line actuating motion. Oil-tight seals on plunger and between the operating head and housing keep out coolant, dust, and chips. Momentary action.

**LSD - Top roller plunger:** A corrosion-resistant steel roller and plunger that is adjustable to 90° angles to accept cam or slide operation from any of two directions. Boot seal on the plunger. Momentary action

**LSV - Adjustable top pin plunger:** Provides easy application and saves on installation time. The operating points of the switch can be adjusted from 52,8 mm to 59,3 mm [2.085 in to 2.335 in]. Seals are the same as the pin plunger. Momentary action.

\*(Fluorocarbon seals are preferred for temperatures above 93 °C [200 °F]).

## Heavy Duty Limit Switches

### MICRO SWITCH™ HDLS SERIES OPERATING HEADS

**SIDE PLUNGERS:** Available with 4,83 mm [0.19 in] minimum overtravel. Side plungers are offered in plain plunger, an adjustable plain plunger, a roller plunger, and a maintained plunger. Standard temperature range of -12 °C to 93 °C [10 °F to 200 °F].

	<p><b>LSE - Side pin plunger:</b> For actuating motion inline with the plunger travel. Actuating head may be faced in any of four positions, 90° apart. A boot seal on the plunger and a gasket seal between the head and housing keep out coolant, dust, and chips. Momentary action.</p>		<p><b>LSW - Adjustable side pin plunger:</b> Has the same features of the side plain plunger plus the means to adjust the operating points of the switch from 41 mm to 47,4 mm [1.615 in to 1.865 in]. Momentary action.</p>
	<p><b>LSF - Side roller plunger:</b> Fits close quarters under cams and slides. The head may be faced in any of four positions, 90° apart. <u>The roller can be turned vertical or horizontal to the switch.</u> Boot seal on plunger. Momentary action.</p>		<p><b>LSG - Maintained contact side pin plunger:</b> Offers a maintained contact on actuation of the switch. A reverse motion of the plunger resets the switch. Sealing is the same as other side plunger actuation heads. Operating temperature range is -1 °C to 93 °C [30 °F to 200 °F].</p>

**WOBBLE LEVER ACTUATING HEADS:** Heads come with either a spring wire, Delrin® plastic rod, or steel cat whisker. Any movement of the lever (except pull) will actuate the switch. Standard temperature range of -12 °C to 93 °C [10 °F to 200 °F].

				
<p><b>LSJ1A-7M - Spring wire:</b> 300 Series SST wire may be formed for special applications.</p>	<p><b>LSJ1A-7N - Flexible actuator:</b> Designed with a tin-plated cable.</p>	<p><b>LSK1A-8C - Coil spring:</b> Designed with a 300 Series SST coil spring.</p>	<p><b>LSJ1A-7A - Plastic rod:</b> Recommended where possible scratching or marring by the actuator is to be avoided.</p>	<p><b>LSK1A-8A - Cat whisker:</b> 300 Series SST actuator designed for low operating force applications.</p>

\*(Fluorocarbon seals are preferred for temperatures above 93 °C [200 °F]).

# MICRO SWITCH™ HDLS Series

## SPECIAL OPTIONS

### HIGH TEMPERATURE/CHEMICAL RESISTANT SWITCHES

Completely fluorocarbon (FC)-sealed switches have a full FC body gasket covering the switch cavity. Rotary types have an extra FC seal on the operating shaft, while plunger versions have FC boot seals. They are for use in applications where the environment includes fire-resistant synthetic fluids. In addition to most all fluids, the FC-sealed switches may be used with such industrial fluids such as Cellulube, Fyrquell, Houghto-Safe, Pydraul, and other special cutting and hydraulic fluids. The additional FC seals also promote longer operating life for rotary-actuated HDLS switches in applications where the temperatures are normally -12 °C to 121 °C [10 °F to 250 °F]. If pre-wired with cable, then temperature limits are 105 °C [221 °F] dry and 60 °C [140 °F] wet.

To order, insert the additional letters **Y** and **C** in the appropriate places in the standard catalog listing, as shown below:

<b>LSA1A</b>	standard, side-rotary plug-in switch
<b>LSYAC1A</b>	completely FC-sealed version of LSA1A

### LOW TEMPERATURE SWITCHES

All forms of HDLS limit switches are also available in low-temperature construction. Design features include fluorosilicone diaphragm, shaft seals, and external booth seal (where applicable). If pre-wired with a cable, low temperature limits are -10 °C [14 °F] flex and -30 °C [-22 °F] non-flex.

To order, insert the additional letters **Y** and **B** in the appropriate places in the standard catalog listing, as shown below:

<b>LSA1A</b>	standard, side-rotary plug-in switch
<b>LSYB1A</b>	low-temperature version of LSA1A

### CONDUIT OPENINGS

For conduit openings other than 1/2-NPT and 3/4-NPT, substitute the following after LS in the catalog listing:

**LS3** PG13,5

**LS4** 20 mm

<b>LSA1A</b>	side rotary with 1/2-14 NPT conduit
<b>LS4A1A</b>	side rotary with 20 mm conduit

## TEMPERATURE LIMITS

	Standard HDLS				Low Temperature HDLS (Fluorosilicone Sealed): Y_B				High Temperature HDLS (Fluorocarbon Sealed)*: Y_C		
	Low Limit		High Limit		Low Limit		High Limit		Low Limit		High Limit
	-12 °C [10 °F]	-1 °C [30 °F]	93 °C [200 °F]	121 °C [250 °F]	-40 °C [-40 °F]	-29 °C [-20 °F]	93 °C [200 °F]	121 °C [250 °F]	-12 °C [10 °F]	-1 °C [30 °F]	121 °C [250 °F]
LSA - Side Rotary Momentary	X			X	X			X	X		X
LSB - Top Rotary		X		X		X		X		X	X
LSC - Top Plain Plunger	X		X		X		X		X		X
LSD - Top Roller Plunger	X		X		X		X		X		X
LSE - Side Plain Plunger	X		X		X		X		X		X
LSF - Side Roller Plunger	X		X		X		X		X		X
LSG - Side Plunger, Maintained		X	X			X	X			X	X
LSH - Side Rotary, Low PT, Low Torque		X		X		X		X		X	X
LSJ - Wobble Stick	X		X		X			X	X		X
LSK - Cat Whisker	X		X			X		X	X		X
LSL - Side Rotary, Sequence	X			X	X			X	X		X
LSM - Side Rotary, Center Neutral		X		X	X			X		X	X
LSN - Side Rotary, Maintained		X		X		X		X		X	X
LSP - Side Rotary, Low Pretravel	X			X	X			X	X		X
LSR - Side Rotary, Low Torque		X		X		X		X		X	X
LSV - Top Adjustable Plunger	X		X		X		X		X		X
LSW - Side Adjustable Plunger	X		X		X		X		X		X

\* For HDLS application wherein the upper temperature limit is normally above 93 °C [200 °F], much longer switch life can be obtained by using completely fluorocarbon-sealed switches rather than standard HDLS.

## Heavy Duty Limit Switches

### FACTORY SEALED PRE-WIRED LIMIT SWITCHES

#### Features

- Pre-wired with 6 ft STOOW-A cable or other 4, 5, or 9-pin connectors (other lengths available)
- Wire entry area completely factory sealed
- (Cable version) NEMA 1, 6, 6P, 12; IP67
- (Connector version) NEMA 1, 6, 6P, 12, 13; IP67

#### How to order:

To order factory sealed switches, add the modification codes shown below to the standard HDLS listings:

Circuitry	Cable	1/2 in connector
SPDT	C	A (4-pin mini-style) B (5-pin mini-style) DD (4-pin micro-style)
DPDT	M	R (9-pin mini-style)

Examples:

LSA1A**C** = LSA1A with 6 feet of 5-conductor STOW-A cable

LSJ2B**BM**-7N = LSJ2B-7N with 6 feet of 9-conductor STOOW-A cable

LSA1A**B** = LSA1A with a 5-pin mini-style connector

LSA1A**DD** = LSA1A with a 4-pin micro-style connector

**NOTE:** Connector versions available with 1/2 in conduit only.

### WIRING DIAGRAMS

Connectors = Numbers (mini-style)

Cables = Colors

#### Electrical Ratings: Connector Versions

Mini	600 VAC, 7A
Micro	300 VAC, 3A

### SWITCH WIRE POINTS FOR CONNECTOR/CABLE

#### Single-Pole Circuitry

3 = Ground

#### Double-Pole Circuitry

7 = Ground

# MICRO SWITCH™ HDLS Series

## ASSEMBLY MODIFICATIONS

Momentary action rotary switches can be furnished in other than the normal assembled conditions. To specify modifications, add the numbers shown below to the catalog listings. Modification number suffixes are:

- 1 Clockwise actuation only
- 2 Counterclockwise actuation only
- 3 Shaft to right of switch front
- 4 Shaft to left of switch front
- 5 Shaft to back of switch
- 7 Indicator light wired to NC circuit

### For example,

Catalog listing LSA1A23 is an LSA1A switch adjusted for counterclockwise actuation only. The operating shaft is to the right side of the switch when viewing it from the front (label side). No lever.

Catalog listing LSA8A7 is an LSA8A switch with the 240 volt indicator light wired to the NC circuit. No lever.

## PLUNGER ASSEMBLY MODIFICATIONS

Add the following modification numbers to the catalog listing in the plunger switch:

- 3 Side plunger to right of switch front
- 4 Side plunger to left of switch front
- 5 Side plunger to back of switch
- 6 Roller on top plungers perpendicular to mounting surface
- 7 Light on indicator versions wired to NC circuit
- 8 Roller on side plungers in vertical position

### For example,

Catalog listing LSF1A3 is an LSF1A switch with the side roller plunger to the right side.

## PLUG-IN VS. NON-PLUG-IN MODELS

Honeywell HDLS limit switches are offered in two styles: non-plug-in design and plug-in design. With plug-in construction, the wiring and conduit connection is made to the base receptacle. This feature reduces downtime as the plug-in unit can be removed and replaced without disconnecting the wiring or conduit connections to the switch.

## MICRO SWITCH™ HDLS SERIES ELECTRICAL RATINGS ac Volts; Pilot Duty: AC15, A600/B600

Electrical Rating	Circuitry	Vac	Amps at 0.35 Power Factor Make	Amps at 0.35 Power Factor Break
<b>A*</b> <b>AC15,</b> <b>A600</b>	SPDT DPDT	120	60	6

\* Use at voltage indicated for light. Wired to NO circuit. Upper temperature limit for lighted units is 93°C [200 °F].

\*\* Plug-in listings include base receptacle

\*\*\* Completely fluorocarbon-sealed switches are preferred for temperatures above 93 °C [200 °F].

<sup>1</sup> Mechanical trip before electrical trip.

<sup>2</sup> Total travel is approximately 80° max. Maintained contact switch normally used with LSZ53 yoke actuator.

<sup>3</sup> Gold-plated contacts

To order a fluorocarbon sealed switch, insert the letters **Y** and **C** into the catalog listing as follows. The LSA1A limit switch is changed to a LSY<sup>Y</sup>AC1A limit switch.

Heavy Duty Limit Switches

**Levers**

**Table 2. Common levers for use with MICRO SWITCH™ HDLS Rotary Switches**

Levers for use with side or top rotary actuated switches are available in a wide choice of sizes and materials. The most common listings are shown below. Rollers may be on either side of the lever to best match the external actuating mechanism.

				
<b>LSZ51A&amp;C</b> fixed rotary lever, nylon roller, front/ backl	<b>LSZ51B&amp;D</b> fixed rotary lever, steel roller, front/ back	<b>LSZ59A,LSZ59B, LSZ59C,LSZ59D</b> short fixed lever, front/back		<b>LSZ69CA</b> spoke lever - 6 inches
				
<b>LSZ55A,LSZ55B, LSZ55C,LSZ55D</b> offset lever, front/back	<b>LSZ60</b> one-way roller lever	<b>LSZ53A, LSZ53B, LSZ53C, LSZ53D</b> yoke lever, nylon and steel rollers, front/back placement	<b>LSZ54R</b> spring wire 304,8 mm [12 in]	
				
<b>LSZ52A, LSZ52B, LSZ52C, LSZ52D</b> adj. lever, nylon/ steel, front/back	<b>LSZ52J</b> adjustable lever, nylon roller 25,4 mm [1 in]	<b>LSZ52K</b> adjustable lever, nylon roller 38,1 [1.5 in]	<b>LSZ54M</b> aluminum rod 139,7 mm [5.5 in]	<b>LSZ61</b> loop 152,4 mm [6 in]
				
			<b>LSZ67CA</b> Plastic conveyor roller	<b>LSZ68</b> rod w/ spring 304,8 mm [12 in]
				
				<b>LSZ54N</b> stainless steel rod 330,2 mm [13 in]

## Heavy Duty Limit Switches

### SPECIAL APPLICATIONS

#### HIGH CAPACITY LIMIT SWITCH

##### Features

- High dc current ratings
- 20 A rating at 120 Vac (single pole)
- Plug-in or non-plug in
- Positive retention lever arm
- High resistance to seismic shock

This series has a wide gap contact block that handles a higher make/break dc load. In addition, a special lever arm has a serrated shaft hole and a cap screw with locking nut for attaching the lever to the rotary shaft. This assures a firm grip on the operating shaft and positive retention of the lever adjustment.

The need for precise operation, coupled with severe environmental conditions places rigid demands on any control. Honeywell satisfies these demands with its high capacity HDLS, designed to perform reliably under these conditions.

Voltage	Single Pole		Double Pole	
	Resistive Load	Inductive Load	Resistive Load	Inductive Load
125 Vdc	2.0 A	1.0 A	1.0 A	0.4 A
250 Vdc	0.7 A	0.4 A	0.4 A	0.2 A
120 Vac	20 A	20 A	10 A	10 A
240 Vac	15 A	15 A	7.5 A	7.5 A
480 Vac	10 A	10 A	5 A	5 A
600 Vac	5 A	5 A	2.5 A	2.5 A

Maximum operating rate - 15 operations per minute.

### Listings

<b>LSQ051</b>	Double pole, non-plug-in, 0.75 in conduit	
<b>LSQ052</b>	Double pole, plug-in, 0.75 in conduit	
<b>LSQ053</b>	Single pole, non-plug-in, 0.5 in conduit	
<b>LSQ054</b>	Single pole, plug-in, 0.5 in conduit	
<b>LSZ616</b>	Replacement lever for above listings	
<b>Pretravel</b>	17° max.	
<b>Diff. travel</b>	8° max.	
<b>Overtravel</b>	58° min.	
<b>Oper. torque</b>	0,45 Nm (4 in-lb) max.	
<b>Action</b>	CW and CCW (spring return)	

# MICRO SWITCH™ HDLS Series

## SPECIAL APPLICATIONS

### GRAVITY RETURN SIDE ROTARY SWITCHES (LSS)

LSS1H gravity-return, side-rotary switches have no return spring mechanism. The weight of the actuating lever must provide the force to restore it to the free position. The extremely light 5 in-oz. max. operating torque is useful in conveyor applications since it enables operation by small or lightweight objects. Because the head is unsealed, the **LSS1H** is classified as NEMA 1. However, the switch cavity is sealed to protect the switch contacts.

	<b>LSS1H</b>
<b>Description</b>	Gravity-return side rotary
<b>Circuitry</b>	SPDT, double break
<b>Contacts</b>	Silver
<b>Sealing</b>	NEMA 1
<b>Electrical rating</b>	(B) NEMA B600
<b>Body style</b>	Plug-in
<b>Conduit (NPT)</b>	0.5 in
<b>Differential travel</b>	12° max.
<b>Total travel (no stop)*</b>	360°
<b>Operating torque</b>	0,035 Nm [5 in-oz] max.

\* Switch has approximately 180° dwell of the normally closed and normally open switch contacts.

### EXTRA LOW TORQUE SIDE ROTARY SWITCHES (LST)

LST1H extra-low torque, side-rotary switches have a low force return spring and a maximum operation torque of 12 in-oz. It is rated as NEMA 1 due to an unsealed head. The switch cavity is sealed to protect the switch contacts.

	<b>LST1H</b>
<b>Description</b>	Extra-low torque side rotary
<b>Circuitry</b>	SPDT, double break
<b>Contacts</b>	Silver
<b>Sealing</b>	NEMA 1
<b>Electrical rating</b>	(B) NEMA B600
<b>Body style</b>	Plug-in
<b>Conduit (NPT)</b>	0.5 in
<b>Pretravel</b>	15° max.
<b>Differential travel</b>	5° max.
<b>Overtravel</b>	60' min.
<b>Total travel</b>	75° nom.
<b>Operating torque</b>	0,085 Nm [12 in-oz] max.

## Heavy Duty Limit Switches

# MICRO SWITCH™ HDLS Series

## ALSO AVAILABLE

**Fully potted MICRO SWITCH™ HDLS heavy-duty limit switches** provide an extra degree of protection in harsh environments by sealing the basic switch cavity with epoxy. These switches are the same as the non-plug-in HDLS except that the entire switch cavity is filled with epoxy in addition to the conduit entrance. The fully potted HDLS switches are pre-leaded, with either cable or connectors.

- Excellent sealing capability for harsh-duty food and beverage wash downs and severe machine tool environments
- Extra diaphragm sealing
- 12 inch ST00W-A cable or connector version (other lengths available)
- Cable versions: NEMA 1, 6, 6P, 12
- Connector versions: NEMA 1, 6, 6P, 12, 13
- All fluorocarbon seals (low temperature available)
- UL, CSA, CE, CCC

**MICRO SWITCH™ HDLS switches are also available in all stainless-steel versions.** Designed for use in highly corrosive environments, such as petrochemical plants, food processing plants, shipboard, and dockside locations. The type 316 cast stainless steel body is designed to minimize crevices where food particles could become trapped in water. The actuator, operating head, and screws are also stainless steel. All seals are fluorocarbon to provide excellent chemical resistance and to withstand operating temperatures up to 121 °C [250 °F] and pressurized steam cleaning. Pre-leaded and epoxy-filled versions also available.

- Corrosion-resistant stainless steel non-plug in body, head, and rotary shaft
- Stainless steel levers
- Fluorocarbon seals
- NEMA 1, 3, 3R, 4, 4X, 6, 6P, and 13
- UL, CSA, CE, CCC

### WARNING

#### PERSONAL INJURY

- DO NOT USE these products as safety or emergency stop devices or in any other application where failure of the product could result in personal injury.

**Failure to comply with these instructions could result in death or serious injury.**

### WARNING

#### MISUSE OF DOCUMENTATION

- The information presented in this datasheet is for reference only. DO NOT USE this document as product installation information.
- Complete installation, operation and maintenance information is provided in the instructions supplied with each product.

**Failure to comply with these instructions could result in death or serious injury.**

**Warranty.** Honeywell warrants goods of its manufacture as being free of defective materials and faulty workmanship. Honeywell's standard product warranty applies unless agreed to otherwise by Honeywell in writing; please refer to your order acknowledgement or consult your local sales office for specific warranty details. If warranted goods are returned to Honeywell during the period of coverage, Honeywell will repair or replace, at its option, without charge those items it finds defective. **The foregoing is buyer's sole remedy and is in lieu of all warranties, expressed or implied, including those of merchantability and fitness for a particular purpose. In no event shall Honeywell be liable for consequential, special, or indirect damages.**

While we provide application assistance personally, through our literature and the Honeywell web site, it is up to the customer to determine the suitability of the product in the application.

Specifications may change without notice. The information we supply is believed to be accurate and reliable as of this printing. However, we assume no responsibility for its use.

### Find out more

Honeywell serves its customers through a worldwide network of sales offices, representatives and distributors. For application assistance, current specifications, pricing or name of the nearest Authorized Distributor, contact your local sales office. To learn more about Honeywell's sensing and control products, call **+1-815-235-6847** or **1-800-537-6945**, visit **sensing.honeywell.com**, or e-mail inquiries to **info.sc@honeywell.com**

Компания «Океан Электроники» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Поставка оригинальных импортных электронных компонентов напрямую с производств Америки, Европы и Азии, а так же с крупнейших складов мира;
- Широкая линейка поставок активных и пассивных импортных электронных компонентов (более 30 млн. наименований);
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Помощь Конструкторского Отдела и консультации квалифицированных инженеров;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Поставка электронных компонентов под контролем ВП;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- При необходимости вся продукция военного и аэрокосмического назначения проходит испытания и сертификацию в лаборатории (по согласованию с заказчиком);
- Поставка специализированных компонентов военного и аэрокосмического уровня качества (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Actel, Aeroflex, Peregrine, VPT, Syfer, Eurofarad, Texas Instruments, MS Kennedy, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Компания «Океан Электроники» является официальным дистрибьютором и эксклюзивным представителем в России одного из крупнейших производителей разъемов военного и аэрокосмического назначения «JONHON», а так же официальным дистрибьютором и эксклюзивным представителем в России производителя высокотехнологичных и надежных решений для передачи СВЧ сигналов «FORSTAR».

## JONHON

«JONHON» (основан в 1970 г.)

Разъемы специального, военного и аэрокосмического назначения:

(Применяются в военной, авиационной, аэрокосмической, морской, железнодорожной, горно- и нефтедобывающей отраслях промышленности)

«FORSTAR» (основан в 1998 г.)

ВЧ соединители, коаксиальные кабели, кабельные сборки и микроволновые компоненты:

(Применяются в телекоммуникациях гражданского и специального назначения, в средствах связи, РЛС, а так же военной, авиационной и аэрокосмической отраслях промышленности).
